### 19.1 Overview

#### 19.1.1 Purpose

The Signage and Wayfinding section is a reference document to provide consistency across design and engineering and that provides a reference document for the deployment across the campus of new signage and wayfinding strategies that are aligned to the Campus Master Plan.

This section <u>must</u> be read in conjunction with the latest version of the UC Signage Guidelines that is appended to this Design Guideline.

This section of the Design Guidelines is intended to be read and applied during design in conjunction with **Section 01 – General** and any project specific brief and agreements.

#### 19.1.2 Key Design Principles

**New Buildings:** Each project for new buildings should incorporate the Signage and Wayfinding guidelines for internal and external building signage.

**External Spaces**: The Signage and Wayfinding Guidelines are to be used for the external spaces that are outside of the building but are within the scope of the project.

**Refurbishment**: The Signage and Wayfinding Guidelines are to be used for buildings and the associated external spaces where large scale refurbishment is being undertaken.

**Partial Refurbishments**: A decision will be made on a case by case basis on whether the Signage and Wayfinding Guidelines are to be used for partial refurbishments and upgrades.

**Installation**: The establishment and installation of any signage and wayfinding solution is to be by a contractor nominated by UC.

**Scope**: This Design Guideline covers only signage and wayfinding. Health and Safety and other instructional signage are to be treated separately as these are required and in accordance with the relevant standards. These other requirements include but are not limited to: PC2 spaces, hazardous chemical, and plant rooms.

#### 19.1.3 Development of Design Guideline

The UC Signage Guidelines appended to this Design Guideline was developed for the internal and external wayfinding for a recent large project.

The intention for wayfinding for roads and outdoor signage is to develop these are they are required and add these to the current version of the Guideline.
