Kia ora

UC offers heaps of options for study and lots of ways you can learn. No matter what your interests are, you will find something you are passionate about here.

If you are not sure what you want to study yet, don't worry. This guide outlines all the subjects and degrees available at UC and provides some useful info to help you choose your path. Plus, it covers all the support available to help you succeed. Throughout your time here, you will also discover new interests and make friends from all over the world. We look forward to having you join the whānau here at Te Whare Wānanga o Waitaha | University of Canterbury!

Degrees

Degrees are a type of qualification you can study at university — there are several types of qualifications varying in level of study and length of time, such as:

Bachelor's degrees

A bachelor's degree is usually the first qualification you study out of high school that usually takes 3–4 years to complete. UC offers a wide range of bachelor's degrees – see **page 8**.

Double degrees

Some bachelor's degrees can be studied together. When a student graduates with a double degree, they receive 2 separate qualifications. This option involves more study, but you can specialise in different areas, opening up a wider range of career options — see **page 6**.

Conjoint degrees

Conjoint degrees involve merging two degrees into one so you can study majors from different areas. A student will only receive one qualification when they graduate with a conjoint degree. This involves a much higher workload each year.

While the workload is intensive, they cost less than a double degree, and you would complete two study areas in a shorter time than doing both separately — see **page 6**.

Subjects

Subjects are areas you can study in your degree. Some subjects you can continue from high school such as Accounting, Biology, History, while some you can start new at UC like Social Work, Geology, Marketing — see **page 39**.

Major

A major is the subject you choose to focus on all the way to the final year of your bachelor's degree. For example, a Bachelor of Arts majoring in Sociology.

Double major

You can sometimes choose to concentrate on two subjects that you are interested in. These can be completed in the same time as a single major without the extra workload.

Minor

Besides a major, a minor is another way to focus on a subject, but you will only study this up to your second year.

For example, a Bachelor of Science majoring in Chemistry with a minor in Environmental Science.

Arts specialisations

Choosing a specialisation in the Bachelor of Arts means you study a set programme of courses centred on a broad theme. Specialisations are bigger than a typical major and they include courses from a range of subjects that complement each other — see **page 11**.

Courses

A course, also know as a paper, is a specific topic within a subject, for example an American history course within the History subject. This involves lectures, assignments, and other forms of study. Your degree is made up of multiple courses.

Points

Each course has a points value (similar to credits from NCEA). You will need to complete a certain number of points overall to successfully finish your degree.

Semester

The academic year is split into two periods of study known as semesters. One semester is the equivalent of two terms at high school.

- Semester 1: February June
- Semester 2: July November
- Summer: November February.

More information

Please contact the Future Students Office for degree and subject planning advice. See **page 120** for contact details.

How do majors and minors work?

Majors

A major is a particular subject within your degree that you specialise in. It makes up about a third your degree and at least half of your final year. Not all degrees have majors but most of the general degrees do — such as the Bachelor of Arts, Bachelor of Commerce, and Bachelor of Science.

Minor

When compared to the major, a minor is another subject that you have included in your degree, but not to the same extent as the major. It can be a subject that complements your major, or can be a subject from another general degree entirely. For example, a student studying the Bachelor of Commerce might want to primarily focus on Management (their "major") but also has an interest in French (their "minor").

Minors in Engineering

Compulsory courses

Some disciplines in the Bachelor of Engineering with Honours allow you to further enhance your knowledge by including an engineering minor. For example, students doing Mechanical Engineering and who have an interest in designing and creating medical and healthcare technology might decide to include a Biomedical Engineering minor.

Double major

A double major is where you choose to specialise in two subjects from the same degree. You can often complete these in the same time as a single major without any extra workload.

A student doing a Bachelor of Science, who started with a Geology major and Chemistry minor could decide after their first year that they are just as interested in both subjects, taking Chemistry further in their degree and turning it from a minor into second major.

> Courses from Arts or other degrees

An example of degree structures for a Bachelor of Arts (single major and minor) and Bachelor of Arts (double major).

More information

If you have any questions, please contact a Future Student Advisor for degree planning advice. They can help show you how the degrees are structured, and how majors and minors might work for you depending on what subjects you are interested in studying.

You can read the subjects starting on **page 39** or visit the degree to see the subjects available as majors and minors at **courseinfo.canterbury.ac.nz**

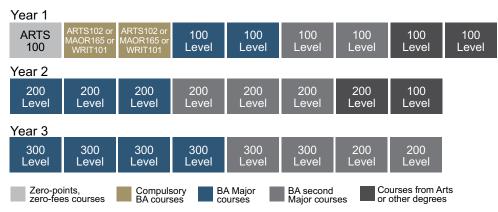

Bachelor of Arts – Major/minor pathway example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

Bachelor of Arts – Double Major example degree structure

Minor courses

Major courses

Other Arts courses

Each small block represents a 15-point course. However, some courses may be 30 points or more.

Double and conjoint degrees

If you are really keen, you can combine bachelor's degrees. There are two ways of doing this – double degrees and conjoint degrees. Both require extra work and you should talk to a Future Student Advisor before starting either.

Double degrees

Some bachelor's degrees can be studied together. This allows you to really specialise your study, opening up a wider range of career options.

The degree diagram (right) provides an example of what a double degree, Bachelor of Arts and Bachelor of Commerce, might look like.

Please note: Double degrees need careful planning each year as not all degrees have the same structure and requirements.

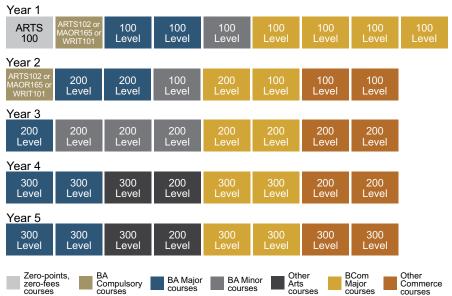

Conjoint degrees

A conjoint takes a major from one degree and another major from another separate degree and combines them into one degree. Unlike double degrees, these must be completed at the same time, and involve a much higher workload each year.

These are the conjoint degrees at UC:

- Arts and Commerce
- Arts and Science
- Commerce and Science
- Engineering and Arts
- Engineering and Commerce
- Engineering and Data Science
- Engineering and Health Science
- Engineering and Product Design
- Engineering and Science
- Engineering and Social and Environmental Sustainability
- Engineering and Sport

Bachelor of Arts/Bachelor of Commerce – double degree example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

- Product Design and Commerce
- Product Design and Science
- Social and Environmental Sustainabilityand Arts
- Social and Environmental Sustainability and Youth and Community Leadership

The table below compares the differences between double and conjoint degrees:

	Double degree	Conjoint	
Entrance requirements	University Entrance (UE)	UE and at least Level 3 endorsed in Merit.	
Academic requirement to continue each year of degree	Standard passing grades apply	Must maintain a grade average of at least a B.	
Workload per year	Standard (120 points) Approximately eight (15-point) courses per year	Increased (135 points) Approximately nine (15-point) courses per year. Must take at least one course from each qualification each year.	
Graduate	You can complete either both at the same time or one after the other	Both degrees must be completed before you can graduate.	
Minimum timeframe	5-6 years (depending on degrees)	4 years	
Majors/minors	As required/permitted for each degree. Multiple majors (eg, double major in a single degree) and minors are possible.	Maximum of one major in each degree. Minors may be possible; and a minor is required for the BA.	
Number of qualifications gained	Two – you gain both degrees	One – a conjoint combines the courses into just one degree.

Ako: Bachelor of Teaching and Learning. BTchLn

Ako: Bachelor of Teaching and Learning – example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

If you are inspired by the world around you and wish to make a positive difference in the lives of young people, then a teaching career could be for you.

Ako: Bachelor of Teaching and Learning prepares you for a professional teaching career in whare kōhungahunga (early childhood) or kura tuatahi (primary) settings.

Study information

Endorsements
Early Childhood Education
Primary Education
Mātauranga Māori (bilingual programme)

How to apply:

Admission requirements include English language competency, referees' reports, an interview, short literacy and numeracy tests, and a police check.

Our selection for entry is based on your academic ability and interest in working with children, community involvement, communication skills, and other personal qualities.

For the Mātauranga Māori programme, a hui alongside your whānau will determine your starting point based on your te reo Māori proficiency. If you have limited te reo Māori proficiency, you can complete Summer School te reo courses before starting the programme.

Applications close **1 December**.

Compulsory courses

Courses	
AKOT101	Ngā Tāngata o Aotearoa: Te Mana o Te Tiriti o Waitangi
AKOA161	Mana Ako:Practice Exploration 1
AKOT231	Saili Matagi — 'Seeking the winds of change in Pasifika Education'
AKOA261	Mana Ako: Practice Exploration 2
AKOA262	Mana Ako: Practice Exploration 3

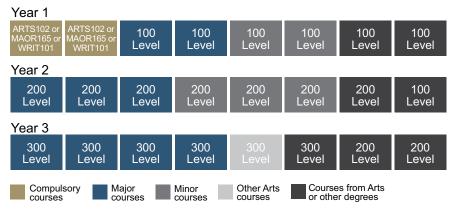

Highlights

- You will take Te Tiriti o Waitangi and te ao Māori courses, so you can incorporate bicultural knowledge and competence into teaching practices.
- Professional placements in schools, kura, and early childhood centres throughout the degree.
- Learn from lecturers who are active researchers.
- Flexible study options choose to study on campus in Ōtautahi Christchurch, or by distance, full-time or part-time.
- Students in the primary endorsement that reside in the Nelson area can study through a blended model of online and face-to-face courses through the Whakatū Nelson Campus.

- Meet the requirements to apply for provisional teacher registration with Matatū Aotearoa | Teaching Council of New Zealand.
- This degree was developed in partnership with iwi and educators to prepare new teachers to be creative and innovative leaders in the profession.
- You will gain transferable skills such as management, collaboration, resilience, and problem-solving.
- Graduates have gone on to teaching and managing positions in early childhood centres, kura, primary, intermediate, middle, Māori medium, and area schools.

Bachelor of Arts. BA

Bachelor of Arts - Major/minor pathway example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

With over 30 subjects to choose from, BA students can follow their passion and gain valuable skills.

Over the three years of your degree, you will gain the critical thinking, creative problem-solving, and communication skills that employers want. Unique practical experiences such as internships are on offer too.

In your first year, you will choose two broad arts skill courses from:

- academic writing
- critical thinking
- bicultural identity.

BA with two pathways

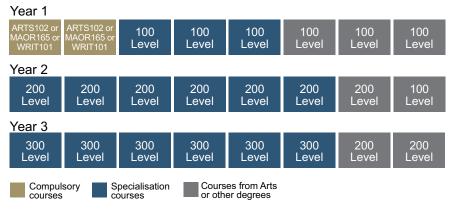

Major and minor pathway

There are over 30 Arts subjects that you can major in and many more minors including subjects from other degrees. You can choose to do a double major, or a major and minor. You can customise your study even further by doing a double or a conjoint degree, tailoring your studies to suit you.

Major subjects	
Anthropology	Japanese
Art History and Theory	Linguistics
Chinese	Māori and Indigenous Studies
Cinema Studies	Mathematical Science Education
Classics	Mathematics
Community Music (minor only)	Media and Communication
Cultural Studies (minor only)	Music
Digital Humanities (minor only)	Philosophy
Economics	Political Science and International Relations
Education	Professional and Community Engagement (minor only)
English	Pacific Studies (minor only)
European and European Union Studies	Psychology
French	Russian
Geography	Sociology
German	Spanish
History	Statistics
Human Services	Te Reo Māori

ł

Bachelor of Arts – Specialisation pathway example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

Specialisation pathway

Choosing a BA Specialisation provides you with a set programme of courses centred on a broad theme. Specialisations are more structured than a typical major and they include courses from a range of subjects, so you can look at the complex problems of today's society from different angles.

Specialisations

Creative Industries and Contemporary Practice

Cultural Heritage

Global Societies and Cultures

International Affairs

Language, Brain and Behaviour

Philosophy, Politics and Economics

Society, Diversity and Change

Highlights

- Many courses offer field trips, real-world case studies, performances, internships, and community projects.
- You have the option to study a minor from additional subjects across Arts, Commerce, Digital Screen, Health Sciences, Product Design, Science, Sport, and Youth and Community Leadership.
- Get involved with some of the many Arts related student clubs including Arts Society, Japan Society, Classoc, and Musoc.

Career ready

- Gain practical experience by adding an internship in your second or third year of study.
- Learn sought after workplace skills such as writing, critical and creative thinking, problem-solving, and communication.
- Graduates will be ready to work in media, politics, conservation, iwi organisations, tourism, heritage, international relations, and more.

"There are so many different areas you can specialise in. In your first year, it is great to delve into many different papers and then you get a feel for what area you would like to study more."

Maisie

Bachelor of Arts in Political Science, minoring in Chinese and International Business

Bachelor of Commerce. BCom

Bachelor of Commerce – example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

From financial markets to the latest management practices and the rapidly expanding world of e-commerce, a BCom gives you the knowledge and skills to succeed in a global business environment.

UC and its business partners provide many opportunities for you to gain practical business experience and make important contacts.

Study information

Subjects

Accounting

Business Analytics (minor only)

Business and Sustainability (minor only)

Economics

Entrepreneurship (minor only)

Finance

Human Resource Management

Information Systems

International Business

Innovation (minor only)

Management

Marketing

Operations and Supply Chain Management

Strategy and Entrepreneurship

Taxation (minor only)

Taxation and Accounting

Tourism Marketing and Management

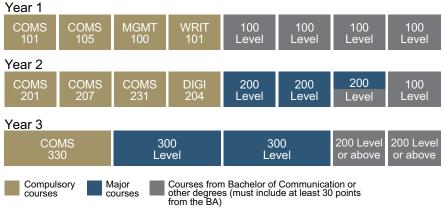

Highlights

- Competitions and inter-university business challenges develop your entrepreneurial, project management, and teamwork skills.
- You have the option to study a minor from subjects across Commerce, Arts, Digital Screen, Health Sciences, Product Design, Science, Sport, and Youth and Community Leadership.
- Te Kura Umanga | UC Business School and its programmes are accredited by AACSB, EQUIS, and AMBA, giving you an internationally competitive and industryrelevant qualification.
- UC's Trading Room gives you a real-world trading environment with a live market and stock data feed, and simulation tools for trading.

- Get hands-on experience through industry internships, international exchanges, and overseas study tours.
- Gain problem-solving, communication, and management skills.
- Network with UC's industry contacts and get support in launching your own business ideas.
- Graduates are working as accountants, software developers, consultants, marketers, entrepreneurs, and more.

Bachelor of Communication. BC

Bachelor of Communication – example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

With a BC, you will develop skills in media content production, planning, and research in international and national contexts.

You will have the opportunity to use a variety of communication technologies, including digital, audio and visual, and social media in areas like journalism, creative projects, and communications scenarios catering to different audiences. You will also learn to meet strategic goals of corporates and drivers of social change.

Study information

In the first year of your degree, you will get a broad introduction to communication through courses in writing, journalism, media, and management.

From second year, you will also begin courses towards your chosen major.

Subiects

Communication Strategy and Practice

Journalism

Political Communication

Tauwhitinga Māori: Māori Communication Strategy and Practice

Highlights

- Opportunities to use your skills in practical ways, including working with local organisations, and with a variety of communication technologies including digital, audio and visual, and social media platforms.
- Placements in local newsrooms as part of the Journalism major.
- Tauwhitinga Māori is the only Māori communications major on offer in Aotearoa.
- With links to international partners in journalism and media studies, we offer guest lectures from global experts each semester.

Career ready

- Get workplace experience through internships, industry projects, or community campaigns within local businesses.
- Gain applied knowledge in new and emerging media, collection and usage of data, media ethical practice, critical thinking, and analysis skills.
- Develop your skills and confidence to represent our bicultural nation through our media.
- · Graduates will be ready to work as journalists, social media managers, marketers, crisis communication advisors, event managers, editors, and more.

"I always had a passion to tell the untold stories of the amazing people in my community. After finishing my **Bachelor of Communications** and taking up a Video Journalist role, I can now give an in-depth view into those stories with my pictures."

Rhyva

Bachelor of Communication in Journalism Video Journalist, Otago Daily Times

Bachelor of Criminal Justice. BCJ

Bachelor of Criminal Justice – example degree structure

¹ Students enrolling in the LLB/BCJ double degree will enrol in LAWS101 instead of CRJU150 and CRJU160.

² Students enrolling in the LLB/BCJ double degree will enrol in LAWS202 instead of CRJU202.

³ If LAWS202 taken, then 45 points from the 200-level electives. If CRJU202 taken, then 60 points from the 200-level electives.

Each small block represents a 15-point course. However, some courses may be 30 points or more.

The BCJ is the first degree of its kind in Aotearoa, combining multidisciplinary academic study with a strong vocational focus.

Criminal Justice studies take a 360-degree look at the criminal justice system and its processes, including governance, enforcement, rehabilitation, and improvement. The degree draws together UC's expertise in criminology, sociology, developmental and behavioural psychology, policing, criminal law and procedure, and human services.

Study information

The first year of study is designed to give you a broad introduction to the criminal justice system in Aotearoa.

From second year, you can choose to study topics such as forensics, policing, criminal law and procedure, and bioethics.

Highlights

- Strong links with employers in the crime and justice fields gives you the chance to work closely with current policies and legislation.
- Enjoy learning from courses across criminology, sociology, developmental and behavioural psychology, criminal law and procedure, policing, and human services.
- Join student club CRIMSOC and meet like-minded students.

Career ready

- Practical experience examining our justice system and identifying opportunities for reform.
- Opportunity to increase your skills while working.
- Graduates work in areas such as probation and parole, forensics, public and private investigation and security, social work, criminal justice policy, and the police.

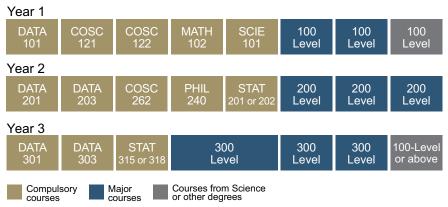

"My Criminal Justice degrees offer fantastic insight into the realms of law enforcement, social welfare, psychology, indigenous issues, and a wide range of contemporary criminal justice problems."

Charlie

Bachelor of Criminal Justice Graduate Research Insights Advisor, Ngā Pirihimana O Aotearoa | New Zealand Police

Bachelor of Data Science. BDataSc

Bachelor of Data Science – example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

Data is used by organisations of all sizes to make better decisions. In this degree, you will learn how to analyse and interpret data to inform decision-making and forecast trends.

This degree will teach you about secure and ethical ways to collect, store, and process large amounts of data — as well as how to understand and communicate findings by turning numbers into actionable outcomes.

As data is at the centre of every industry, you can use your diverse skillset across many fields.

Study information

Subjects
Bioinformatics
Business Analytics
Computational Linguistics
Data Science
Population Health Data Science

Spatial Data Science

The first year of your degree includes introductory courses in programming, mathematics, statistics, and computer sciences. You will also do hands-on lab work and group projects.

In the final year, you will complete a research project aimed at solving a particular industry or community problem.

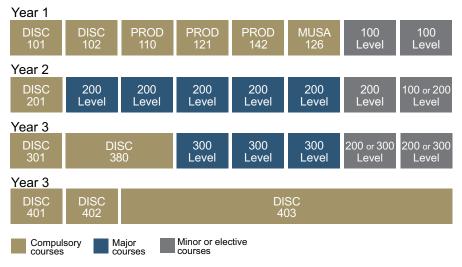

Highlights

- Depending on your chosen major, you will have a range of hands-on learning experiences from our modern laboratories to our field stations.
- Project work in your final year will give you experience in applying data science to create workplace solutions.
- We have research centres that specialise in data science, with projects like climate change prediction models in Antarctica, geospatial mapping for urban planning in rural Aotearoa, and VR simulation training systems for firefighters.

- Project work in your final year involves applying data science to create solutions.
- Gain skills in project implementation, research, critical analysis, problemsolving, and communication to discuss and explain data findings.
- Graduates will be ready to work in roles such as data scientist, analyst, software architect, IT consultant, business analyst, statistician, software developer, and more.

Bachelor of Digital Screen with Honours. BDigiScreen(Hons)

Bachelor of Digital Screen with Honours - example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

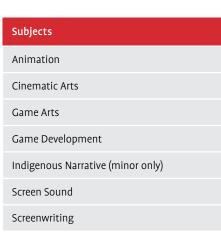

The Bachelor of Digital Screen with Honours is an applied degree, with a key focus on storytelling through words, images, animation and sound.

Study information

In the first year of the degree, all Digital Screen majors will take the same six core courses in storytelling, technical skills, and industry practices. A base level of understanding of these subjects is important for your career in the digital screen industry.

After your first year, you will specialise in your chosen major.

In the fourth and final year, you will work in multidisciplinary groups and create commercial quality and creative projects for the digital screen.

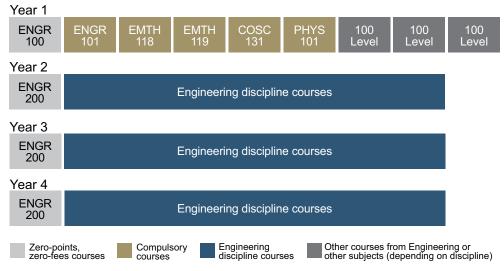

Highlights

- Build your skills in digital media, with subjects ranging from filmmaking to digital sound production to video game design.
- Project work beginning from your second year.
- Turn your games into cinematic masterpieces by applying film production tools and techniques.
- Get access to industry-level sound stages, motion capture labs, film editing studios, and a virtual screen production theatre.

- Learn end-to-end digital production skills, as well as foundational skills in creative design and storytelling.
- Develop a personal portfolio of digital works and practical experiences throughout your degree.
- Opportunity to gain industry contacts with collaborations and events.
- Graduates can find work as game developers, film and television producers, screenwriters, digital artists, creative directors, sound artists, animators, and more.

Bachelor of Engineering with Honours. BE(Hons)

Bachelor of Engineering with Honours – example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

Engineers design the future. They provide innovative solutions to meet the needs of our modern world.

From buildings and bridges, apps and smart devices, to pharmaceuticals and renewable energy, engineering feats are everywhere.

The BE(Hons) is a four-year professional degree. The degree is accredited by Engineering New Zealand, allowing our graduates to work as professionally qualified engineers all over the world.

Study information

The first year of your degree is made up of six introductory compulsory courses, and another three first-year courses which will depend on the engineering discipline you want to specialise in.

The following three years of study focus on your chosen engineering discipline, which may also include a minor subject.

Subjects

Chemical and Process Engineering

Minors: Bioprocess Engineering Environmental Process Engineering Sustainable Energy Engineering

Civil Engineering

Minors: Structural Engineering Water and Environmental Systems Engineering

Computer Engineering

Minor: Communications and Network Engineering

Electrical and Electronic Engineering Minor: Power Engineering

Forest Engineering

Mechanical Engineering

Minors: Aerospace Engineering Biomedical Engineering

Mechatronics Engineering

Software Engineering

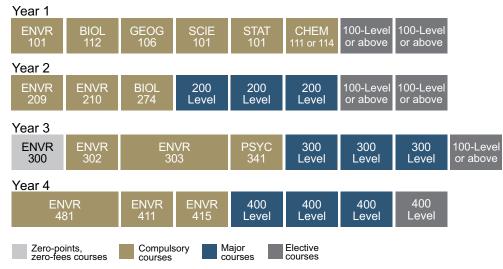

Highlights

- Access modern engineering labs and computer and testing facilities.
- Enjoy a flexible first year which allows you to keep a variety of discipline options open for your next three years of study.
- Combine your Engineering studies with other degrees through UC's Engineering Conjoint degrees to complete two different subject areas in one.

- You will spend around 100 days (800 hours) on practical work placements as part of your degree.
- Gain skills in communication and report writing, ethics, sustainability, safety, and interacting with clients and customers.
- Graduates work in private companies and consultancies through to government agencies, with many progressing into management.

Bachelor of Environmental Science with Honours. BEnvSci(Hons)

Bachelor of Environmental Science with Honours – example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

This degree will give you skills and the practical learning you will need to address the pressing environmental issues we face — in Aotearoa New Zealand and globally.

Various disciplines of science intersect in this programme to create a layered understanding of complex sustainability challenges we face — for example in freshwater resources, marine contamination, coastal erosion, biosecurity, natural disasters, and climate change. You will assess impacts resulting from disasters, ecological change, and human activity.

The BEnvSci(Hons) is accredited by the Environment Institute of Australia and New Zealand (EIANZ) to deliver environmental practitioners for roles in industry, government, education and research, and the community.

Study information

Subjects

- Ecosystem Health and Biosecurity
- Environmental Change
- Environmental Contamination
- Environmental Hazards and Disasters
- Freshwater
- Sustainable Coasts

The first year of your degree includes introductory courses in biophysics, ecology, and geographic sciences.

From second year onwards, you will take courses towards your major and gain hands-on experience through labs, fieldwork, and internship placements.

Highlights

- This degree combines mātauranga Māori and scientific knowledge to broaden your understanding and approach to environmental issues, using Ki Uta ki Tai | From the Mountains to the Sea — the full journey and interconnectedness of the natural world.
- Lab and field-based learning, with 400 hours of work experience.
- Courses cover a variety of subjects to customise your degree with the issues you are most passionate about.

- Extensive practical experience in work and field settings.
- Graduates are in demand for their ability to identify, monitor, and solve a variety of problems associated with the environment. They help advise on sustainability, environmental risks, and environmental aspirations.
- Graduates will be ready for roles such as consultants, policy analysts, disaster and crisis response management, and researchers for contamination, pollution, and invasive species.

Bachelor of Fine Arts. BFA

Bachelor of Fine Arts – example degree structure

Year 1				
FINA 101	FINA 102	FINA 103	ARTH 100-Level	ARTH 100-Level
Year 2				
Studio subject	211	Studio subject 212	ARTH or CINE 200-Level ¹	200 Level

Year 4				
	Studio su	bject 411	100-Level or above	100-Level or above
Introduction to all specialist studio stud	ies Spo	ecialisation in e studio subject	achelor	

¹ Students specialising in Film or Photography may take either Art History and Theory or Cinema Studies 200-level courses. All other students take Art History and Theory 200-level courses.
 ² Students must complete 30 points of 300-level ARTH courses (or CINE courses for Film and Photography students) to be eligible for entry into Bachelor of Fine Arts with Honours at fourth year.

Each small block represents a 15-point course. However, some courses may be 30 points or more.

The BFA is a prestigious degree that will give you a broad knowledge in visual arts, multimedia, and design before you specialise.

The BFA not only focuses on developing your practice, but also helps to build your identity as an artist. The tight-knit cohort adds to the supportive and diverse community of practitioners.

Photography
Sculpture

Entry requirements

You need to have met University Entrance requirements. We prefer students who took arts in high school, but anyone with a good portfolio will be considered.

How to apply

You need to submit:

- an application form
- a letter of introduction
- a portfolio of 12 recently completed imaged-based examples, including a written statement about your current skills and identity as an artist.

Applications are due by **15 November**.

For full details, please see:

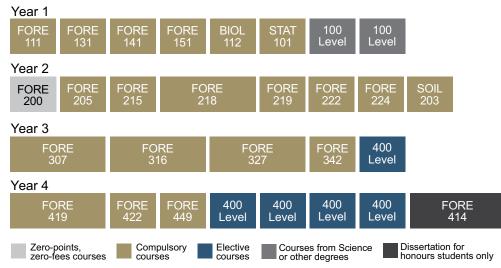

Highlights

- In your first year, you will be introduced to all five studio specialisations, giving you the chance to develop your passion before continuing in one Fine Arts subject from second year.
- Enjoy 24-hour access to your own personal studio space from second year.
- Work in purpose-built studios; access technician workshops, workrooms, darkrooms, computer labs, and the Ilam Campus Gallery.

- Showcase your work during the year through exhibitions and community projects.
- Gain creative and practical skills in your chosen specialisation as well as organisational and time management skills.
- Graduates are working as professional artists, art gallery directors, photojournalists, art historians, consultants, and more.

Bachelor of Forestry Science. BForSc

Bachelor of Forestry Science – example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

The BForSc is a professional degree that prepares graduates for managing forest resources by combining core science courses with management, commerce, and technology.

Forestry Science graduates are highly sought after by employers and follow exciting and rewarding career paths.

Study information

In your first year, you will study six compulsory courses (plus 30 points in electives) to gain a strong foundation in the science and commercial aspects of forestry.

From second year, you will apply this knowledge to the forest line of work, with compulsory courses including forest engineering, forest economics, forest biology, and silviculture.

Highlights

- Small class sizes create a high-quality learning environment.
- UC has field stations located near Arthur's Pass and at Kawatiri Westport for forestry teaching and research.
- Participate in an exchange programme with top forestry schools in Canada and the United States.
- With strong employer links, the majority of graduates are employed before finishing their degree.

Career ready

- Benefit from hands-on learning with 90 days industry work experience.
- Gain skills in forestry management, sustainability, marketing, and research.
- Graduates are working in forest management, conservation, harvesting, wood processing, biosecurity, policy, iwi advisory, and more.

"I like the wide variety of papers, we study everything from biology, to engineering, to economics and marketing."

Hazel Bachelor of Forestry Science Graduate Forester, Timberlands Ltd, Rotorua

Bachelor of Health. BHlth

Bachelor of Health – example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

Learn how to improve the wellbeing of individuals and communities, while navigating the health sector and related fields.

With many subjects to explore, you will deepen your understanding of health and wellbeing to strengthen equity and examine global health challenges. Our subjects are developed to equip you with the specialist knowledge and skills to build a career in health..

Study information

Subjects
Exercise and Sport Nutrition
Health Education
Health Science
Māori and Indigenous Health
Mental Health and Addictions
Physical Activity and Wellbeing
Psychology
Public Health

The programme emphasises practical learning, with guest speakers and projects from the health sector and an internship in your third year of study

Highlights

- Gain a strong understanding and critical thinking around Health in the wider community and in the health care sector in Aotearoa NZ .Work together with our communities, health organisations, and whānau to identify health barriers and challenges, and collaborate to develop effective strategies that promote Oranga | Wellbeing.
- Mātauranga Māori and bicultural competence and confidence are integrated into the degree.
- Study health models and concepts, learn the terminology of the health sector and gain effective communication skills..

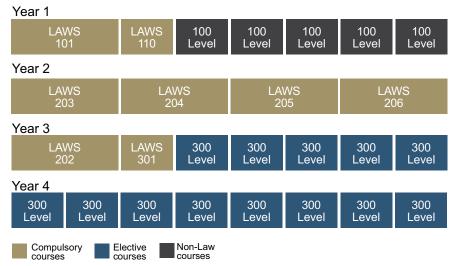

Career ready

- Complete an internship in the health sector in your third year of study.
- Gain the skills and knowledge to apply for certifications and accreditations for roles in the health sector such as Associate Registered Nutritionist, Drug and Alcohol Practitioners' Association Aotearoa New Zealand (DAPAANZ) and more,
- Learn the necessary skills to improve health and wellbeing through disease prevention, health promotion, and health service planning, delivery, and evaluation.
- Graduates work in throughout the health and wellbeing sector, including local and central government, aged residential care, policy, schools, Health New Zealand regionally and nationally, NGOs, health promotion agencies, and Māori health providers.

* subject to CUAP and TEC approval

Bachelor of Laws. LLB

Bachelor of Laws – example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

Bachelor of Laws students gain a professional degree of outstanding quality in four years.

You will deal with real people with real problems as part of the innovative clinical studies programme at UC, honing critical practical skills in the process of helping the community.

Study information

In the first year of your degree, you will study two core courses designed to teach you about the legal systems in Aotearoa and build your foundational skills in legal research and writing.

With good grades in both LAWS101 and LAWS110 (normally at least a B), you can advance into 200-level Law courses, all of which are subject to limited entry.

From third year, you will be able to customise your study to focus on different areas of the law.

You will also need to also study five non-Law courses in the first year of your degree. Popular choices include Business, History, Management, and languages. For a full list of course options, go to our website or talk to a Future Students officer.

Highlights

- UC has a specially designed Moot Court room, regularly used for client interviewing, witness examination, mooting, and negotiation competitions.
- Get work experience through internships, clinical, and community work opportunities.
- Many student clubs including LAWSOC, Women in Law, Te Pūtāiki Māori Law Students' Association, CRIMSOC, and Law for Change.
- The structure of this degree allows you to do a double degree or switch degrees if you are unable to advance to 200-level LAWS or prefer not to continue with the LLB. You can switch to other degrees like Arts, Commerce, Criminal Justice, or Science.

Career ready

- UC has Law Internship courses involving community and clinical work experience.
- Gain necessary legal skills in research, writing, analysis, and reasoning for a range of careers beyond law.
- Graduates have careers such as lawyers, policy analysts, Māori development advisors, foreign affairs officers, and journalists.

"I've found Law a lot more interesting than I ever expected as it is more based around the psychological mindset that being a lawyer involves."

Sol Bachelor of Laws and Bachelor of Arts

Bachelor of Music. MusB

Bachelor of Music – example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

Music features in every culture and society around the world, whether for enjoyment or to express and understand messages and ideas. The global music industry is growing and changing, and music professionals now have more career options available to them than ever before.

With a MusB, you can choose from four specialised majors to get you closer to your career in music.

Study information

The MusB has been designed to give you flexibility in choosing courses throughout your study — you can choose a major (or two) from the table and take other courses from Music or other degree areas like Arts, Science, and Commerce.

Subjects

Composition

Creative Music Technology

Music Studies

Performance

How to apply

Performance major

Entry to some first-year Performance courses are limited based on a vocal or instrumental audition. Applications should be made to Te Kura Puoro | School of Music no later than **20 September**.

Other majors require no previous music studies and no special application.

Highlights

- You will have plenty of opportunities to perform, with many concerts hosted across our Ilam and Arts Centre campuses each year.
- Enjoy unique learning spaces in our Arts Centre locations.
- Connect with the community through internships and collaborative projects.
- Combine your interests with the option to do a double major.

- Put your skills into practice through opportunities to perform and internships.
- Alongside your skills in music creation and practice, you will also gain skills in communication, teamwork, project management, and creative thinking.
- Graduates are working as composers, sound designers, performers, producers, music therapists, music educators, and more.

Bachelor of Product Design. BProdDesign

Bachelor of Product Design – example degree structure

¹ 200 or 300-level courses from MGMT, MKTG, ECON, FINC, INOV, BSNS, or ACCT. Each small block represents a 15-point course. However, some courses may be 30 points or more.

Product Design combines creative design, science, engineering, and business studies. Product designers plan and develop items for homes, businesses, and industry.

From creating a new lightweight kayak or a phone app, to formulating rongoā (medicinal products) or a virtual training world, studying product design will equip you for a wide range of occupations.

Graduates will be able to develop creative ideas based on their knowledge of related sciences and engineering disciplines, as well as gain the practical business skills needed to commercialise new products.

Study information

Subjects Chemical Formulation Design Digital Product Design Industrial Product Design

The first year of your degree includes courses in product design, mathematics, management, and introductory courses specific to your chosen major.

From your second year, you will focus on your major and develop a deeper understanding of manufacturing, testing, and commercialising your product ideas.

You will need to have previous studies in chemistry from high school for entry into Chemical and Formulation Design.

Highlights

- You will have access to modern design, laboratory, computer, and testing facilities.
- Develop your ideas through a number of projects working as an individual or as part of a team.
- Study a BProdDesign alongside a Bachelor of Commerce, Science, or Engineering to complete a conjoint degree in just four years.

- Gain practical experience by taking part in design projects right from the first year.
- Learn to develop ideas based on the latest science and technology, while gaining the business skills needed to launch new products that fulfil a market need.
- Graduates will be ready to work in design agencies, manufacturing companies, engineering consultancies, educational and training companies, research and development, and more. You may even choose to start your own company.

Bachelor of Psychological Science. BPsycSc

Bachelor of Psychological Science – example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

The BPsycSc offers study in all disciplines within psychology — the field of human thought, growth, and capability.

You will examine how our brains function, and how and why changes in our environment, culture, and relationships can influence our behaviour and overall wellbeing. Through a minor subject, you will focus your study in a particular area of psychology — from brain and behavioural disorders to workplace and forensic psychology.

Study information

Subjects Forensic Psychology Māori and Indigenous Perspectives Neuroscience and Cognition

Psychological Wellbeing

Psychology for Common Good

Workplace Psychology

The BPsycSc has introductory and specialised courses in different areas of psychology, including a final-year community project.

As well as the core Psychology courses throughout the three years of the degree, you will also study towards a minor, and have the option of adding a second minor.

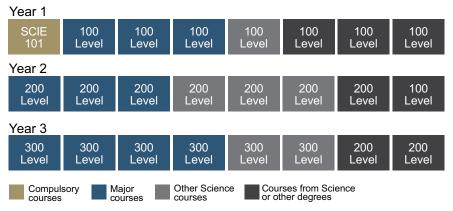

Highlights

- Explore the human mind and how this affects everything about our behaviour, identity, and interactions with the world.
- Develop your observational skills, technical and lab abilities, and ethical knowledge of psychology practice as a professional career.
- Choose from specialised minors and customise your degree in areas such as neuroscience, mental health, and forensics and criminal psychology.
- Learn from industry professionals throughout study and complete a finalyear work experience course based in the community.

- Gain experience with a final-year project working with community and industry partners.
- Learn the necessary in-depth skills to improve mental health and wellbeing, communication, scientific research, and your own professional identity.
- Graduates work in psychology and healthcare, in local and central ministries, and non-governmental organisations.

Bachelor of Science. BSc

Bachelor of Science – example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

A BSc is about understanding and improving the natural world through observation, experimentation, modelling, and calculation.

You will investigate the big issues confronting our planet, including climate change, human health and diseases, the global water crisis, food security, and environmental protection.

A BSc will expose you to new ideas and technologies, develop your research skills, and help you make a contribution to the challenges facing our world.

Study information

Statistics

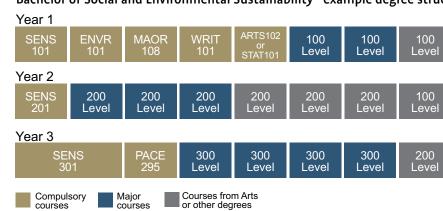

Highlights

- Learn from a wide network of field stations reaching from Antarctica to Nigeria and throughout Aotearoa.
- 'Do science' right from the first semester of your first year. We have access to the most field stations of any Aotearoa university and offer a range of practical experiences, research projects, and lab and fieldwork.
- Global study experiences, including exchanges to partner universities.
- You can choose to take a minor in Science, or from additional subjects in Arts, Commerce, Digital Screen, Health Sciences, Product Design, Sport, or Youth and Community Leadership.

- You will get hands-on practical and clinical learning experiences, from the lab to the field.
- Gain project management, critical thinking, and research skills alongside practical knowledge of your chosen major in Science.
- A BSc sets you up to pursue a wide range of careers all over the world from marine biologist to aerospace engineer, and much more. It can open doors to many other careers, including business, politics, medicine, finance, and engineering. With a BSc, anything is possible.

Bachelor of Social and Environmental Sustainability. BSEnS

Bachelor of Social and Environmental Sustainability- example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

The BSEnS explores the biggest problems we face globally, from pollution and climate change to world hunger.

You will gain meaningful skills including understanding how and why these issues happen, and the actionable steps we need to change these.

Help us build a sustainable and equitable future in business, policy, and global society.

Study information

Subjects

Environmental Policy, Governance and Social Justice

Indigenous Knowledge and Sustainable Partnerships

Social Action, Community and Global Development

Sustainable Business, Enterprise and Economics

Highlights

- Courses come from a variety of different subjects — including Environmental Science, Policy, and Marketing — so you can get a full view of the global issues that you are passionate about and learn how you can achieve behaviour change and social action.
- Use UC's local and global contacts with entrepreneurs, environmental scientists, tangata whenua, and other change makers.
- You can take a minor from subjects across Arts, Commerce, Digital Screen, Health Sciences, Product Design, Science, Sport, and Youth and Community Leadership.

Career ready

- Complete a final-year internship supporting our local industry in sustainability.
- Knowing how to identify, critique, and actually make these necessary changes will make you hugely beneficial to our collective goal to make the world a better place.
- Graduates will find work as consultants, policy analysts, aid and advocacy workers, environmental advisors, economists, business managers, entrepreneurs, and more.

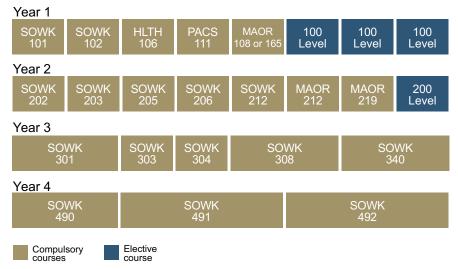

"The BSEnS degree recognises the interconnectedness and complexities of climate change and sustainability."

Alessandra

Bachelor of Social and Environmental Sustainability in Sustainable Business, Enterprise and Economics

Bachelor of Social Work with Honours. BSW(Hons)

Bachelor of Social Work with Honours - example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

The BSW(Hons) at UC is Aotearoa New Zealand's most established Social Work programme. This highly regarded interdisciplinary degree will engage you in both theory and practice, preparing you for a wide range of peoplerelated work.

The BSW(Hons) is ideal for those with a commitment to working with others in overcoming personal and institutional barriers to wellbeing, and promoting the full potential of people.

Study information

In the first year of your degree, you will study five compulsory courses that give you an introduction to social services in Aotearoa, and cover some of the issues that impact and shape our society. Your remaining courses will come from Anthropology, Criminal Justice, Education, Māori and Indigenous Studies, Pacific Studies, Political Science and International Relations, Psychology, Sociology, Te Reo Māori, or Academic Writing.

In your second year, you will explore communication in the human services, human behaviour and development, social policy, diversity and culture, and Māori and Indigenous development. Entry into the second year and beyond requires a special application.

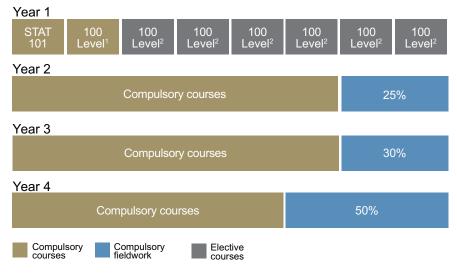

Highlights

- Follow your interests in topics such as mental health, child welfare, criminal justice, ageing, violence and abuse, and gender and sexuality.
- In fourth year, 75% of your study is made up of fieldwork placements in social service agencies.
- Small class sizes allow you to work closely with staff and other students.
- This degree sets you up to work in the social work field in Aotearoa or overseas, particularly in the UK and Australia where there is a Mutual Recognition Agreement between the NZSWRB and the Australian Association of Social Workers.

- Gain practical experience through the two fieldwork placements in the fourth year of your degree.
- The combination of theory and practice sets you up with the values, knowledge, and skills needed to work in the social work profession.
- Graduates are working as community development workers, counsellors, social workers, youth workers, policy analysts, educators, and more.

Bachelor of Speech and Language Pathology with Honours. BSLP(Hons)

Bachelor of Speech and Language Pathology with Honours – example degree structure

¹ Take at least one of the following: MAOR165; TREO110; TREO111; MAOR172; HLTH106. ² You can choose courses from other degrees to make up 120 points. Some courses are recommended. Each small block represents a 15-point course. However, some courses may be 30 points or more.

Over the four years of the BSLP(Hons) degree, you will gain the knowledge and skills to assist a wide variety of people with communication and swallowing disorders.

UC students are able to utilise excellent on-site resources including clinics and research facilities.

Study information

In the first year of your degree, you will complete compulsory courses covering introductory anatomy, physiology, and statistics, and choose from a range of interest courses including Māori culture, language, psychology, and health.

From second year, you will begin your Professional Years. This includes a mix of theory, research, observation, and clinical practice working with real patients from babies to the elderly. Entry into each year of the degree is limited based on your grade point average of the preceding year, and fluency in English. If you are unsuccessful in gaining a place to the second year, your completed courses can usually be credited to the Bachelor of Science, Bachelor of Arts, Bachelor of Health Sciences, or Bachelor of Psychological Science.

Highlights

- The BSLP(Hons) is a highly regarded, professional degree accredited by Te Kāhui Kaiwhakatikatika Reo Kōrero o Aotearoa | New Zealand Speech-language Therapists' Association (NZSTA).
- You have the opportunity to work with people of all ages at clinics on campus, nationally, and overseas.
- Fieldwork accounts up to 50% of your coursework depending on year of study.

- We have a speech and language pathology clinic on campus and the opportunity to go on placement to speech-language therapy clinics at hospitals, schools, and other facilities nationwide and overseas.
- You will learn skills to help with client assessment, and the planning, management, and evaluation of therapy programmes.
- Graduates work with children with autism or language delays, helping stroke patients relearn speech and swallowing, developing new communication devices and tests, building their own private practices, and more.

Bachelor of Sport. BSport

Bachelor of Sport – example degree structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

UC's BSport provides you with an overview of sport as a global culture and professional business, and the tools to help you inspire future athletes, individuals, and communities towards more rewarding and fulfilling experiences.

Study information

Subjects
Performance Data Analysis
Physical Activity and Wellbeing
Sport Coaching and Physical Education
Sport Marketing and Management
Strength and Conditioning
Te Ao Hākinakina
Nutrition (minor only)
Sport Coaching (minor only)
Sport Management (minor only)

The BSport will introduce you to the practice and theory of sport, following themes around culture, science and performance, leadership and business, and teaching and learning.

As well as core courses, you will complete either a major or a major and minor. You can even do a double major if one of your majors is Sport Marketing and Management or Te Ao Hākinakina.

Core courses

Courses	
SPCO101	Introduction to Sport Coaching
SPCO104	Anatomy and Physiology
SPCO105	Social History of Sport and Physical Education
SPCO110	Practicum 1
SPRT108	Sport Business and Governance

Highlights

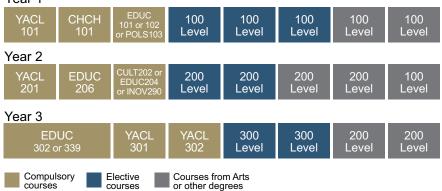

- Learn about all things sport from scientific assessment, athletic technique and performance, fostering positive learning, to the business side of sport.
- Customise your study, with areas such as high-performance science, sport coaching and training, health and wellbeing, and management and organisation.
- Practicums, workshops, fieldtrips and lab work, and a 120-hour internship with a professional or community sport organisation in your final year of study.
- Part-time and online distance study options.

- Practical experiences throughout your degree working with specialist equipment, sporting organisations, youth and other communities.
- Build your career towards management or leadership positions in the sporting or health industries.
- Graduates work as trainers, sports scientists, coaches, extreme or adventure sports guides, team managers, and more.

Bachelor of Youth and Community Leadership. BYCL

Bachelor of Youth and Community Leadership – example degree structure

Year 1

Each small block represents a 15-point course. However, some courses may be 30 points or more.

The BYCL builds on UC's reputation in youth-led social action and offers real-world leadership and project experience.

Study information

In the first year of your degree, you will take introductory courses on leadership skills, understanding communities, identifying areas in need of change, and creating group projects.

From second year, you will explore team leadership and training, potential boundaries for change, cultural and political influences, and build your research and management skills.

Courses YACL101 Introduction to Youth Leadership: Leading the Self CHCH101 Strengthening Communities through Social Innovation EDUC101 Spark! The Art and Science of Learning or Child and or EDUC102 Adolescent Development or Introduction to New Zealand or POLS103 Politics and Policy

Highlights

- Flexible degree that allows you to choose courses and study the subjects and issues that matter most to you.
- Connect with UC's community through noho marae, volunteering with Te Hunga Tūao | Student Volunteer Army, and working with Te Mātāpuna Mātātahi | Children's University.
- You have the option to add a minor from subjects across Arts, Commerce, Digital Screen, Health Sciences, Product Design, Science, and Sport.
- On completion of the recommended courses for youth work and development you can apply for membership to Korowai Tupu, the professional Association for Youth Workers in Aotearoa.

Career ready

- Practical experience through work with UC community organisations.
- Develop skills in leadership, communication, project management, stakeholder engagement, research, and solution-based thinking to help create real results.
- Graduates will be ready to work as leaders of their area of interest, including politics, teaching, iwi development, community services, charities, and marketing.

"UC has given me more confidence than I entered with. There's no more fear, no more worry."

Jasmine Bachelor of Youth and Community Leadership

Certificates and diplomas

Certificate in Arts

The Certificate in Arts (CertArts) is designed for you to study at university level without having to commit to several years of study. It is also an option if you want to take a few courses for interest, or study part-time.

Certificate in Arts – example structure

TEALI			
100 or 200	100 or 200	100 or 200	100 or 200
Level	Level	Level	Level

Arts subject

Each small block represents a 15-point course. However, some courses may be 30 points or more.

Highlights

- Study from a range of subjects which offer field trips, real-world case studies, projects, and more.
- Complete four standard courses of your choice at 100 and/or 200-level in no more than two subjects.
- This Certificate can be studied full-time in 6 months or part-time for up to 5 years.
- Can be used as a pathway to the Diploma in Arts or the Bachelor of Arts with the ability to transfer your credits to those degrees.

Certificate in Commerce

The Certificate in Commerce (CertCom) is an option if you want to add commerce content alongside your non-commerce degree, or do not want to study the full Bachelor of Commerce degree.

Study information

Certificate in Commerce – example structure Year 1

Commerce subject

Each small block represents a 15-point course. However, some courses may be 30 points or more.

Subjects	
Accounting	Information Systems
Computer Science	Innovation
Economics	Management
Finance	Marketing

Highlights

- Enhance your business skills from accounting theories to marketing practices in our rapidly expanding world of commerce.
- Study four standard courses of your choice at 100, 200, and/or 300-level.
- The Certificate can be studied full-time in 6 months or part-time over 6 years.
- Studying this Certificate can be used as a pathway to the Diploma in Commerce or the Bachelor of Commerce.

Certificate in Criminal Justice

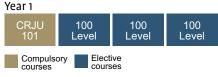

For those wanting a career change into the criminal justice fields, or who are only available to study part-time, or not wanting to study the full Bachelor of Criminal Justice degree, this Certificate is the best option for you.

The Certificate in Criminal Justice (CertCJ) is also a professionally relevant qualification for those already employed within the sector who wish to enhance their current skills and knowledge.

The Certificate is offered on campus **or** online through Tuihono UC | UC Online.

Study information

Certificate in Criminal Justice – example structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

Highlights

- A range of subjects to enhance your current knowledge or gain new skills.
- Study four courses at 100-level in one semester part-time or up to four years part-time.
- Study on campus or fully online through Tuihono UC | UC Online.
- The Certificate in Criminal Justice is a good pathway into the full Bachelor of Criminal Justice degree.

Certificate in Health

* subject to CUAP and TEC approval

The Certificate in Health prepares you with the skills and knowledge to make a positive contribution to the wellbeing of your community through health promotion.

Learn how the circumstances in which people live, work, and play affects their health, and how we can create environments that support New Zealanders to live long and healthy lives regardless of their income or ethnicity.

Study information

Certificate in Science – example structure Year 1

Science courses

Each small block represents a 15-point course. However, some courses may be 30 points or more.

Highlights

- Choose from a range of subjects that suit your specific science interests ranging from Astronomy, to Environmental Science, Medicinal Chemistry, and Psychology.
- Complete a minimum of 60 points of courses at 100 and/or 200-level from Bachelor of Science subjects.
- This Certificate can be completed within one semester full-time, or part time for up to 6 years.
- Courses can be transferred to some degrees and is a great pathway to the Bachelor of Science.

Certificate in Sport Coaching

Designed for working professionals from any walk of life who want to develop their skills and knowledge in the area of Sport Coaching, this Certificate can be completed by distance around your other commitments.

Coaches can complement and enhance their work-based skills; or if you are currently not employed in the sporting industry, you can develop skills and competencies to support your knowledge and performance in the area of Sport Coaching and related fields.

Study information

Certificate in Sport Coaching – example structure

Year 1

Each small block represents a 15-point course. However, some courses may be 30 points or more.

Highlights

- Choose from a range of courses that suit your specific area of interests, which include practical work and labs.
- Develop your work-based skills as a coach, or gain knowledge to increase your employability in the sporting industry.
- Complete four Sport Coaching courses at 100 and/or 200-level. These can be completed in part-time study, full-time study, on campus, or at home.
- Credits from this Certificate can be transferred to the Bachelor of Sport and some other degrees.

Certificate in University Preparation

Study information

- The Certificate in University Preparation (CUP) is designed to prepare Aotearoa New Zealand citizens or permanent residents for university study.
- The Certificate in University Preparation pathway is recommended for people of all ages, those who have been out of study for a while and want to refresh their study skills, or school leavers who want to gain University Entrance.

CUP Courses

The Certificate comprises four courses: TRNS001 and three optional courses.

Courses	
TRNS001	Introduction to Academic Writing (compulsory)
TRNS002	Te Uku: The Peopling of Aotearoa
TRNS003	Introduction to Social Issues and Challenges
TRNS004	Teacher Education and Educational Studies
TRNS005	Exploring the Psychology and Biology of the Human Mind
TRNS006	Elementary Chemistry
TRNS007	Preparatory Mathematics
TRNS008	Fundamentals of Physics
TRNS009	An Introduction to Statistics and Probability
TRNS010	Digital Data
TRNS011	An Introduction to Business
TRNS012	An Invitation to Law
TRNS013	Special Topic
TRNS017	Mathematics and Calculus
MATH101	Methods of Mathematics

Highlights

- Complete one compulsory academic writing and study skills course along with three other courses in an area of study that interests you.
- Interest courses range from teacher education to physics, law, psychology, and business.
- Course places are limited to allow for small classes, which include a combination of lectures, tutorials, seminars, exercises, and group work.
- Flexible study options with a 12-week programme of full-time study or part-time study either on campus or distance to suit your preparation needs.

Certificate in Youth and Community Leadership

The Certificate in Youth and Community Leadership (CertYCL) builds on UC's expertise and reputation for humanitarian work and social activism.

Develop introductory leadership skills and explore global issues you are passionate about resolving, with the opportunity to carry out group projects in the local community.

This programme is an especially good option for working professionals and those already in leadership positions, or if you do not want to commit to the full Bachelor of Youth and Community Leadership degree.

Study information

Certificate in Youth and Community Leadership – example structure

Compulsory courses

Each small block represents a 15-point course. However, some courses may be 30 points or more.

Highlights

- Learn about leadership of self, and leading others, through exploration and experience of a wide range of contemporary leadership theories including in the unique culture of Aotearoa New Zealand.
- Carry out group projects in the local community with the skills you have developed throughout your studies.
- This Certificate can be completed in 1 year full-time, or up to 3 years part-time on campus, or via distance.

Diploma in Arts

If you are wanting to study Arts subjects at university, the one-year Diploma in Arts (DipArts) is a great option without having to complete a full three-year bachelor's degree.

It also allows you to take Arts courses of interest to add onto your studies in other areas.

Study information

Complete one of the following courses:

Courses	
ARTS102	Problems, Questions, Evidence
MAOR165	Tuakiri: Culture and Identity
WRIT101	Writing for Academic Success

Plus choose up to 105 points of courses from the following subjects:

Subjects

History	

Highlights

- Choose from a wide range of Arts subjects and courses at any level.
- Complete a compulsory course on foundational arts skills of academic writing, analysing evidence, or bicultural identity.
- This Diploma can be studied full-time in 1 year, or part-time for up to 6 years.
- Can be used as a pathway to the Bachelor of Arts with the ability to transfer your completed courses to that degree.

Diploma in Arts – example diploma structure

Compulsory Arts courses

Diploma in Commerce

The one-year Diploma in Commerce (DipCom) gives you the opportunity to grow your skills in many business areas.

This Diploma will suit anyone wanting to add business knowledge to their studies, or wanting professional development, but do not want to study the three-year Bachelor's degree.

Study information

Subjects		
Accounting	Information Systems	
Computer Science	Innovation	
Economics	Management	
Finance	Marketing	

You may also include up to 60 points at 100 or 200-level from Mathematics and Statistics.

Highlights

- Choose courses from all Business subjects available at UC, at any level.
- This Diploma can be studied full-time in 1 year, or part-time for up to 6 years.
- Can be used as a pathway to the Bachelor of Commerce with the ability to transfer your completed courses to that degree.

Diploma in Health

* subject to CUAP and TEC approval

Through the Diploma in Health, you will understand the principles and practices of health promotion. Learn about how you can be part of driving the change for a healthier Aotearoa, and empower our communities to take health back on their own terms and increase access to services.

The Diploma in Health is an ideal option to add health promotion knowledge to your studies or career, or as a pathway to the Bachelor of Health..

Study information

The Diploma in Health pathway provides a solid understanding of health concepts, effective communication skills, and health promotion, with a focus on health literacy, disease prevention, and the social determinants of health. Graduates will be able to apply health education strategies to convey complex health information, build trust and foster collaborative relationships with individuals, whānau and communities. Graduates will be wellprepared to positively impact community well-being and pursue further studies into the Bachelor of Health.

Highlights

- Take four compulsory courses alongside four elective courses in an area of your choice ranging from physical activity and nutrition, to Māori and Indigenous development.
- Complete your studies in one year fulltime, or up to four years part-time.
- The Diploma is a great pathway to other UC degrees including the Bachelor of Health Sciences.

Diploma in Languages

If you are interested in learning or developing further skills in languages and would like to develop cultural competencies in these areas, a language diploma could be for you.

This is a great option if you are studying alongside another degree programme, as you can study up to two languages at the same time and graduate with an additional qualification.

Study information

Diploma in Languages – example degree structure

Year 1		
100 Level	100 Level	
Year 2		
200 Level	200 Level	
Year 3		
300 Level	300 Level	

Language courses

Up to 30 points of non-language courses (eg, culture, history) may be chosen if only taking one language. Each small block represents a 15-point course. However, some courses may be 30 points or more.

Diploma in Commerce – example diploma structure

Commerce courses

Each small block represents a 15-point course. However, some courses may be 30 points or more.

Diploma in Health – example structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

If you are interested in learning or developing further skills in languages and would like to develop cultural competencies in these areas, a Diploma in Languages could be for you.

This language pathway is a great option to study languages alongside your other degree programmes, as you can study up to two languages at the same time and graduate with an additional qualification.

Subjects		
Ancient Greek	Latin	
Chinese	Russian	
French	Spanish	
German	Te Reo Māori	
Japanese		

Highlights

- Gain extensive knowledge in languages of your choice which will increase your employability in many occupations and areas of work.
- Complete 120 points of courses in total in language courses, as well as nonlanguage courses such as in culture or history.
- Complete the Diploma part-time within 6 years or full-time alongside your other degree.
- This Diploma is a great pathway to the Bachelor of Arts.

Diploma in Science

A Diploma in Science (DipSc) is a great option to learn a variety of scientific skills in a single year.

This Diploma allows you to study interesting science courses, upskill in new areas, and gain professional development in your career.

Study information

Complete the following course:

Courses	
SCIE101	Science, Society and Me

Plus choose up to 105 points of courses from the following subjects:

Subjects	
Accounting	Geology
Antarctic Studies	Health Sciences
Audiology	Linguistics
Astronomy	Mathematics
Biochemistry	Philosophy
Computer Science	Physics
Data Science	Product Design
Economics	Psychology
Engineering	Science, Māori and Indigenous Knowledge
Environmental Science	Speech and Language Sciences
Finance	Soil Science
Financial Engineering	Statistics
Geography	Water Science and Management

Diploma in Science – example diploma structure

Each small block represents a 15-point course. However, some courses may be 30 points or more.

Highlights

- Study a wide range of Science subjects, from beginner's to advanced level.
- This Diploma can be studied full-time in 1 year, or part-time for up to 6 years.
- Can be used as a pathway to the Bachelor of Science with the ability to transfer your completed courses to that degree.

Graduate Certificate in Health

subject to CUAP and TEC approval

The Graduate Certificate in Health provides foundational knowledge in a short timeframe—ideal for professionals seeking targeted expertise. It's a great option if you're looking to break into the health sector, even if you're not currently employed in the industry, by helping you develop relevant skills and competencies for employment. Additionally, this certificate can serve as a stepping stone to postgraduate study and research.

By learning to engage in professional, ethical, and reflective health practices, you can begin to address challenges and solve problems in diverse health contexts.

Highlights

Graduate Certificate in Health Sciences – example structure

Year 1

Each small block represents a 15-point course. However, some courses may be 30 points or more.

- Understand core health concepts, principles and policy with the ability to apply these in various health-related contexts..
- Demonstrate a commitment to culturally safe practice, particularly with Māori and Pacific communities, respecting cultural perspectives and values..
- Demonstrate skills in digital communication and health information technologies to reach and engage diverse communities..

Graduate Diploma in Health

subject to CUAP and TEC approval

The Graduate Diploma in Health offers an opportunity to deepen your understanding of key health topics. It is ideal if you're considering a career shift into the health sector, planning to pursue postgraduate study, or are an international student who does not yet meet the entry criteria for postgraduate programmes.

By completing this diploma, you'll demonstrate a comprehensive understanding of health systems, theories, and practices, and be equipped to contribute to improved health outcomes across diverse settings. You'll also develop skills in equity, diversity, and inclusion; build bicultural confidence and competence; and be prepared to apply these capabilities in health-related workplaces and organisations..

Highlights

- study 200 and 300-level courses from the Bachelor of Health
- · understand key determinants of health and health disparities that shape Māori and Pacific health outcomes ..
- learn health promotion, health education, and communication skills ..
- many areas to focus on, like nutrition, psychology, wellbeing and physical activity, mental health and addictions, epidemiology, and health policy
- prepare for a range of careers and other • roles within the health sector, both in Aotearoa and internationally.

Accounting

"Accounting opens the door to several career paths, whether it be as a small town Accountant or a top executive."

Sara

Bachelor of Commerce with Honours in Accounting and Information Studies

Accountants assess and report on the performance of organisations, and inform decisions about pricing, costs, systems and processes, investments, organisational strategy, and management. They also check if relevant rules and laws have been followed and ensure that the information is reliable and up-to-date.

At UC, you will learn about accounting, auditing, tax rules and practices, and the role accountants play in many contexts including public, private, environmental, and political.

What will my study involve?

- Learn about important issues such as business ethics and corporate social responsibility, data analytics, cryptocurrencies, and the increasing challenges of globalisation.
- By taking specific courses, you can qualify for provisional membership with professional bodies such as Chartered Accountants of Australia and New Zealand (CA ANZ), CPA Australia, and the Association of Chartered Certified Accountants (ACCA), or other international organisations, which means you can become a certified, chartered accountant.
- You can minor in Accounting in a large number of bachelor's degrees to add accounting and financial knowledge to your studies.

Courses

You will take introductory courses in cashflow and profit reporting; accounting for managers; and taxation, followed by advanced study in business, government performance, cost management, and accounting theory and practice.

Topics can include:

- financial accounting and reporting
- management accounting
- auditing and assurance
- legal responsibilities of businesses.

courseinfo.canterbury.ac.nz

Career opportunities

This subject provides a solid foundation for a successful professional career in areas such as consulting, taxation, auditing, organisational control and management, investments, and financial management.

Career pathways could include:

- chartered accountant
- auditing and assurance
- chief executive officer
- forensic accounting.

canterbury.ac.nz/life/jobs-and-careers

Study Accounting:

• Bachelor of Commerce

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Commerce
- Diploma in Commerce

Aerospace Engineering

Aerospace Engineering involves the design, development, testing, and production of aircraft, spacecraft, and related systems and equipment.

UC offers the only undergraduate Aerospace degree in Aotearoa, giving you early entry into the industry or towards advanced research.

Aerospace Engineering is a minor in the Bachelor of Engineering with Honours in Mechanical Engineering and can be selected in year three of the degree.

What will my study involve?

- Practical courses, such as aerospace design, aerodynamics, and propulsion.
- Final-year projects sponsored by and in collaboration with industry, such as Rocket Lab, Air New Zealand, Kea Aerospace, and Dawn Aerospace.
- Join the growing aerospace industry in Aotearoa, with Ōtautahi Christchurch and UC as a central hub for research and innovation.
- Take part in the UC Aerospace club and build your own rockets on campus.

Courses

You will begin courses towards Aerospace Engineering from the third year of your Mechanical Engineering degree, which includes aircraft design and production.

Topics can include:

- propulsion
- aircraft structures
- flight mechanics
- computational fluid dynamics.
- courseinfo.canterbury.ac.nz

Career opportunities

Having a skillset in Aerospace Engineering will make you a great fit for a path in aviation, or you could go beyond our atmosphere and join the growing space industry.

Career pathways could include:

- rocketry design
- Unmanned Aerial Vehicles (UAV) design
- avionics engineering
- defence forces.

canterbury.ac.nz/life/jobs-and-careers

Study Aerospace Engineering:

• Bachelor of Engineering with Honours in Mechanical Engineering

Ancient Greek

Studying Ancient Greek at UC will involve more than just the language; you will delve into Greek literature, history, politics, architecture, and philosophy.

Through your studies, you will be able to draw upon the past to better understand what is going on in the world right now as many modern concepts like democracy, theatre, and psychology originated in Greece.

What will my study involve?

- In-depth learning of ancient Greek culture through various topics in the original language.
- Get hands-on with our James Logie Memorial Collection of ancient artefacts in the Teece Museum of Classical Antiquities.
- UC hosts guest speakers from all over the world at public lectures and events.
- Study at Te Matatiki Toi Ora | Arts Centre campus.

Courses

Your first year involves learning beginner's Ancient Greek. Later you will read major texts of Greek epic poetry, drama, philosophy and more, under the guidance of research-active and internationally regarded staff.

If you know some Ancient Greek already, then you may enter straight into secondyear courses.

Topics can include:

- grammar and vocabulary
- life and culture
- literature
- research projects.

courseinfo.canterbury.ac.nz

Career opportunities

Through learning the language and analysing ancient Greek culture, you will gain skills like research, analysis, attention to detail, critical thinking, and communication.

Career pathways could include:

- museums and libraries
- teaching and academia
- art and language conservation
- publishing.

canterbury.ac.nz/life/jobs-and-careers

Study Ancient Greek:

- Certificate in Languages
- Diploma in Languages

Animation

Animation combines art with movement, creating cinematic scenes and dynamic, believable worlds full of life and motion.

Studies at UC will help you develop your own personal animation style. You will also learn concepts, tools, and techniques needed to see the animation process from creation to post-production.

What will my study involve?

- Use traditional hand drawn and modern computer graphic techniques to create multi-dimensional characters and worlds.
- Work in computer and stop motion studio.
- Create your own portfolio of animation work.

Courses

Animation courses begin with foundational skills using industry-standard software like Maya. You will get to work on practical projects like creating animations during gaming development as well as in postproduction editing for the digital screen.

Topics can include:

- realistic expressions
- character development and design
- performance capture rigging
- cinema and video game project work.

courseinfo.canterbury.ac.nz

Career opportunities

Your experiences working on animation and visual effects for video games and other digital media will help prepare you for work in the fast-paced entertainment industry, as well as in roles in marketing, web design, and other areas needing animation expertise.

Career pathways could include:

- animation
- visual effects (VFX)
- game art
- graphic design.

canterbury.ac.nz/life/jobs-and-careers

Study Animation:

- Bachelor of Digital Screen with Honours
- As a Minor:
- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Antarctic Studies

"Experience and understand the great frozen continent."

Wills

Bachelor of Science in Physics, Postgraduate Certificate in Antarctic Studies

Antarctica is the highest, coldest, and most isolated continent, so vast that it affects climate and ocean currents. Explore its history, biodiversity, and role in the global climate crisis.

What will my study involve?

- A wide range of topics like arctic climate, marine ecology, biodiversity, hazards and disaster management.
- Learn how life microbes, plants, animals, and humans — thrives in these extreme conditions.
- Gateway Antarctica, UC's on-campus research centre, plays a role in international research, engineering in extreme environments, and connections between Antarctica, Aotearoa, and global nations. Learn from the experts.

Courses

Courses in this programme will introduce you to various aspects of Antarctica, from its extreme climate to the history of Antarctic exploration and beyond:

Topics can include:

- weather and climate change
- southern ocean exploration
- biodiversity and ecosystem
- social and political issues.

Include Antarctic Studies courses in any bachelor's degree at UC to examine critical, contemporary issues around climate change and politics.

courseinfo.canterbury.ac.nz

Career opportunities

By learning about the Antarctic region, you will understand the impact Antarctica has on the world. You will be able to contribute to lots of areas like research, education, conservation and sustainability, engineering, and tourism.

Career pathways could include:

- Antarctic science (eg, glaciology, atmospherics, oceanography)
- engineering and technical support
- policy and law
- science communications and education.

canterbury.ac.nz/life/jobs-and-careers

Study Antarctic Studies:

Cannot be studied as a major or minor, but you can take these courses as part of any degree.

Anthropology

"The vastness of the field of Anthropology makes it very easy to find something you love."

Alex

Bachelor of Arts with Honours in Anthropology, Postgraduate Diploma in Health Sciences, Master of Heath Sciences with an endorsement in Health Information Systems

If you are interested in the history of our existence, languages and cultures, identity, and religion, then Anthropology is for you.

At UC, you will learn about our collective history, and explore future issues like the evolving role of technology in our lives, power structures and systemic issues, and where our global culture might be heading.

What will my study involve?

- Study topics that challenge your current way of thinking, and get you thinking deeply about the topic.
- Get hands-on experience with real ancient artefacts through UC's Teece Museum of Classical Antiquities, based at Te Matatiki Toi Ora | Arts Centre of Christchurch, with a collection spanning more than 2,500 years from about 2,000 BCE.
- Get involved on campus through clubs and advocacy.
- Combine your interests with other studies by adding Anthropology to many UC bachelor's degrees.

Courses

First-year courses will introduce you to various aspects of culture, and how it evolves over time due to political, economic, colonial, and social changes. Topics can include:

- human origins and world history
- religion, witchcraft, and other rituals
- historical and contemporary racism
- family structures.
- courseinfo.canterbury.ac.nz

Career opportunities

You can tailor your studies in Anthropology to suit your job or career interests. The skills you learn through your studies like rational thinking, critical analysis, ethnography, cross-cultural communication, writing, and research can be used in other fields.

- Career pathways could include:
- government and policy
- international relations and foreign affairs
- media and public relations
- social research.

canterbury.ac.nz/life/jobs-and-careers

Study Anthropology:

Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Diploma in Arts

Art History and Theory

"Art History goes beyond studying a narrow band of visual culture – you get to explore topics like philosophy and aesthetics, history of science, advertising, and more."

Bojana

Bachelor of Arts in Anthropology and Art History and Theory, Bachelor of Arts with Honours in Art History, Master of Arts in Art History

This subject traces history and culture using artefacts, architecture, photos, and more. Learn to find meaning through objects and see how these affect our experiences.

What will my study involve?

- Learn in the main and city centre campuses.
- Get hands-on with our James Logie Memorial Collection of ancient artefacts in the Teece Museum of Classical Antiquities in the city, and Aotearoa New Zealand's cultural collections at Te Puna Rakahau o Macmillan Brown | Macmillan Brown Library on campus.
- Internship courses where you can gain practical skills and build connections.
- Combine Art History and Theory studies with other subject interests like Classics, Anthropology, and languages.

Courses

In your first year, you will cover topics in modern art by examining mediums like painting, photography, and film. You will also be introduced to architecture and objects in art history, and complete practical work with real artefacts.

Topics can include:

- Japanese art
- Indigenous art
- art in Europe
- visual culture like print, photography, and film.

courseinfo.canterbury.ac.nz

Career opportunities

Throughout your studies, you will practice skills like critical analysis, attention to detail, perspective, cultural awareness, and research.

By examining artworks, you will gain 'visual' literacy, a skill that is applicable to many areas and careers.

Career pathways could include:

- museum and gallery curatorship
- heritage conservation
- publishing
- library science.

canterbury.ac.nz/life/jobs-and-careers

Study Art History and Theory:

• Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Diploma in Arts

Astronomy

"I would like to work as an astronomy researcher overseas in various observatories, in places such as America, Chile, Hawai'i, and Europe."

Rosemary PhD in Astronomy

Astronomy is the study of matter and radiation throughout all time and space.

Astronomers use the latest technological advancements to do this, making this field one of the most rapidly expanding of all physical sciences.

What will my study involve?

- Some of the topics you will study include planets, the evolution of stars, black holes, the structure and evolution of galaxies, and dark matter and dark energy.
- You will get the opportunity to observe at Ōtehīwai — University of Canterbury Mount John Observatory — the best optical astronomical research centre in Aotearoa.
- We are the only university in Aotearoa to teach Astronomy at all levels of study.

Courses

Good grades in physics and calculus are required for entry into this subject. However, we offer introductory courses for those who don't have a strong background from secondary school.

Our first-year courses give you a foundation in astronomy, physics, and maths. You will also learn programming basics throughout your study. Topics can include:

- how the universe works from planets to the universe as a whole
- astrophysics and dark matter
- electromagnetism and mechanics
- cosmology and theories of the universe.

courseinfo.canterbury.ac.nz

Career opportunities

If you are considering studying Astronomy and Astrophysics, you probably have a natural curiosity about how things work. An Astronomy degree could lead you towards being a part of the many exciting and unexpected discoveries we have yet to make about our universe.

Through your studies, you will learn skills like computer modelling, data analysis, problem-solving, computer programming, and communication, which also opens up pathways beyond astronomy.

Career pathways could include:

- astronomer and other scientific fields (physicist, meteorologist, geophysicist)
- technical writer
- data analysis and information technology
- science communication, teaching, and media.

canterbury.ac.nz/life/jobs-and-careers

Study Astronomy:

Bachelor of Science

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Science
- Diploma in Science

Biochemistry

"UC has one of the best Schools of Biology in the country and combined with the location and my degree choice, it just made sense."

Caleb Bachelor of Science in Biochemistry

Biochemistry is the study of life at the cellular level, giving us insight into the history of all living species — animals, plants, bacteria, and viruses — and how they function.

Biochemistry knowledge can be applied in broad and diverse ways, such as genetic engineering, conservation and restoration, biomedical science, and disease treatment.

What will my study involve?

- Practical exercises and labs.
- There is exciting research happening at UC and you can learn from many of our experts through Te Pokapū Taunekeneke Rāpoi Ngota | Biomolecular Interaction Centre, with connections to other universities, industry, and international collaborators.
- You can also minor in Biochemistry within many different bachelor's degrees to give your other studies a biological focus.

Courses

Good grades in chemistry from secondary school are required for entry into this subject. However, we offer introductory chemistry courses for those who don't have a strong background.

Biochemistry courses introduce you to areas like cellular biology, ecology, and chemistry. Topics can include:

- molecular biology
- protein science and chemistry
- biochemistry pathology (eg, cancer, heart disease)
- metabolism.

courseinfo.canterbury.ac.nz

Career opportunities

Biochemistry is an ever-evolving area of study and you will be prepared for many opportunities like research, working in the industry, international opportunities, or further specialisation.

Your contribution to the field can help address challenges and advance many areas of life.

Career pathways could include:

- nutrition
- medical diagnostics and drug testing
- agriculture
- biotechnology design.

canterbury.ac.nz/life/jobs-and-careers

Study Biochemistry:

• Bachelor of Science

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Science
- Diploma in Science

Bioinformatics

Bioinformatics collects, stores, and analyses biological data for disease diagnosis, cellular evolution and mutation, medicine development, and many other applications.

Studying bioinformatics will give you practical experience in real industry research outcomes.

What will my study involve?

- Study breakthrough science in genetics and learn how data is used to improve lives.
- Use computer and molecular genetics labs on campus, which includes the Canterbury Sequencing Facility and the Ancient DNA Laboratory.
- UC has research centres that specialise in bioinformatics, with experts making breakthroughs in breast cancer detection and stroke risk research.

Courses

Courses begin with the basics of cellular biology, evolution, ecology, and conservation biology, before going onto advanced programming and modelling of large-scale data.

Topics can include:

- genome sequencing
- evolution
- data analysis and programming
- ethics and legal use of biological data.

courseinfo.canterbury.ac.nz

Career opportunities

A Bioinformatics degree gives you an understanding of genomics and molecular biology, combined with professional, interdisciplinary skills in statistics, computer programming, and applying data to research outcomes.

This skillset will prepare you for many roles processing large amounts of data for medical needs, or even in developing new technologies in the field.

Career pathways could include:

- drug and medicine development
- clinical health testing
- forensics
- conservation.

canterbury.ac.nz/life/jobs-and-careers

Study Bioinformatics:

• Bachelor of Data Science

Biological Sciences

"If you look around you, there's a lot of exciting and innovative research that being carried out all the time at UC."

Roseanna

Bachelor of Science in Biological Sciences and Geology, Bachelor of Science with Honours in Ecology

Biology is the study of living things, from animals to plants to microbes. The scale varies from molecules and cells to organisms, populations, and ecosystems.

We need to know how the living world interacts with the environment to better understand and prepare for the future.

What will my study involve?

- Lab work to examine cell biology, biodiversity, microorganisms, zoology, and more.
- We have the most extensive network of field stations of any university in Aotearoa. You get to explore Te Waipounamu South Island to enhance your practical field skills.
- You can focus your interests as you progress in your studies.
- Our Biological Sciences major has been accredited by the Royal Society of Biology (RSB), the first in Aotearoa to be internationally recognised in this way. This means that when you graduate you will be equipped with well-rounded knowledge and skills, making you highly employable.

Courses

First-year courses introduce you to the foundations of cell structure, evolution, and statistics.

Topics can include:

- marine biology
- protein science
- biochemistry behind diseases like cancer
- ecology and conservation.

courseinfo.canterbury.ac.nz

Career opportunities

A Biological Sciences major indicates you have the ability to access, understand, analyse, and communicate complex information. You can develop further technical knowledge in areas that interest you like biosecurity, marine biology, evolutionary ecology, soil restoration, zoology, and biotechnology.

Career pathways could include:

- forensics
- primary industries
- ecology
- pharmaceutical and governmental industries.

canterbury.ac.nz/life/jobs-and-careers

Study Biological Sciences:

- Bachelor of Science
- As a Minor:
- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Science
- Diploma in Science

Biomedical Engineering

Biomedical Engineering involves designing and creating medical and healthcare technology.

This is a priority industry, as there is a growing need for engineering solutions that restore function and aid in diagnosis, monitoring, rehabilitation, and delivery of care.

Biomedical Engineering is a minor in the Bachelor of Engineering with Honours in Mechanical Engineering and can be selected in year three of the degree.

What will my study involve?

- Study design, repair, maintenance, and implementation of new medical technologies.
- Practical courses using lab equipment, from human performance monitors to performance capture software.
- Internship and research project opportunities at hospitals and clinics both locally and overseas.
- Check out clubs like UC BIOMED to engage in biomedical design projects, field trips, and events.

Courses

Biomedical Engineering courses begin in the second year of your Mechanical Engineering degree. You will get to work on designing and testing new medical equipment such as prosthetics, implants, monitors, scanners, and assistive technologies.

Topics can include:

- biomechanics and usability
- prototyping and testing
- bioethics and medical compliance
- intellectual property and patents.

courseinfo.canterbury.ac.nz

Career opportunities

With your practical skills and experiences working on a variety of medical devices, you will be able to help with global health challenges, for example our increasingly aging population, healthcare in the developing world, and a rise in illnesses from sedentary lifestyles. Career pathways could include:

- healthcare services
- product design and manufacturing of medical devices
- Quality Assurance (QA) testing and medical regulatory compliance
- medical equipment maintenance.

canterbury.ac.nz/life/jobs-and-careers

Study Biomedical Engineering:

• Bachelor of Engineering with Honours in Mechanical Engineering

Bioprocess Engineering

Bioprocess Engineering uses biology to create sustainable and effective manufacturing processes, and for the design of products like foods, vaccines, and cleaning products.

This is the perfect option if you have an interest in biochemistry, microbiology, or molecular biology, and want to add a biological focus to your engineering degree.

What will my study involve?

- Practical lab work learning how bacteria and algae can be used for the creation of new products and the treatment of waste.
- Applied learning with individual and group design and research projects.
- Access to bioprocessing technology experts.

Courses

This minor is available alongside the Bachelor of Engineering with Honours in Chemical and Process Engineering and will introduce you to biology, bioprocessing, and biotechnology. Your Bioprocess Engineering courses begin in the second year.

Courses can include:

- metabolism and metabolic engineering
- genetic engineering
- bioseparation processes
- environmental and community impacts.

courseinfo.canterbury.ac.nz

Career opportunities

There is an increasing demand for engineers who can apply biological science knowledge to industrial processes.

Career pathways could include:

- pharmaceuticals
- biofuels
- biological waste treatment
- biodegradable materials.

canterbury.ac.nz/life/jobs-and-careers

Study Bioprocess Engineering:

• Bachelor of Engineering with Honours in Chemical and Process Engineering

Business Analytics

Business Analytics brings in data from areas such as accounting, marketing, and economics to help make better business decisions, improve customer services, and implement growth strategies using tools like machine learning.

What will my study involve?

- Use data to recognise and plan future developments, and identify new business opportunities.
- Include Business Analytics as a minor in a wide range of degrees for a datainformed career.

Courses

First-year courses will introduce you to collecting and reading data. Later courses will allow you to focus on a particular area such as finance, business economics, and information systems.

Topics can include:

- managing large sets of data
- information software and new technologies
- marketing and recognising customer trends
- ethics of gathering data.

courseinfo.canterbury.ac.nz

Career opportunities

Having the skills to analyse and interpret data will make you an important part of growing businesses and keeping our world more informed. Data scientists are in demand as it is an area that faces significant skills shortages globally. Career pathways could include:

- business analyst
- marketer
- strategic consultant
- data scientist.

canterbury.ac.nz/life/jobs-and-careers

Study Business Analytics:

• Bachelor of Data Science

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Business and Sustainability

"The lecturers have a huge level of experience and knowledge and really go the extra mile."

Rosa

Bachelor of Commerce in Human Resource Management with a minor in Business and Sustainability, Bachelor of Arts in English and Psychology

Sustainability is an important issue and more people are holding businesses accountable with their impact on the environment and climate change. The link between business and sustainability involves improving processes from manufacture to end user, so that we are minimising waste and impact, and rethinking business strategies to take care of the world we live in. This includes looking after communities, individuals, and the planet.

What will my study involve?

- Learn business approaches to environmental and social challenges through interactive lessons and case studies.
- Explore corporate performance from ethical, global, and multicultural perspectives.
- Customise your degree by including this minor in a wide range of bachelor's degrees.

Courses

Business and Sustainability includes courses from a variety of subjects to build your management and problem-solving skills, and explore the current obstacles faced by industry.

Topics can include:

- environmental economics
- sustainable tourism
- new sustainable technologies
- corporate social responsibility.

courseinfo.canterbury.ac.nz

Career opportunities

By studying this subject, you will be able to look at business processes from many angles with the goal of saving the environment, building sustainable relationships with stakeholders, and costcutting while helping businesses grow.

Career pathways could include:

- operations and supply chain management
- business management
- entrepreneurship
- advisory and consulting.

canterbury.ac.nz/life/jobs-and-careers

Study Business and Sustainability:

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health Science
- Bachelor of Product Designs
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Chemical and Process Engineering

"I learned a lot about how process engineering is involved in the field of combating pollution and renewable energies, and decided I wanted to be involved."

Ben

Bachelor of Engineering with Honours in Chemical and Process Engineering with a minor in Energy Processing Technologies, Master of Engineering in Chemical and Process Engineering

Chemical and Process Engineering is about turning raw materials into marketable products in order to tackle issues facing the world today — from supplying clean drinking water and creating a sustainable food supply, through to improving society's health and wellbeing, and producing pharmaceuticals.

What will my study involve?

- Learn physical, chemical, and biological processes in the lab, plus how to use them on a commercial scale.
- Hands-on learning through simulation software, lab experiments, workshop training, and industrial visits.
- Complete individual and group projects.
- Opportunity to add a minor in Bioprocess Engineering, Environmental Process Engineering, or Sustainable Energy Engineering.

Courses

First-year courses will introduce you to chemical principles and processes, engineering maths, and physics. Your Chemical and Process Engineering courses begin in the second year.

Topics can include:

- renewable energy and technologies
- biology for engineers
- fluid mechanics
- chemistry for engineers.

courseinfo.canterbury.ac.nz

Career opportunities

You will develop technical knowledge about the processing of chemicals and other materials, plus transferable skills. You can work in organisations that make products or process materials, ranging from aluminium to waste.

Career pathways could include:

- renewable and sustainable energy
- food production
- pharmaceuticals
- recycling and waste treatment.

canterbury.ac.nz/life/jobs-and-careers

Study Chemical and Process Engineering:

Bachelor of Engineering with Honours

Chemical Formulation Design

Chemical Formulation Design combines product innovation with design, science, engineering, and business skills.

This subject focuses on formulated products like pharmaceutical, agrochemical, personal care, and rongoā (Māori medicine). You will analyse materials, focus on sustainable production, and test processes like quality and safety.

What will my study involve?

- Apply your learning through team projects and entrepreneurship courses, and use dedicated product innovation spaces.
- Think about ways to incorporate tangata whenua in the product design process.
- Create prototypes and learn how to pitch your product.

Courses

In your first year, you will take introductory courses in chemical principles and processes, and learn the science behind formulating products.

Topics can include:

- principles of formulated product design
- natural products and properties
- packaging design
- consumer behaviour and marketing strategies.

courseinfo.canterbury.ac.nz

Career opportunities

This subject will help you understand the complete chemical product design process — from idea generation to commercialisation. Other skills you will gain include prototyping, methods of analysis, regulatory requirements, commercial production, testing, and economics.

As a result of this degree, you will be ready to work in the industry or start your own business.

Career pathways could include:

- formulation scientist
- quality manager
- marketing and sales manager
- entrepreneur.

canterbury.ac.nz/life/jobs-and-careers

Study Chemical Formulation Design:

• Bachelor of Product Design

Chemistry

"Chemistry is cross-linked with both biology and physics, so you get a great taste for all three sciences in the one major."

Olivia

Bachelor of Science in Chemistry, Postgraduate Certificate in Business

Chemistry deals with the composition, structure, and behaviour of atoms and molecules that make up all forms of matter.

Understanding the world at an atomic level helps us see how things are interconnected and work together.

What will my study involve?

- Apply your learning in the lab and research projects in diverse areas of chemistry — physical, biological, environmental, theoretical, and more.
- Study Chemistry as a minor within many bachelor's degree options to add a scientific background to your other subjects.

Courses

Good grades in chemistry are required for entry into this subject. However, we offer introductory chemistry courses for those who don't have a strong background from secondary school.

The first year is broad and you will be able to take lots of introductory science courses and labs to get you started. As you progress, you will get to explore and experiment with different branches of advanced chemistry, such as electrochemistry (energy), thermodynamics (heat and radiation), and photochemistry (light).

Topics can include:

- laboratory skills
- organic and inorganic chemistry
- nanotechnology
- medicinal chemistry.

courseinfo.canterbury.ac.nz

Career opportunities

There are new and exciting discoveries happening every day in the field of chemistry, and your studies will prepare you to address global challenges like energy, food supply, health, and environmental change.

Career pathways could include:

- toxicology and forensics
- product development
- pharmaceuticals
- food science.

canterbury.ac.nz/life/jobs-and-careers

Study Chemistry:

• Bachelor of Science

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership
- Other pathways:
- Certificate in Science
- Diploma in Science

Chinese

"UC's focus on shaping its graduates to be more bicultural and globally aware was a big drawcard for me."

Sam

Bachelor of Commerce in International Business, Bachelor of Arts in Chinese and Political Science and International Relations

China is one of the world's oldest civilisations, with Mandarin Chinese spoken by more than half the world's population.

Studying Chinese gives you access to this economic power, with huge international influence and ever-growing relations with Aotearoa.

What will my study involve?

- Learn modern standard Chinese.
- Experience Chinese society, including literature, cinema, technology, and modern culture.
- UC's Confucius Institute, in collaboration with Huazhong University of Science and Technology, has opportunities to practise Chinese language and experience the culture on campus.
- Exchange opportunities with China, including business tours and language immersion with Chinese universities.

Courses

No previous knowledge of the Chinese language is required to study this subject at UC. Besides spoken and written Chinese language, other courses explore Chinese history, society, and achievements that have influenced the world.

If you know some Chinese already, then you may be given direct entry into second-year Chinese courses. Topics can include:

- traditional and contemporary culture
- cinema
- global politics and international relations
- economy and trade.

courseinfo.canterbury.ac.nz

Career opportunities

Learning Chinese will open up work both in Aotearoa and overseas, including exchange opportunities while you are studying. There are lots of ways to strengthen your crosscultural communication and awareness at UC.

Career pathways could include:

- interpreting and translation
- tourism and travel agencies
- business and trade relations
- immigration.

canterbury.ac.nz/life/jobs-and-careers

Study Chinese:

• Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Certificate in Languages
- Diploma in Arts
- Diploma in Languages

Cinematic Arts

Aotearoa has been put on the map with our internationally renowned expertise in visual effects and film technologies, filming locations, and the calibre of our writers and directors.

At UC, Cinematic Arts study focuses on the modern film production process, from script to screen, post-production to distribution. At the same time, you will explore exciting new tools for storytelling, like virtual production, which is supported by the same technology that is used to produce video games.

What will my study involve?

- Learn to create cinematic projects using industry-standard filming technologies.
- Choose from practical hands-on courses in cinematography, editing, or sound design.
- Graduate with a portfolio of your own cinema projects produced from your second year.
- Practical learning at editing labs and sound recording studios.

Courses

Your courses will introduce you to the practical skills of creating film/television shows, including the process of how to storyboard and stage scenes, what to do on set, direction and cinematography, and editing.

Topics can include:

- production
- visual and practical effects
- story progression and continuity editing
- greenscreen to virtual screen production and new filming technologies.

courseinfo.canterbury.ac.nz

Career opportunities

Knowing the full creative and technical process of creating cinema, from concept to release, will make you a great asset to have on film sets, advertising agencies, streaming services, and other project collaborations, or even in launching your own works.

Career pathways could include:

- film and television directing and producing
- post-production
- videography and cinematography
- technician.
- canterbury.ac.nz/life/jobs-and-careers

Study Cinematic Arts:

- Bachelor of Digital Screen with Honours **As a Minor:**
- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Cinema Studies

"An Arts degree teaches you lifelong transferable skills that make you dynamic enough for ANY career."

Jessica

Bachelor of Arts in History and Cinema Studies

Film is a unique medium, in that there are so many ways to tell stories. The cultural impact and influence of cinema over the years has been huge.

This subject will introduce you to the tools and techniques used in film creation. In your classes, you will analyse the structure, cinematic style, and storytelling of films from diverse genres through the lens of theory, history, and culture.

What will my study involve?

- From the silent era of film to modern day explore the evolution of movies and filmmaking.
- Other topics include analysis of scenes, screenwriting, exploration of Māori identity, storytelling for children, and the French New Wave.

• You can minor in Cinema Studies in many UC bachelor's degrees.

Courses

Besides film theory and history, in your first year you will analyse 12 films from 12 countries in 12 weeks as part of our 'Backpacker's Guide to World Cinema' course. In later years, you will explore particular cultural adaptations, genres, and styles of interest.

Topics can include:

- Māori film and media
- film history
- novels and film adaptations
- documentaries as a medium.

courseinfo.canterbury.ac.nz

Career opportunities

You will learn the art of critical analysis for themes, theories, and technical aspects of filmmaking. Film is a broad medium, so there are many opportunities from writing and production to business and marketing in the industry.

Career pathways could include:

- filmmaking
- film reviewing
- marketing and public relations
- event management.

canterbury.ac.nz/life/jobs-and-careers

Study Cinema Studies:

• Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Diploma in Arts

Civil Engineering

"Many of the skills you learn through a Civil Engineering degree at UC can be used to solve a range of problems — I think that's pretty valuable going forward into the workforce or further study."

Will

Bachelor of Engineering with Honours in Civil Engineering

Civil Engineering is all about the infrastructure you see around you — buildings, roads, water supply, and transport, to name a few.

You will learn how to strengthen the design of structures to withstand 21st century challenges such as sustainability and climate change, as well as natural disasters like earthquakes and floods.

What will my study involve?

- Learn practical skills through projects, fieldwork, lab courses, and collaborative competitions like bridge building.
- Use bespoke design software and engineering platforms.
- Work experience as well as a research project.
- Minor in either Structural Engineering or Water and Environmental Systems Engineering.

Courses

In addition to compulsory introductory courses, you will be studying engineering structures and chemical processes in your first year.

Topics can include:

- transportation systems
- structural engineering
- geotechnical engineering
- resilient and sustainable design.

courseinfo.canterbury.ac.nz

Career opportunities

You will learn skills in practical design, analysis, and presenting your solutions. Throughout your studies, you will work in teams, and learn to solve problems and manage projects.

There are a variety of roles in the civil engineering field that you can work in such as wood, fire, water, and geotechnical engineering.

Career pathways could include:

- consulting or contracting
- local, regional, and central government
- project management
- iwi development.

canterbury.ac.nz/life/jobs-and-careers

Study Civil Engineering:

• Bachelor of Engineering with Honours

Classics

"I became more and more intrigued about what the ancient world could teach us in the 21st century."

Natalie

Bachelor of Arts in Classics with a minor in English, Bachelor of Arts with Honours in Classics

Studying the ancient cultures of Greece and Rome shows us how our modern world formed. Everything from western politics to philosophy, science to architecture, language to storytelling had their origins in these great civilisations, and there are even connections we can make to current events today that have been experienced in the past.

At UC, you can customise your Classics studies with topics that interest you, such as art and architecture, politics, drama and written works, ancient language, and even sociology and daily life of the people.

What will my study involve?

- You will get hands-on experience with real ancient artefacts through UC's Teece Museum of Classical Antiquities, based at Te Matatiki Toi Ora | Arts Centre, with a collection spanning more than 2,500 years from about 2,000 BCE.
- Courses include areas such as history, slavery, sex and gender, warfare, art and architecture, political leaders, ancient literature, and philosophy.
- Option in your final year to take an internship, with past projects including museum and art curatorship work, events management, social media, and research of artefacts.

Courses

All our first year courses are designed to introduce a variety of aspects of the ancient world.

Topics can include:

- Greek and Roman mythologies
- Greek and Roman history
- beginner's Greek and Latin
- social and political systems.
- courseinfo.canterbury.ac.nz

Career opportunities

Seeing the entire history of the Ancient Greek and Roman civilisations teaches you a lot about how to analyse events to understand other cultures and viewpoints, and how society and politics develop and work, especially towards world relations and current affairs.

Career pathways could include:

- museum curatorship
- political relations, foreign affairs, policy
- conservation and archaeology
- communications.

canterbury.ac.nz/life/jobs-and-careers

Study Classics:

• Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Diploma in Arts

Communication Strategy and Practice

"I love being able to explore and learn more about the fast-growing platform that media is."

Fiorella Bachelor of Communication in Communication Strategy and Practice

Communication is an essential part of any organisation and like any other process requires a strategic plan. This involves knowing who your audience is, what you want to say, how you want to say it, and continuing to maintain and develop relationships.

Through your study you will learn how to plan and manage campaigns using a mix of theory, technology, and case studies.

What will my study involve?

- Learn how to produce content for social media, websites, brochures, apps, and other platforms.
- Gain skills in crisis communications and reputation management.
- Participate in real-world projects in your final year through an internship or industry campaign.
- Take optional courses to complement your studies like advertising, entrepreneurship, linguistics, and politics.

Courses

First-year courses are introductory and will help you develop a broad skillset in media content production, planning, and research. From your second year onwards, you will be able to focus on strategic communications, managing media campaigns, and public response.

Topics can include:

- campaign development
- consumer behaviour and psychology
- market analysis
- communication for social change.

courseinfo.canterbury.ac.nz

Career opportunities

Through this major, you will learn how to balance strategic thinking, the needs of your stakeholders, and being creative. Your experience using various media platforms will make you adaptable to different communications needs and new media technologies.

Career pathways could include:

- stakeholder engagement
- public relations
- marketing and advertising
- writing, editing, publishing.

canterbury.ac.nz/life/jobs-and-careers

Study Communication Strategy and Practice:

• Bachelor of Communication

Communications and Network Engineering

Communications and Network Engineering is about planning, designing, and building computer networks, and the sharing of data between communication devices such as internet and mobile.

You will gain specific knowledge of how the internet and telecommunications systems work, how to create and maintain networking connections, and how to create new smart devices.

What will my study involve?

- Learn about internet design, networking applications, and new telecommunication technologies.
- Practical project work in simulated network environments.
- Final-year project, often sponsored by industry, so you can gain experience optimising communications infrastructure around Aotearoa, with many networking providers based in Ōtautahi Christchurch.

Courses

Get an introduction to computers and networks before learning more advanced details of telecommunications engineering, from cellular towers to apps to satellites.

Topics can include:

- mobile, wireless, and ethernet/LAN networks
- communication engineering and network performance
- signal processing for communications
- internet of things.
- courseinfo.canterbury.ac.nz

Career opportunities

Computer network expertise is highly valued in technological industry. There is an increasing need for online communications globally which means there are a lot of career opportunities in this field, with new roles being created constantly.

Career pathways could include:

- communication and networking equipment development
- smart devices design
- networking infrastructure planning
- mobile and cellular engineering.
- canterbury.ac.nz/life/jobs-and-careers

Study Communications and Network Engineering:

• Bachelor of Engineering with Honours in Computer Engineering

Community Music

Community musicians bring communities together through music for the purpose of health and wellbeing, social justice, and community cohesion.

A minor in community music will give you the musical skills and personal attributes needed to lead music-making in social and workplace settings.

What will my study involve?

- Create positive change in your local communities by encouraging participation in making music.
- Learn how music expresses and transmits cultural memory and cultural identity, including in indigenous cultures.
- Develop attributes like communication, patience, empathy, listening, and risktaking that you can use in various settings.
- Complete an internship hosted by the Christchurch Symphony Orchestra and in partnership with other Christchurch organisations.

Courses

Topics can include:

- The role of music as an expression of a community's culture
- Using music to promote health and wellbeing and/or social justice
- Music in a Te Ao Māori context
- Internship in the local community

Career opportunities

Learn to facilitate and lead community music activities. Community musicians work in a range of contexts including education and healthcare in order to address community needs and promote positive social outcomes. The skills are also useful for anyone working with groups of people such as teaching, social work, group facilitation, and event management.

canterbury.ac.nz/life/jobs-and-careers

Study Community Music:

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

• Diploma in Arts

Composition

Composition is the creation of new music. Enjoy learning from a diverse range of musical styles, from contemporary music to pop and everything in between.

You could compose pieces for orchestras, create film or video game soundtracks, write lyrics, arrange electronic soundscape compositions, or produce your next EDM hit.

What will my study involve?

- Study a broad range of courses with opportunities to engage with music technologies, notated composition, song writing, recording techniques, computer music, and collaborative projects.
- Create your own music in genres and musical cultures of your choice.
- Opportunity to take part in performances and collaborative projects.

Courses

Courses in this major will introduce you to a range of music composition skills and techniques including creating lyrics and melodies, and approaches to structure.

Topics can include:

- current trends in composition
- techniques of songwriting
- orchestration and arranging
- composition studio.

courseinfo.canterbury.ac.nz

Career opportunities

Composition studies will give you significant hands-on experience writing music for instruments, voice, computers, and working with performers and improvisors.

Career pathways could include:

- sound design
- film composition
- song writing
- recording.

canterbury.ac.nz/life/jobs-and-careers

Study Composition:

• Bachelor of Music

Computational Linguistics

Computational Linguistics combines linguistics, engineering, and science to evolve the way we use machines. It involves learning how to program computers to analyse, synthesise, and understand spoken or written language.

Your studies will give you skills in computer modelling, speech processing, and machine learning allowing you to digitise language and evolve our interactions with machines.

What will my study involve?

- Explore computer science and AI programming, alongside language structure and theory, and human psychology.
- Learn from experts from a range of UC research centres.
- Practical learning using computer and software labs, human-computer interaction spaces, and equipment.

Courses

Your first-year courses will introduce you to concepts in data science, programming, linguistics, and how computers and humans "talk" to each other. You will learn to find structures and meaning encoded in language. Topics can include:

- artificial intelligence
- text processing
- digital media
- chatbots and robot assistants.

courseinfo.canterbury.ac.nz

Career opportunities

The applications of computational linguistics are vast — from voice recognition tools, live translation devices, search engines, and many other technologies where humans and machines interact.

Career pathways could include:

- technology research and development
- data analysis
- software programming
- Artificial Intelligence engineering.

canterbury.ac.nz/life/jobs-and-careers

Study Computational Linguistics:

• Bachelor of Data Science

Computer Engineering

"If you want to be someone that contributes to the innovation of technology in the future, UC Engineering is a good platform for you to develop all the necessary skills."

Sasha

Bachelor of Engineering with Honours in Computer Engineering, Master of Science in Computer Science

Computer Engineering combines circuit theory and digital electronics with programming, systems, networking, and machine learning, with an emphasis on solving problems using digital hardware and embedded software.

Studying this subject will give you the technical knowledge to create smart embedded electronic devices, such as portable electronics, biomedical devices, and high-performance super computers.

What will my study involve?

- Learn how to design, build, and test embedded computer systems.
- A final year research project, often sponsored by industry.
- Add a minor in Communications and Network Engineering if you are interested in telecommunications systems.

Courses

First-year engineering courses are broad and meant to introduce you to the fundamentals including maths, programming, and physics.

Topics can include:

- electrical and computer engineering design
- digital electronics and devices
- embedded systems and software engineering
- human-computer interaction.
- courseinfo.canterbury.ac.nz

Career opportunities

Ōtautahi Christchurch has a rapidly growing ICT industry that is always looking for UC Computer Engineering graduates. Through your studies, you will gain skills like problem-solving, creative thinking, research and analysis, testing quality and functionality, programming, and communication.

Career pathways could include:

- computer engineer
- systems engineer
- network analyst
- software engineer.

canterbury.ac.nz/life/jobs-and-careers

Study Computer Engineering:

• Bachelor of Engineering with Honours

Computer Science

"The fact that the Computer Science department has you developing software in teams for a real-world client from day one is great for the skills and experience you gain."

Joey Bachelor of Science with Honours in Computer Science

Computer Science is not only about programming or coding, but has many aspects such as human-computer interaction (including virtual and augmented reality), artificial intelligence, cybersecurity, data science, cloud computing, and computer graphics.

The potential of this field to solve problems and make improvements in our lives is limitless. Computer Science is present in everyday life — in Google searches, driving your car, disease detection, or surveying drones to name a few.

What will my study involve?

- An opportunity to study Computer Science alongside other subjects that you are interested in like Psychology, Economics, and Product Design.
- Work experience opportunities through internships.
- Computer Science is a flexible subject that you can major or minor in within many degree options.

Courses

First-year courses introduce you to topics such as programming, mathematics, and digital systems. Further study will go indepth with courses that interest you. Topics can include:

- Artificial Intelligence and machine learning
- operating and embedded systems
- cloud computing and data science
- computer networks and cybersecurity.

courseinfo.canterbury.ac.nz

Career opportunities

The skills you will gain from your studies include technical knowledge in computer science, problem-solving, logical thinking, creativity, teamwork, and communication.

These skills will lead into many industries like agriculture, health, finance, and education. You will be able to work anywhere in Aotearoa or overseas.

Career pathways could include:

- software, web, mobile, and game development
- IT consulting
- cybersecurity
- telecommunications.

canterbury.ac.nz/life/jobs-and-careers

Study Computer Science:

• Bachelor of Science

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Commerce
- Certificate in Science
- Diploma in Commerce
- Diploma in Science

Creative Industries and Contemporary Practice

This specialisation is for those who want to be a part of the creative industry by combining artistic and business skills.

Study at least two areas of the creative arts of your choice (music and audio, film and media, art, and creative writing) through applied learning and theory.

What will my study involve?

- Study key industry skills like management, marketing, and communication.
- Choose your courses based on the creative industries you want to work in.
- Create practical projects and choose between a final-year internship or podcasting experience.

Courses

We will give you a range of experiences to develop industry knowledge. Each year you will choose courses from different creative pathways. Topics can include:

- visual content design
- producing music
- social media marketing
- screenwriting.

courseinfo.canterbury.ac.nz

Career opportunities

This degree can lead to a range of careers in the arts industry, such as producing, writing, management, and communications.

Career pathways could include:

- campaign and event management
- editing and publishing
- marketing art
- media production.

canterbury.ac.nz/life/jobs-and-careers

Study Creative Industries and Contemporary Practice:

• Bachelor of Arts

Creative Music Technology

UC's Creative Music Technology major is all about creating music using a variety of digital and studio-based music technologies.

Study acoustics, studio technologies, the latest trends and techniques in digital music making, and learn how to apply these in a creative context.

What will my study involve?

- Study any style or genre of music: whether you are an aspiring composer of electronic music, a beatmaker, a sound designer, a foley artist, a producer, or interested in digital music making.
- Use UC's on-campus recording studio with the latest software and audio devices.
- Work alongside other students on creating or recording music, radio, and podcasts.
- Complete an internship or collaborative project in the industry in your final year.

Courses

This major is open to any level of music, whether you already have some experience or you are brand new to music technologies and production.

Topics can include:

- studio and field recording
- composing digital music
- editing and mixing software
- sound sampling.

courseinfo.canterbury.ac.nz

Career opportunities

By learning how technology is constantly changing and impacting the way music is created, you will be ready for a career in today's industry.

Career pathways could include:

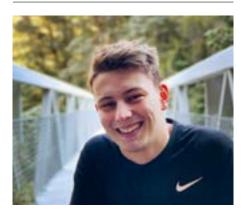

- music production for games and studio productions
- sound design
- sound artist
- creative coding.

canterbury.ac.nz/life/jobs-and-careers

Study Creative Music Technology:

• Bachelor of Music

Criminal Justice

"My degrees have put me in the best possible place to positively impact this system."

Charlie Bachelor of Criminal Justice, Master of Criminal Justice

Criminal Justice involves understanding the law and psychology behind crime, its causes, and the treatment of convicted offenders.

UC is the only university in Aotearoa that offers you a degree in criminal justice with innovative practical teaching. UC also shares close links with the police and justice sector.

What will my study involve?

- Learn about the justice system including social and human services, and psychology.
- Examine current policies and identify opportunities for criminal justice reform.
- Take optional courses in topics such as forensic science, linguistics, and financial crime.

Courses

First-year criminal justice courses teach you about legal and social issues in Aotearoa, and introduce you to psychology and the neuroscience of why people commit crimes. In the later years of the degree, you will be able to critically examine our legal systems and the current effectiveness in preventing and prosecuting crimes.

Topics can include:

- youth justice
- Te Tiriti o Waitangi
- violence in society
- history of gangs in Aotearoa.

courseinfo.canterbury.ac.nz

Career opportunities

You will be able to look at criminal justice through a wide lens, giving you a strong foundation in understanding how Criminal Justice in society works in Aotearoa and internationally. You will also gain research skills in your area of interest in policing and the justice system.

Career pathways could include:

- government including prisons, probation, and parole
- forensics
- criminal justice policy and reform
- public and private investigation.

canterbury.ac.nz/life/jobs-and-careers

Study Criminal Justice:

- Bachelor of Criminal Justice
- Certificate in Criminal Justice

Cultural Heritage

If you are interested in galleries, libraries, archives, and museums, then this specialisation is for you. Explore culture through objects, ranging from contemporary art to archaeological remains to the built environment.

You will be able to look critically at our cultural heritage in Aotearoa, and apply these skills to international contexts.

What will my study involve?

- Study a range of cultures across the globe through different time periods.
- Courses can include areas such as history, art, warfare, language, and religion.
- Benefit from connections with local museums, art galleries, heritage archives, and libraries around Ōtautahi Christchurch, including internships.
- Practical experience with artefacts dated from 2,000 BCE with the Teece Museum of Classical Antiquities, located at Te Matatiki Toi Ora | Arts Centre.

Courses

Each year you will select courses depending on your interests in a particular culture, historical period, and society. In the final year, you will choose between practical heritage courses and an internship focused on your chosen areas. Topics can include:

- revolution and change
- Māori history
- architecture
- shaping culture through art.

courseinfo.canterbury.ac.nz

Career opportunities

A degree examining cultural heritage teaches you how history and culture has shaped everything we create. It prepares you for working with cultural and educational institutions, heritage conservation, or any sector which requires a high degree of multicultural competency.

Career pathways could include:

- iwi engagement and development
- curatorship
- communications
- art history.

canterbury.ac.nz/life/jobs-and-careers

Study Creative Industries and Contemporary Practice:

• Bachelor of Arts

Cultural Studies

"I love the fact that this unique Cultural Studies programme allows study into so many areas of the humanities."

Polly Bachelor of Arts in Cultural Studies and English

In Cultural Studies, you will analyse film, social media, graphic novels, art, fashion, sport, and everyday activities with the aim of understanding how complex our culture is and how it shapes our identity. This subject, like culture, is highly flexible; you can construct your own degree and choose to dive into what interests you the most.

What will my study involve?

- Create your own pathway of study, which might emphasise popular culture and media, gender and sexuality, humananimal studies, or culture in Aotearoa.
- Combine wide-ranging topics like cinema studies, digital humanities and online cultures, sociology, and Māori and Indigenous studies.
- Explore a range of theories, worldviews, and cultural texts and debates.
- Adding a minor in Cultural Studies with another degree will expand your perspective on culture and identity in your other studies.

Courses

Courses from many subjects are shared with Cultural Studies, including Anthropology, Chinese, Cinema Studies, Digital Humanities, English, History, Human Services, Māori and Indigenous Studies, Media and Communication, Music, and Sociology.

Topics can include:

- political and cultural activism
- sexuality and gender identity
- media and film
- colonisation and indigenous cultures.

courseinfo.canterbury.ac.nz

Career opportunities

From the careful consideration of different aspects of culture, you will be able to develop a broad skillset including critical thinking, analysis, communication, writing, and research.

Your study can be applied to a variety of fields making it easy for you to move in the job market.

Career pathways could include:

- arts management
- journalism, editing, and publishing
- public relations and advocacy
- campaign management.

canterbury.ac.nz/life/jobs-and-careers

Study Cultural Studies:

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

Certificate in ArtsDiploma in Arts

Data Science

"The demand for data scientists is extremely high as the data in our world continues growing."

Sy Master of Applied Data Science

Data Science is an emerging field that combines Computer Science, Mathematics, and Statistics with other disciplines. You will learn to understand and analyse data, and communicate your findings for the best possible decision-making.

What will my study involve?

- Investigate the many sources and applications of data in healthcare, business, transport, and economics.
- Get hands-on in the field in connection with UC's various research centres.
- Project work in your final year where you will be applying data science in the workplace.

Courses

You will study foundational courses in data science, computer programming, and computer science, plus examine how our society interact with data systems.

Topics can include:

- data models and database systems
- data wrangling and applications
- big data and data mining
- data security and ethics.

courseinfo.canterbury.ac.nz

Career opportunities

With such a wide range of industry applications, Data Science is one of the most essential and employable skills of the 21st century.

Career pathways could include:

- data scientist
- business and technology analyst
- data visualisation consultant
- insights consultant.

canterbury.ac.nz/life/jobs-and-careers

Study Data Science:

• Bachelor of Data Science

Digital Humanities

Digital Humanities explores our digital technologies and their effect on our new ways of thinking, living, and working.

UC is the only university in Aotearoa where you can study this subject and learn to apply digital tools and methods.

What will my study involve?

- Learn about new technologies such as web analytics, social media platforms, digital music, robotics, virtual reality.
- Complete practical projects, training, and internships with Te Pokapū Aronui ā-Matihiko | UC Arts Digital Lab.
- Minor within several bachelor's degrees so you can apply digital tools to your other study interests.

Courses

These courses train you to create and apply digital solutions for industry, and explore how our reliance on technology has changed our collective culture. Topics can include:

- social media trends
- human-robot interactions
- geographic information systems
- online communities.

courseinfo.canterbury.ac.nz

Career opportunities

This study will make you highly adaptable to learning, training, and advising on new digital trends. Any industry from creative media, cultural heritage, business, policy, and more will benefit from your technical and analytical skills.

Career pathways could include:

- business technology consultancy
- social media marketing
- web data analysis
- digital content creation.

canterbury.ac.nz/life/jobs-and-careers

Study Digital Humanities:

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Diploma in Arts

Digital Product Design

Digital Product Design focuses on the design and development of digital products with a user-centred approach.

This major will develop your skills in computer programming, 2D and 3D user interface design, graphic design, and user design principles and evaluation methodology to ensure you build optimal digital solutions, starting with the people first.

What will my study involve?

- Learn the entire product design process with a focus on interactive digital products, from research and ideation, prototyping and UX/UI design, through to testing, validation, and customer feedback.
- Create interactive digital products such as mobile and computer applications, websites and web applications, and emerging technologies such as virtual and augmented reality.
- Complete projects with industry during study to gain real-world experience creating digital solutions.

Courses

Your first year in the major will teach you the basics of programming and computer science, as well as the core process and principles of digital product design.

After the introductory year, you will look into developing more complex digital products while exploring in-depth topics, such as human-centred design methods, graphic design, user-interface design, and data-driven design evaluations.

Topics can include:

- qualitative and quantitative user research methods
- product marketing
- web, mobile, and immersive technologies
- design aesthetics, usability, and accessibility.

canterbury.ac.nz/courses

Career opportunities

This major will prepare you to work alongside engineers, programmers, designers, and marketers to create viable, commercial digital products.

You will be able to find work in any company that produces digital products, as well as design or web-based organisations.

Career pathways could include:

- digital product design
- UX/UI design
- software development
- consultancy.

canterbury.ac.nz/life/jobs-and-careers

Study Digital Product Design:

As a Major:

• Bachelor of Product Design

Early Childhood Teaching

A child's early years have a significant impact on their lifelong development. As an early childhood teacher, you will provide experiences that lay the foundations for later learning.

What will my study involve?

- Gain skills supporting child development and growing their love for learning.
- Placements in early childhood settings to experience teaching young children.
- Bicultural focus interweaving Māori and Western knowledge and Māori teaching practices, including a noho marae experience and Te Reo Māori me onā tikanga courses.

Courses

Our Early Childhood qualifications have three components:

Professional Studies and Education

Discover the aim and purpose of teaching and learning, child development, assessment, the Aotearoa New Zealand education system, socio-political and cultural contexts, communication skills, information skills, and contemporary issues.

There is a specialised infant/toddlers course in each programme of study, and a strong emphasis on how Te Tiriti o Waitangi is foundational to education in early childhood.

Professional Practice

Learn practical teaching skills and spend time working alongside an experienced early childhood teacher and visiting lecturer. In your qualification, you will be able to experience a variety of early childhood settings.

In the first year of the Ako: Bachelor of Teaching and Learning, placements will be spread over ten days in Semester 1, and four weeks in Semester 2.

In the Graduate Diploma in Teaching and Learning (Early Childhood), there are two blocks of placements (one block of seven weeks in Semester 1, and one block of eight weeks in Semester 2).

Curriculum Studies

Find out about Te Whāriki, the Early Childhood Curriculum, and learn about teaching theory, and how to teach effectively within an integrated bicultural curriculum.

courseinfo.canterbury.ac.nz

Career opportunities

Working in early childhood offers you a challenging, interactive, and rewarding career caring for infants, toddlers, and young children in their important early stages.

From your placements throughout the degree, you will have teaching skills and experiences from a variety of education settings that could also apply to any area working with children and whānau.

Career pathways could include:

- · early childhood teaching
- teacher's aide
- advocacy
- government.

canterbury.ac.nz/life/jobs-and-careers

Study Early Childhood Teacher Education:

- Ako: Bachelor of Teaching and Learning
- Graduate Diploma in Teaching and Learning (Early Childhood)

Economics

"Economics is applicable to almost every area of employment."

Madi

Bachelor of Commerce in Economics, Bachelor of Arts in Political Science and International Relations

Economics is the study of how people behave and make decisions — how we use our resources, how we deal with issues like climate change, which career we choose, and more. These decisions involve trade-offs between costs and benefits, and we are constantly considering these in our everyday life.

At UC, there are lots of opportunities to gain experience including industry projects, internships, clubs, and overseas study trips.

What will my study involve?

- Learn about the impact of your choices on the world, and how foreign countries impact Aotearoa New Zealand's economy.
- Economics major and minor is available in many degrees so you can combine studies with other relevant areas such as Finance, Product Design, Political Science and International Relations, and Psychology.

Courses

First-year courses are introductory and teach you the basics of micro and macroeconomics. More advanced courses expand into areas such as market and organisational behaviour, and public policy.

- Topics can include:
- international trade
- consumer and business behaviour
- developmental economics
- environmental economics.

courseinfo.canterbury.ac.nz

Career opportunities

By analysing the impact of choices by government, consumers, and businesses, you will learn important skills like critical thinking, understanding risk, and forecasting to help make better decisions.

Career pathways could include:

- professional economist
- market research
- data analyst
- banking and investment.

canterbury.ac.nz/life/jobs-and-careers

Study Economics:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Science

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Certificate in Commerce
- Certificate in Science
- Diploma in Arts
- Diploma in Commerce
- Diploma in Science

Ecosystem Health and Biosecurity

This subject will help you understand the extent of our impact on the natural world and why it is so important to protect our native species and habitats.

What will my study involve?

- Learn about current threats to biosecurity and how these impact our own wellbeing by choosing your focus on areas such as marine biology, forestry, freshwater, and evolution.
- Study biodiversity and learn practical skills through UC research centres and field stations.
- Take part in work placements and projects working alongside community organisations.
- Studying this major as part of the Bachelor of Environmental Science with Honours is the only degree of its kind in Aotearoa, and is accredited by the Environment Institute of Australia and New Zealand (EIANZ) to deliver environmental practitioners for roles in industry, government, education, research, and the community.

Courses

First-year courses will introduce you to ecology, environmental science, chemistry, and statistics.

From your second year, you will focus on ecosystems and biosecurity, with a wide range of optional courses so you can specialise.

Topics can include:

- biodiversity and biosecurity
- data gathering and analysis
- fieldwork and field trips
- elective courses like microbiology, conservation, soil fertility, and invasive species.

courseinfo.canterbury.ac.nz

Career opportunities

Through your studies, you will be able to learn how to identify invasive species and other disturbances, analyse data, and consider the wider stakeholders involved. You will also learn broader skills like research, conservation, designing experiments, communication, problem-solving, and writing.

Career pathways could include:

- biosecurity
- regional council
- policy and advisory
- ecological restoration.

canterbury.ac.nz/life/jobs-and-careers

Study Ecosystem Health and Biosecurity:

Bachelor of Environmental Science
 with Honours

Education

"I love Education as it has really broadened my perspective on the world and how I fit in and contribute to it."

Allie

Bachelor of Arts in Education, Psychology, and Spanish

Learning is something we do every day. It happens in more places than the classroom like community settings, the workplace, art, sport, and even gaming.

Studying Education will give you the knowledge to understand how human development and learning are shaped by the history and context of Aotearoa New Zealand, and the opportunities and challenges we face in designing inclusive and effective educational experiences for everyone.

What will my study involve?

- Study topics like child and adolescent development, and social and cultural studies in education.
- Education can be studied as a major or a minor and combined with many different degrees, so you are able to study Education alongside your other subject interests.

Courses

The first-year courses will give you the foundations of educational, learning, and human development theories, concepts, and processes.

The following years offer a range of optional courses so you can customise your study to focus on educational and developmental psychology, policy, or social justice.

Topics can include:

- educational philosophy and policy in Aotearoa
- diversity in education culture, sexuality, gender, ability
- promoting social and emotional learning and wellbeing within and through education
- globalisation, social justice, and the future of education.

courseinfo.canterbury.ac.nz

Career opportunities

Due to Education being a multidisciplinary field of study, it can lead to a range of career opportunities in and out of a classroom.

Career pathways could include:

- curriculum/programme designer
- community support officer
- education advisor
- educational psychologist.

canterbury.ac.nz/life/jobs-and-careers

Study Education:

• Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Diploma in Arts

Electrical and Electronic Engineering

"It's fun to get a chance to think more broadly rather than only learn purely technical information."

Laura

Bachelor of Engineering with Honours in Electrical and Electronic Engineering with a minor in Power Engineering

This branch of engineering is about using electricity for the benefit of the world — from providing power for homes and industry, to creating the physical parts that transfer information on computers and smart devices.

While similar to both Computer Engineering and Mechatronics Engineering, Electrical and Electronic Engineering has a stronger focus on making things happen in the physical world.

What will my study involve?

- Combining theory and practice by building and testing systems like solar cars, electric vehicles, and robots.
- Field trips to electricity infrastructure like power stations.
- A final year research project, often sponsored by industry.
- You can add a minor in Power Engineering with courses on electric power and renewable energy.

Courses

First-year courses are the foundations of engineering including maths, physics, and programming. From your second year onwards, you will be able to study electrical systems and electronics, including building and testing devices.

Topics can include:

- circuits and signals
- electric and magnetic waves
- robotics
- renewable electricity design.

courseinfo.canterbury.ac.nz

Career opportunities

By studying Electrical and Electronic Engineering, you will be able to think of the end user and use your knowledge and skills to come up with practical and efficient solutions to problems.

The field is broad and there are many exciting projects you can contribute to like clean water, communication networks, transportation, search and rescue, and medical devices.

Career pathways could include:

- electronics design
- embedded systems
- consultant
- research and development.

canterbury.ac.nz/life/jobs-and-careers

Study Electrical and Electronic Engineering:

• Bachelor of Engineering with Honours

English

Studying literature opens up worlds and times beyond our experience, helping us understand and reflect on our own history, society, and identity. It builds core skills for study, career, and daily life.

What will my study involve?

- Learn how to analyse texts, write clearly and creatively, debate and critique effectively, and how literature adapts to cultural and historical influences.
- Chance to create your own fictional or non-fictional works, from poetry to novels to essays in a variety of different courses.
- Alongside courses on the novel, theatre, and 20th century literature, we also offer courses in fields such as children's literature, human-animal studies, and popular fiction (including science fiction, horror, and fantasy).

Courses

You will get to choose from a range of topics each year of your degree, starting with the basics of academic and/or creative writing techniques, analysing themes and genres, and exploring some of the greatest literature works throughout history.

Topics can include:

- science fiction, crime thriller, and other genres
- creative writing screen, stage, novels, and more
- film adaptions
- exploring culture, identity, and sexuality through literature.

courseinfo.canterbury.ac.nz

Career opportunities

Reading, analysing, and critiquing skills are useful in a huge range of occupations, including journalism, law, communications, publications, and even digital spaces. University studies may open the way towards creating your own works and becoming a published author.

Career pathways could include:

- digital media and communications
- reporting
- publishing and editing
- advertising and content writing.
- canterbury.ac.nz/life/jobs-and-careers

Study English:

• Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Diploma in Arts

Environmental Change

Explore how our earth works, evolves, and adapts to human activity and extreme climate change. Become a part of the solution to the biggest issues we have ever faced by studying Environmental Change.

What will my study involve?

- Learn about how different earth systems react and repair from ongoing environmental issues, from eroding landscapes to extinct species to extreme weather events.
- Gain applied skills in observation and data analysis and computer modelling through field stations and work experience.
- Learn to merge mātauranga Māori and scientific knowledge to broaden your understanding and approach to environmental issues.
- The Bachelor of Environmental Science with Honours is accredited by the Environment Institute of Australia and New Zealand (EIANZ) to deliver environmental practitioners for roles in industry, government, education, research, and the community.

Courses

Within the first year, you learn about how human activity can disrupt or completely change Earth's ecosystems, biodiversity, and atmosphere. As you continue, your coursework will include more complex data modelling, bioinformatics, and long-term global effects of climate change. Topics can include:

- Antarctica and global change
- coastal changes
- natural disasters
- biosecurity and contamination.

courseinfo.canterbury.ac.nz

Career opportunities

Your scientific knowledge will be especially important in roles where you can help inform society about the potential hazards and consequences that will arise from exploiting our natural resources.

Career pathways could include:

- natural scientist
- government officer
- urban and environmental planner
- resource manager.

canterbury.ac.nz/life/jobs-and-careers

Study Environmental Change:

• Bachelor of Environmental Science with Honours

Environmental Contamination

Environmental Contamination is the science of prevention and treatment of contaminants and invasive organisms in our ecosystems.

This major offers practical learning in identifying contaminants and their source, analysing their impact, and developing strategies to prevent further exposure.

What will my study involve?

- Investigate threats to our natural environment, such as toxic contamination in drinking water, pests destroying our local habitats, and agricultural disease.
- Field studies, lab work, and work experience, with a microscopy facility and microbiology lab on campus, and our field stations throughout Waitaha Canterbury.
- Learn to merge mātauranga Māori and scientific knowledge to broaden your understanding and approach to environmental issues.

 The Bachelor of Environmental Science with Honours is accredited by the Environment Institute of Australia and New Zealand (EIANZ) to deliver environmental practitioners for roles in industry, government, education, research, and the community.

Courses

You will be introduced to chemistry and biology before going onto more advanced courses like surface-earth science, including landforms, glaciers, atmosphere, and freshwater contaminants.

Topics can include:

- sample collecting and lab preparation
- microbiology and chemistry
- soil, water, and air quality assessment
- toxicology.

courseinfo.canterbury.ac.nz

Career opportunities

Contamination risk is always high with infrastructure, transportation, and natural resource use. Your specialist knowledge in microbiology and contamination will be essential to help combat ongoing damage to our natural world.

Career pathways could include:

- border security
- infrastructure planner
- agricultural manager
- work safety inspector.

canterbury.ac.nz/life/jobs-and-careers

Study Environmental Contamination:

• Bachelor of Environmental Science with Honours

Environmental Hazards and Disasters

Through this major, you will get the chance to analyse disasters like earthquakes, floods, and volcanic activity to reduce their risk and impact.

You will put into practise disaster management and response plans through extensive field studies around Te Waipounamu South Island.

What will my study involve?

- Examine the issues caused by sudden, extreme changes to the environment and communities.
- Through case studies, lab, field studies, and work experience, you will learn to analyse information relevant to an actual hazard or disaster situation.
- Use modern tools like geospatial analysis and GIS to map out disaster effects, forecast data, and create response plans.
- The Bachelor of Environmental Science with Honours is accredited by the Environment Institute of Australia and New Zealand (EIANZ) to deliver environmental practitioners for roles in industry, government, education, research, and the community.

Courses

First-year courses introduce you to the foundations of environmental science, statistics, and chemistry.

In your second year, you will examine earth science systems that lead to hazards and learn strategies to minimise them.

Topics can include:

- risk assessment and communication
- earth surface behaviour
- resilience strategies for highrisk communities
- sustainable and ethical development.
- courseinfo.canterbury.ac.nz

Career opportunities

Your studies will give you technical skills in data modelling and assessment, in addition to understanding the science behind disasters and hazards.

Career pathways could include:

- crisis and emergency response
- urban resilience planning
- geospatial mapping
- government and policy.

canterbury.ac.nz/life/jobs-and-careers

Study Environmental Hazards and Disasters:

• Bachelor of Environmental Science with Honours

Environmental Policy, Governance and Social Justice

To make just and sustainable decisions for the environment and our wellbeing, we must learn to see how politics, social behaviour, and business economics can both cause and improve issues. Demand for products and services can lead to problems such as pollution, slave labour and workers' rights, and Indigenous land disputes.

In this subject, you will examine global sustainability and social equity issues and learn how to respond with actionable change to communities and businesses.

What will my study involve?

- Connect your study to real-world problems through field studies and an internship.
- Build upon UC's sustainability goals and use our local and international connections with industry.
- Courses include a range of areas like political science and law, philosophy and ethics, economics, social enterprise, sociology, and psychology so you can follow your interests in particular issues.
- Engage with ideas of mātauranga Māori (knowledge), Pacific history, decolonisation, and tino rangatiratanga (authority).

Courses

All our first-year courses are designed to introduce you to a variety of sustainability and humanitarian concepts, including political science, philosophy, and health.

Topics can include:

- systems and social change
- environmental politics and policy
- Māori and Indigenous knowledge
- environmental science and natural resource management.

courseinfo.canterbury.ac.nz

Career opportunities

Learning about sustainability from a policy and social justice point of view teaches you how to critically analyse systems and enact social change that is inclusive of other cultures, communities, and businesses. Career pathways could include:

- policy and advisory
- non-profit sector
- marketing, communications, and events
- business operations management.

canterbury.ac.nz/life/jobs-and-careers

Study Environmental Policy, Governance and Social Justice:

• Bachelor of Social and Environmental Sustainability

Environmental Process Engineering

Environmental Process Engineering is ideal for environmentally-minded engineers who want to improve our planet by designing systems that treat water, air, and soil.

Learn about sustainable practices, environmental treatments, law and policies, and cultural issues surrounding environmental treatment technologies.

What will my study involve?

- Study how engineering processes and technology affect our climate so you can find innovative solutions to our world's environmental challenges.
- Gain communications and project management skills to work with industry, government, and local communities on future engineering projects.
- Applied learning with individual and group design and research projects.

Courses

Courses will add an environmental focus to your engineering studies, so you can analyse different forms of industrial pollution, chemical treatments, and other issues industries are facing. Your Environmental Process Engineering courses begin in the second year.

Topics can include:

- industrial water, air, and noise pollution control
- biodegradable products
- engineering ethics
- treatment processes.

courseinfo.canterbury.ac.nz

Career opportunities

A minor in Environmental Process Engineering will make you well suited to monitor and minimise the impact society has on natural resources and climate change. This expertise is highly sought after by engineering firms and local councils.

Career pathways could include:

- conservation
- sustainable engineering consultancy
- food production
- wastewater treatment.

canterbury.ac.nz/life/jobs-and-careers

Study Environmental Process Engineering:

• Bachelor of Engineering with Honours in Chemical and Process Engineering

Environmental Science

"The fieldwork is great, and helps to teach actionable skills, develop a deeper understanding of the topics, and see the issues in person."

Alice

Bachelor of Science in Environmental Science and Geography

Environmental Science is the study of the natural world, its ecosystems, and our interactions with it.

This knowledge is particularly important today as we focus more on biosecurity, sustainability, natural disasters, and global climate change.

What will my study involve?

- UC operates field stations at Cass and Kawatiri Westport where you will do fieldwork and research.
- The Bachelor of Environmental Science with Honours is the only degree of its kind in Aotearoa, and is accredited by the Environment Institute of Australia and New Zealand (EIANZ) to deliver environmental practitioners for roles in industry, government, education and research, and the community.

Courses

First-year courses are introductory and don't require any previous study. However, previous study in biology, mathematics, statistics, and chemistry will be useful.

Fieldwork and practical labs are a major part of your studies so you can work directly with environmental issues around Waitaha Canterbury.

Topics can include:

- natural resources management
- coastal cities
- global climate change
- agriculture and environmental issues.

courseinfo.canterbury.ac.nz

Career opportunities

Through your studies, you will gain a strong understanding of environmental science, developing sustainable solutions to environmental issues, and how to build resilient communities.

You will also develop skills in data analysis, environmental psychology, risk assessment, and case study analysis.

Career pathways could include:

- government agencies
- research institutes
- consultancies
- biotechnology.

canterbury.ac.nz/life/jobs-and-careers

Study Environmental Science:

- Bachelor of Environmental Science with Honours
- Bachelor of Science

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Science
- Diploma in Science

European and European Union Studies

"European Studies is very contemporary, so there is never a dull moment."

Charlotte

Bachelor of Arts in Chinese and Linguistics with a minor in European and European Union Studies, Master of European Union Studies

With 27 member states and 450 million people, the European Union (EU) is Aotearoa New Zealand's most significant bilateral partner after Australia and China and is one of the world's leading political and trading blocs. Europe provides an important reference point to Aotearoa and the global community in cultural, linguistic, and political aspects.

Your study will look into current events as well as history, language, and culture that have shaped Europe and the European Union.

What will my study involve?

- Choose from a broad range of topics including the political, economic, cultural, and social integration of modern-day and historical Europe.
- Get taught by members of the National Centre for Research on Europe (NCRE), Aotearoa New Zealand's only research centre devoted to study of Europe and the EU.
- Opportunity to complete an international or virtual exchange with UC's European partner universities.

Courses

Learn about the different regions that make up Europe and the EU, its cultural diversity, and the political landscape from its creation through to today. You will also be able to include study in a European language as part of the degree, choosing from German, French, Russian, or Spanish.

Topics can include:

- EU and global affairs
- film and literature
- East European communism
- politics.
- courseinfo.canterbury.ac.nz

Career opportunities

Studying European and European Union Studies will open up a wide range of careers in Aotearoa and abroad. Your skills and knowledge provide you with a unique perspective on Europe and the EU in various industries, from politics to education to humanities.

Career pathways could include:

- international trade consultancy
- foreign affairs
- communications
- policy analysis.
- canterbury.ac.nz/life/jobs-and-careers

Study European and European Union Studies:

Bachelor of Arts

Bachelor Bachelor

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
 Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Diploma in Arts

Exercise and Sport Nutrition*

* subject to CUAP and TEC approval

With an growing focus on lifestyle and holistic approaches to health, there is a demand for professionals who can offer evidence-based and customised advice on exercise and nutrition.

Nutrition education aligns well with interests in wellness, health promotion, and environmental sustainability. If you want to design effective interventions to promote health and wellness, then this subject could be for you.

What will my study involve?

- Meet the requirements for professional accreditation as an Associate Registered Nutritionist.
- Identify nutritional practices for athletes, recreational exercisers, and groups with specific nutritional needs.
- Learn the effects of nutritional supplements on anatomy and sporting performance.
- Learn about preventive health and how to design evidence-based exercise and nutrition interventions to promote health and wellness.

Courses

The Exercise and Sport Nutrition major will equip students with essential knowledge in metabolism, physiology, and chronic disease management, which are foundational to clinical exercise physiology. Topics can include:

- assessing body composition, fitness, and dietary habits
- evidence-based practice and research
- designing therapeutic exercise programs
- knowledge and skills in behaviour change techniques which supports long-term adherence to healthy habits.

canterbury.ac.nz/courseinfo

Career opportunities

There is both health sector and fitness industry need for expertise in exercise and sport nutrition as well as skills and knowledge of preventive health. Registered nutritionists and food policy experts are in high demand in hospitals, schools, research institutions, and food production sectors.

Graduates can complete postgraduate study to gain full registration as a Nutritionist.

Career pathways could include:

- person trainer
- sport nutritionists
- exercise physiologists
- food policy expert
- health coaches
- health improvement practitioners (HIPS) in primary care

canterbury.ac.nz/life/jobs-and-careers

Study Exercise and Sport Nutrition:

- Bachelor of Health Sciences
- As a Minor:
- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Health
- Diploma in Health

Finance

"I think that the lecturers were the standout feature for me at UC. They were always helpful, friendly, and willing to go out of their way for me."

Dylan Bachelor of Commerce in Finance

Finance looks into future planning for businesses, investors, and more. It shapes the health of every economy, and at UC you will gain the knowledge to make the right financial decisions.

What will my study involve?

- Examine three key areas: corporate finance, financial markets, and investments.
- Extra opportunities including case competitions, Chartered Financial Analysts (CFA) exams, and Professional Risk Manager (PRM) qualifications.
- Option for a final-year internship.

Courses

Your first year of studies will introduce you to the fundamentals of finance and build from there. Topics can include:

- investment and portfolio management
- financial theories and practice
- retirement and estate planning
- data modelling and forecasting.

courseinfo.canterbury.ac.nz

Career opportunities

Studying Finance will prepare you for a range of jobs in the financial and business sectors, as well as any roles that involve detailed knowledge of analysing data, risk planning and management, and accounting. Career pathways could include:

- financial advisor
- investment broker
- data analyst
- foreign exchange dealer.

canterbury.ac.nz/life/jobs-and-careers

Study Finance:

- Bachelor of Commerce
- Bachelor of Science

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Commerce
- Certificate in Science
- Diploma in Arts
- Diploma in Commerce
- Diploma in Science

Financial Engineering

"I knew I wanted to study some form of mathematics/statistics at university, and Financial Engineering allowed me to tie in some Computer Science, Finance, and Economics."

Nicholas

Bachelor of Science in Financial Engineering and Statistics, Bachelor of Science with Honours in Computational and Applied Mathematical Sciences Financial Engineering combines financial and economic theory with computational tools to design financial products, portfolios, markets, and regulations.

UC offers the only Financial Engineering programme in Aotearoa.

What will my study involve?

- Combine topics from economics, maths, statistics, and engineering.
- Create financial models, market simulations, and computer programs.

Courses

First-year courses will give you the foundations of Financial Engineering, with introductory maths, computer science, economics, and statistics.

Later courses go more in-depth on financial software, business skills, and calculating finances.

Topics can include:

- software development
- consumer behaviour
- financial markets
- probability modelling.

courseinfo.canterbury.ac.nz

Career opportunities

This major can lead to flexible career opportunities due to the technical skills you will learn during your studies, including problem-solving, programming, and communication. Financial Engineering can lead to careers in the global finance industry and other technical fields, such as information technologies (IT).

Career pathways could include:

- investment broker
- business analyst
- financial engineer
- risk manager.

canterbury.ac.nz/life/jobs-and-careers

Study Financial Engineering:

- Bachelor of Science
- Other pathways:
- Certificate in Science
- Diploma in Science

Forensic Psychology

Forensic Psychology intersects the study of psychology and law to examine why people develop criminal behaviour and how crime affects the wider community.

You will apply psychology practice and research to legal settings involving criminals, victims and witnesses, courtrooms and the jury, and the justice system itself.

What will my study involve?

- Develop your behavioural analysis and observation skills to recognise signs of deception, faulty testimony, distress, and other common issues in legal settings such as interrogations and witness interviews.
- Learn about the criminal justice system in Aotearoa and its process of rehabilitation and treatment of both convicts and victims.
- Examine the psychology behind ongoing crime across diverse communities.
- Do a real-world project from the community and industry in your final year of study.

Courses

After a broad first year covering the foundations of psychology practice and research, you will explore the psychology involved in various aspects of the criminal justice system, such as supporting victims, understanding why people offend and reoffend, and forensic science decision-making.

Topics can include:

- mental health and crime
- body language and non-verbal communication, or "reading people"
- causes behind criminal behaviour
- victim and witness care.
- courseinfo.canterbury.ac.nz

Career opportunities

This minor gives you practical experience and insight into the complex global research around criminal behaviour, rehabilitation, and reading body language.

These skills will suit careers working within government agencies or directly with people on improving the processes and effectiveness of the justice system. Career pathways could include:

- law enforcement interrogation
- counselling
- corrections, probations, prison, and police
- justice policy and reform.

canterbury.ac.nz/life/jobs-and-careers

Study Forensic Psychology

• Bachelor of Psychological Science

Forest Engineering

"There are lots of changes happening right now and there is a lot of scope to make a meaningful contribution to the industry."

Abby

Bachelor of Engineering with Honours in Forest Engineering

Forest Engineering takes the technical field of engineering to the outdoors, where you will help design, construct, and evaluate the operational systems that make the forest industry function.

UC is the only university in Australasia offering this programme.

What will my study involve?

- Internships, field trips, workshops, and industry events to gain practical work experience.
- Your studies follow advancements in the industry so you have the most current knowledge when you graduate.
- A focus on design and build of forestry roads, harvesting plans and equipment, integration of new technology, ethics, and environmentally sustainable practice.
- International exchange opportunities with the University of British Columbia in Canada, and Virginia Polytechnic Institute and State University in the USA.

Courses

After your first year in basic engineering skills, your Forest Engineering degree will focus on topics like geotechnical engineering, forest infrastructure management, harvest planning, and wood science.

Topics can include:

- forest management and economics
- advanced wood products processing
- advanced geotechnical engineering
- engineering in developing communities. courseinfo.canterbury.ac.nz

Career opportunities

Forestry is one of Aotearoa New Zealand's most important export industries. There are many different roles as a forest engineer with active, technical, and management opportunities.

Career pathways could include:

- harvest and roading operations
- forest engineering management
- forest consulting
- regional councils and government advisory.

canterbury.ac.nz/life/jobs-and-careers

Study Forest Engineering:

• Bachelor of Engineering with Honours

Forestry Science

"I love the balance between theoretical and hands-on practical work. Forestry science combines science with management, commerce, and technology."

Boris Bachelor of Forestry Science Forestry Science is all about learning how to sustainably manage forest resources, conservation, and in policy and planning.

UC is the only university in Australasia offering this programme with a focus on ethical and sustainable management of plantation and native forests.

What will my study involve?

- A wide combination of courses, covering the commercial forestry industry, and efforts in conservation and restoration of forests.
- Coursework in and out of the classroom with workshops, labs, and field trips to plantations and native forests.
- Options for exchange programmes with the University of British Columbia in Canada, and Virginia Polytechnic Institute and State University in the USA.

Courses

Courses in your first year of Forestry Science will cover the importance of and relationship we have with forests, and introduce you to the global forestry industry and its effects on our environment.

As you continue in the degree, you will focus on forest economics, forest engineering and harvesting, silviculture and management of forest plantations, geospatial science, wood science, and environmental forestry.

Topics can include:

- marketing and international trade
- tree breeding
- biosecurity risk management
- advanced wood products processing.

courseinfo.canterbury.ac.nz

Career opportunities

Forestry Science is a degree that is well supported by employers in Aotearoa because of the industry demand for foresters with sustainability, conservation, and commercial logistics experience.

Career pathways could include:

- forest management
- forest consulting
- forest policy and planning
- sustainable land management.

canterbury.ac.nz/life/jobs-and-careers

Study Forestry Science:

Bachelor of Forestry Science

French

French is one of the truly international languages and is useful in travel, culture, trade, science, and sport.

With 29 countries speaking French as an official language, studying at UC will be a great addition to your studies and will ensure you have the skills to work internationally.

What will my study involve?

- Become an expert in the French language, as well as the history and culture of French-speaking countries: France, Belgium, Monaco, Canada, Congo, Madagascar, and more across the globe.
- International and virtual exchange programmes with multiple universities, including IEP Aix and the Institute of Political Studies in Paris.
- French can be taken with a range of bachelor's degrees, as well as in a certificate or diploma in French with your other studies.

Courses

No prior knowledge is needed to study French at UC. First-year courses are introductory lessons in French, with further study moving on to intermediate and advanced-level French, and history and culture.

If you know some French already, then you may be given direct entry into second-year French courses.

Topics can include:

- French culture Europe, the Caribbean, Africa, the Pacific, Canada
- French literature and film
- World War history
- The French Revolution.
- courseinfo.canterbury.ac.nz

Career opportunities

French is spoken the world over, and your knowledge will help with cross-cultural relationship building and open you up to careers all over the world. Career pathways could include:

- international diplomacy
- trade and tourism
- public relations and journalism
- international business.

canterbury.ac.nz/life/jobs-and-careers

Study French:

• Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Certificate in Languages
- Diploma in Arts
- Diploma in Languages

Freshwater

Freshwater is one of our most precious resources, making up only 3% of water on the earth's surface.

Studying Freshwater at UC will involve theoretical and applied skills to understand and develop water treatment systems and infrastructure, and exploring the ethical and sustainable use of freshwater resources.

What will my study involve?

- Study the journey of freshwater as it travels from mountains to the sea, and other ecological systems along the way.
- Learn about our unique cultural history, legal policies, and relationship with bodies of water and freshwater resources in Aotearoa.
- Practical labs, fieldtrips, and work experience around Waitaha Canterbury — beaches, mountains, snow fields, forests, and wetlands.

• The Bachelor of Environmental Science with Honours is accredited by the Environment Institute of Australia and New Zealand (EIANZ) to deliver environmental practitioners for roles in industry, government, education, research, and the community.

Courses

Courses for the Freshwater major begin in your second year of studies, introducing you to hydrological science and aquatic life, and how we collect, process, and use freshwater. Topics can include:

- water quality assessments
- microorganisms
- freshwater restoration
- water resource conflicts.

courseinfo.canterbury.ac.nz

Career opportunities

Help ensure a sustainable future for this limited resource with a range of freshwater professions — whether it be water catchment, treatment, fisheries, or even disaster and contamination management.

Career pathways can include:

- environmental scientist
- field technician
- environmental planner
- resource management officer.

canterbury.ac.nz/life/jobs-and-careers

Study Freshwater:

• Bachelor of Environmental Science with Honours

Game Arts

A strong art style is at the core of what makes a video game compelling and stand out from other titles. Game Arts focuses on the things you see while playing video games — from believable environments through to relatable characters.

Game Arts studies includes learning conceptual art design for world-building and characters, as well as technical skills in designing environments, rendering cutscenes, digital sculpting, minority representation in games, and more.

What will my study involve?

- Learn to create dynamic worlds.
- Develop your skills in 2D and 3D art, using industry standard tools.
- Collaborate on projects from your second year designing games up to the working prototype stage.
- A dedicated space for your studies, including game development labs, and edit suites.

Courses

Game Arts courses begin with the theory behind good game design, such as how to build narrative and lore through scene staging, creating believable and dynamic world maps, and designing distinctive characters.

Topics can include:

- lighting and shading systems
- textures, meshes, bump mapping, and 3D sculpting
- character design
- user interface, menus, and interactive design.

courseinfo.canterbury.ac.nz

Career opportunities

Being able to design detailed, immersive settings and cinematic effects gives you a lot of career options in game development, as well as in film/television and other industries that are incorporating these game design techniques.

Career pathways could include:

- game art
- animation
- concept art
- multimedia programming.

canterbury.ac.nz/life/jobs-and-careers

Study Game Arts:

- Bachelor of Digital Screen with Honours As a Minor:
- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and
 Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Game Development

Gaming is an exciting and ever-growing industry where you can contribute in many ways, from building an immersive world with characters and obstacles, writing and storytelling, animation and sound, project management, testing, and marketing.

Through Game Development studies at UC, you will learn the tools and processes required to create modern digital games from scratch.

What will my study involve?

- Gain experience using industry standard game development tools, including Unity and Unreal.
- Develop your own games from your second year, taking concepts through to playable prototypes.
- Study in specially designed development labs, including AR/VR equipment, gaming PC and console lounge, and motion capture suites.

Courses

Game Development courses will teach you the fundamentals of game engines and programming, such as with Unity and Unreal. As you progress, you will learn how to develop more advanced builds, and how to balance gameplay features with story.

By the final year, you will experience all the stages of developing a game, from concept to playable demo.

Topics can include:

- playability and quality design
- programming artificial intelligence
- game balancing and difficulty progression
- virtual reality, augmented reality, and other new gaming technologies.

courseinfo.canterbury.ac.nz

Career opportunities

Through this subject you can prepare for a career in all areas of game programming, including gameplay, AI, audio, and graphics.

You will also learn how to create an entertaining, educational, and meaningful gaming experience.

Career pathways could include:

- game art
- game testing
- multimedia programming
- software engineering.

canterbury.ac.nz/life/jobs-and-careers

Study Game Development:

- Bachelor of Digital Screen with Honours As a Minor:
- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Geography

"It is a broad field that allowed me to combine my interests in the environment, technology, the outdoors, and the world around me."

George

Bachelor of Science in Geography with an endorsement in Environmental Science, Bachelor of Arts with Honours in Geography

Geography is the study of human behaviour, the environment we live in, and the relationship between both.

This field combines arts and sciences to find innovative solutions to our society's most pressing issues and debates, and the human response to these challenges, such as climate change, poverty, sustainability, health, and inequality.

What will my study involve?

- Explore different pathways in geography: physical geography, human geography, Geographic Information Systems (GIS), and resource and environmental management.
- Practical workshops, labs, and fieldtrips to examine geographical processes outside of the classroom – including urban mobility and planning.
- You will get the opportunity to undertake research with community partners that supports resilient environments and communities through research.

Courses

Introductory level courses are offered in your first year of Geography studies. Further study will offer a variety of courses to choose from and deepen your understanding of your specific interests.

Topics can include:

- climate change environmental and societal effects and responses
- physical processes from mountains to sea
- community and urban development
- geospatial science.

courseinfo.canterbury.ac.nz

Career opportunities

Geography is a distinctive field between science and arts that also has links to law, sociology, engineering, computer science, and health sciences. Due to this diversity, study in Geography will lead to a range of career opportunities.

Career pathways could include:

- climate or environmental consultant
- resource manager
- urban or transport planner
- geospatial scientist.

canterbury.ac.nz/life/jobs-and-careers

Study Geography:

- Bachelor of Arts
- Bachelor of Science

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Certificate in Science
- Diploma in Arts
- Diploma in Science

Geology

"UC is one of the top universities in New Zealand to study Geology due the accessibility of locations directly impacted by natural events and places that have a rich history."

Tessa Bachelor of Science in Geology, and Geography

Geology explores the earth building processes of our planet, so that we can best use natural resources, plan land developments and infrastructure, and monitor natural hazards such as volcanoes and earthquakes.

With over 500 million years of geological history, Aotearoa is a rich and unique place to study this earth science.

What will my study involve?

• Focus on climate change, natural disasters, and other earth systems affecting geological processes.

- Learn from our experts on earthquake research, with opportunities to take part in real disaster response and observation.
- Complete practical lab and fieldwork in various stations across Te Waipounamu South Island visiting real geological phenomena, such as earthquake faultlines and volcanoes.

Courses

First-year courses give an introduction to Geology, from examining rocks to mountain formations.

From your second year onwards, you will learn more advanced practical techniques in collecting data, lab analysis, field mapping, and observation in the outdoors.

Topics can include:

- earth surfaces and changing landscapes
- geographical hazards
- mineral study
- geological technology GIS, LiDAR, and more.

courseinfo.canterbury.ac.nz

Career opportunities

Study in Geology offers a wide range of work environments and employment opportunities across the globe, particularly in areas of science and engineering informing on old and new earth developments.

Career pathways can include:

- energy, mining, and petroleum industries
- government and geotechnical planning
- conservation
- research and exploration.

canterbury.ac.nz/life/jobs-and-careers

Study Geology:

Bachelor of Science

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Science
- Diploma in Science

German

"I want to create helpful things like MRI machines and artificial limbs. Europeans are leaders in that area, so I thought learning German would be a great way to open up opportunities."

Thomas

Bachelor of Engineering with Honours in Mechatronics Engineering, Diploma in Languages in German and Russian

German is spoken by 130 million people all over the world. Through its authors, philosophers, composers, painters, and scientists, German-speaking Europe has helped shaped history for the past 800 years.

There are lots of opportunities to use this language professionally, as Germany has the 4th largest economy in the world and is a key player in international trade and relations.

What will my study involve?

- Become an expert in German language, as well as in the history and culture of Germanspeaking countries, including Austria, Switzerland, Belgium, and Liechtenstein.
- Access to exchange programmes with the University of Konstanz and the University of Freiburg.
- UC hosts the National Centre for Research on Europe (NCRE), the only research centre for the study of Europe and the EU in Aotearoa.
- You can study German within a range of different bachelor's degrees, or you can also add a certificate or diploma in German language alongside your other studies.

Courses

No prior knowledge is needed to study German at UC. You will start with elementary German in your first year, then advance from there.

If you know some German already, then you may be given direct entry into second-year courses.

Topics can include:

- European identity and culture
- European novels and film adaptations
- rise and fall of communism
- World War history.

courseinfo.canterbury.ac.nz

Career opportunities

Knowing languages is highly sought after — it helps in cross-cultural relationship building, and helps you to pursue your career interests around the world. German language in particular is vital to international areas such as science, engineering, business, history, and tourism.

Career pathways could include:

- diplomatic and international relations
- teaching
- trade market
- research.

canterbury.ac.nz/life/jobs-and-careers

Study German:

• Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Certificate in Languages
- Diploma in Arts
- Diploma in Languages

Global Societies and Cultures

Through this specialisation you will learn to engage with ideas that have shaped today's world during the course of history and examine Aotearoa New Zealand's bicultural society in a global context.

Knowing a second language greatly increases your competitiveness in the global job market and serves as a gateway to cross-cultural awareness and communication.

What will my study involve?

- Combine language and cultural studies
- Choose from courses based on your specific interests and industry you wish to work in – history, literature, film, and language.

Courses

Courses are designed to develop knowledge of the global industry through culture and languages.

In your first and second year, you are required to learn a language and you will have the opportunity to advance your skills in your final year, and/or complete historical, political, and cultural studies on a region of interest.

Topics can include:

- global film analysis
- modern and ancient history
- shaping culture through art
- Māori culture and identity.

courseinfo.canterbury.ac.nz

Career opportunities

This degree pathway can lead to a range of careers in history, society, and culture. Your study experiences will give you the knowledge to work in many industries in Aotearoa and abroad.

Career pathways could include:

- public sector
- international education
- media and communications
- diplomatic and international relations.

canterbury.ac.nz/life/jobs-and-careers

Study Global Societies and Cultures:

Bachelor of Arts

Graphic Design

"I was blown away by the facilities and the work I saw being produced by other students."

Daniel Bachelor of Fine Arts in Graphic Design

Learn foundations and techniques of graphic design, create a portfolio of work that interests you, and participate in workshops, projects, and community art shows.

What will my study involve?

- Create graphic design pieces through small, medium, and large-scale studio projects.
- A close community of fine arts students, with plenty of opportunities for gaining work experience.
- Seminars by staff, students, and visiting professionals examining current issues in graphic design.

Courses

In your first year, you will gain a broad understanding of studio practice, with critical and reflective thinking about the fine arts. From second year, you will learn technical and theoretical knowledge of graphic design.

Topics can include:

- typesetting and typography
- historical and contemporary graphic art
- design software and digital skills
- studio projects.

courseinfo.canterbury.ac.nz

Career opportunities

A degree in Graphic Design prepares you for a creative industry with critical thinking, artistic and technical knowledge, and skills transferable to a number of roles.

Career pathways could include:

- graphic design
- illustrating
- design consulting
- marketing.

canterbury.ac.nz/life/jobs-and-careers

Study Graphic Design:

• Bachelor of Fine Arts

Health Education

"The Bachelor of Health Sciences has taught me countless skills that I can apply to any walk of life, but more specifically, those related to health and wellbeing."

Alice Bachelor of Health Sciences in Health Education

If you are interested in helping people and communities empower themselves, then Health Education is for you.

This subject revolves around understanding population health issues and learning how to teach people to adopt healthier lifestyles to enhance their health and wellbeing.

What will my study involve?

- Understand how to build people's health literacy.
- Develop a toolbox of teaching strategies that can be used at personal, interpersonal, and community level.

- Build confidence in presenting and facilitation.
- In your final year, complete an internship where you can apply what you have learnt and start your Health Education professional journey.

Courses

First-year courses are designed to give you an introduction into Health Sciences and teach you fundamental concepts that will be built on in the following years of your study. Topics can include:

- sexuality education
- mental health and building resilience
- programme planning and facilitation
- health promotion through physical activity.

courseinfo.canterbury.ac.nz

Career opportunities

Your studies will equip you to work in different areas of health-related institutions and agencies such as the National Public Health Service, high schools, Family Planning, and the Mental Health Foundation.

Career pathways could include:

- health promoter
- health education teacher
- whānau support worker
- wellbeing coordinator.

canterbury.ac.nz/life/jobs-and-careers

Study Health Education:

Bachelor of Health Sciences

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Health Sciences
- Diploma in Health Sciences

Health Science*

* subject to CUAP and TEC approval

An increasingly complex healthcare sector needs those who can combine physiology and biology with a broader understanding of public health. If you want a strong scientific foundation to meet challenges such as aging populations, infectious diseases and technological innovations in healthcare, then this could be the subject for you.

What will my study involve?

- Study a range of topics such as bioscience, anatomy, exercise physiology, health planning, and policy.
- Study a range of topics such as health services, mental health and wellbeing, sexual health, gender identity, environmental effects on communities, Māori and Indigenous people's health.
- Opportunities to complete work internships in health-related workplaces.

Courses

Gain an integrated understanding of health through exploring bioscience, in addition to health planning, systems and policies.

This subject is an excellent pathway into further study in clinical health programmes like nursing, clinical exercise physiology, medicine, or physiotherapy.

canterbury.ac.nz/courseinfo

Career opportunities

This subject should appeal if you are interested in careers at the intersection of science and healthcare.

Career pathways could include:

- healthcare researchers
- health protection officer
- public health policy analyst
- health promoter
- health communication advisor.

canterbury.ac.nz/life/jobs-and-careers

Study Health Science:

• Bachelor of Health Sciences

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Health
- Diploma in Health

History

"I enjoy the wide range of courses that are all on offer at UC; I've taken courses on New Zealand, America European, and Japanese history."

James

Bachelor of Arts with Honours in History, Master of Writing

History is at the heart of everything we do and is much more than studying the past — it gives you an insight into who we are as a society now, and helps us make better decisions for the future.

At UC, you will learn about different eras of history and cultures around the world, while also looking into our own bicultural heritage.

What will my study involve?

 Fit your courses to your interests whether that is revolutions, medieval history, religious beginnings, empires, or criminology.

- Get hands-on experience with real ancient artefacts through UC's Teece Museum of Classical Antiquities, based at Te Matatiki Toi Ora | Arts Centre of Christchurch, with a collection spanning more than 2,500 years from about 2,000 BCE.
- You can minor in History in different bachelor's degrees to add historical knowledge to your studies.
- Opportunity to complete a practical internship in organisations including archiving, museum curatorship, events and social media management, and research projects.

Courses

First-year courses are designed to introduce various aspects of history with broad topics. Further study will allow for more targeted learning of historical periods and subjects depending on your interests.

Topics can include:

- global wars
- Indigenous Māori history
- colonisation
- ethnicity, racism, and history.
- courseinfo.canterbury.ac.nz

Career opportunities

A study in history teaches you a range of skills that lead to careers involving analysis, communication, creative thinking, and research.

Career pathways could include:

- media and communications
- curatorship
- political relations, foreign affairs, policy
- iwi engagement and development.

canterbury.ac.nz/life/jobs-and-careers

Study History:

- Bachelor of Arts
- As a Minor:
- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Diploma in Arts

Human Resource Management

"Effective HR practices can play a part in the success of an organisation, in attracting, managing, and retaining talented people."

Matthew Bachelor of Commerce in Human Resource Management

Human Resource Management (HRM) is about attracting, developing, and managing staff; and creating a workplace culture where people are safe, engaged, and motivated to give their best.

At the heart of HRM is connecting with people and focusing on the employee experience in order to get the most out of an organisation's talent.

What will my study involve?

- A wide range of topics including leadership, communication, managing change and innovation, learning and development, and performance management.
- Option for a final-year internship.
- You can study a minor in Human Resource Management within a range of different bachelor's degrees alongside your other studies of choice.

Courses

First-year courses will introduce you to the fundamentals of business and management. Further study will include courses that will build your HRM knowledge. Topics can include:

- workplace behaviour
- HR processes like recruitment, performance management, and learning and development
- leading change and innovation
- employment relations.

courseinfo.canterbury.ac.nz

Career opportunities

Your studies will give you lots of practical skills like strategic planning, communication, research, and writing. You will learn how to place the wellbeing of people in the context of various organisational challenges.

Career pathways could include:

- human resources advisor
- learning and development consultant
- recruitment advisor
- people and culture coordinator.

canterbury.ac.nz/life/jobs-and-careers

Study Human Resource Management:

Bachelor of Commerce

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Human Services

Human Services is all about working with people to create a healthy life for the community and make positive impacts in the world.

Human Services is one of the fastest growing employment fields in the world as it is incorporated in so many professions including education, law enforcement, and health.

What will my study involve?

- Five different topics: healthy lifestyles, crime and deviance, local and global communities, workplaces, and youth.
- Practice your research skills and investigate topics from an angle that interests you.
- This subject can be studied alongside many different degrees to strengthen your human service and social awareness skills.

Courses

First-year courses will introduce you to the fundamental issues society faces, with further study made up of courses that you are specifically interested in from themes such as culture, health, and organisational spaces. Topics can include:

- social justice and changing politics
- family violence
- sex, sexuality, and state control
- ethics and empowerment in human services.

courseinfo.canterbury.ac.nz

Career opportunities

The skills gained from Human Services will suit any industry that involves compassion for and working with people, such as education, health, social support, policy, and law enforcement.

Career pathways could include:

- youth and community development
- law enforcement
- corrections and probation
- health.

canterbury.ac.nz/life/jobs-and-careers

Study Human Services:

- Bachelor of Arts
- As a Minor:
- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
 Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Diploma in Arts

Humanitarian Work

If you are passionate about taking action to protect life and health, and ensure respect for others, then this pathway is perfect for you. Studying Humanitarian Work will give you the skills to better the lives of others.

What will my study involve?

- Learn about important social issues such as poor education and poverty, and gain the leadership skills to change things.
- Be part of UC's student community that has gained worldwide reputation for responding to crisis, disaster, and civil emergencies.
- Act now with off-campus and hands-on social projects and internships through the degree (eg, addressing topics such as climate change, young people's health and wellbeing, human trafficking; and planning events for the Rainbow community)

Courses

The Humanitarian Work pathway focuses on learning about and responding to inequalities and how they affect people in relation to their sexuality, gender, ethnicity, education, and ability.

Topics can include:

- identity and discrimination
- Aotearoa human services
- international relations
- culture, society, and ethics.

courseinfo.canterbury.ac.nz

Career opportunities

Coordinating change needs skills in leadership, management, and engagement, and your experiences from this degree will prepare you well to act on these.

Career pathways could include:

- disaster response
- social welfare
- non-governmental organisations
- community representation.

canterbury.ac.nz/life/jobs-and-careers

Study Humanitarian Work:

- Bachelor of Youth and Community Leadership
- Certificate of Youth and Community Leadership

Indigenous Knowledge and Sustainable Partnerships

Making a difference in our global sustainability will need the lived experiences of all cultures, building on the diversity of our world views and histories. Our efforts continue to recognise, engage with, and respect Indigenous and local knowledge as critical to effective problem-solving.

This major is for those who want to learn how to engage respectfully and effectively with mana whenua and other Indigenous communities to advance the aspirations of local communities and the goals of sustainability and wellbeing for all.

Be the next generation of kaitiaki and help others to grow.

What will my study involve?

- Learn about Māori and Pacific relationships with natural resources, and current issues in Aotearoa politics.
- Engage with local communities and iwi through field studies and an internship.
- Customisable major so you can follow your interests, such as in activism, policy, natural resource management, business, economics, and health.
- Develop collaboration and leadership values, including respect and understanding of manaakitanga (hospitality) and whakawhanaungatanga (connections).

Courses

This major will introduce you to a variety of sustainability concepts, and includes unique Indigenous knowledge, Aotearoa history, and cultural and political science.

Topics can include:

- cultural activism
- Māori and Indigenous development
- Aotearoa politics and policy

• environmental science and resource management.

courseinfo.canterbury.ac.nz

Career opportunities

Many industries seek out graduates with leadership skills and cultural awareness. This major will teach you how to build relationships and help communities, regions, and businesses transform their cultural values and sustainable practices.

Career pathways could include:

- government sectors
- advisory and project consultancy
- management
- communications and stakeholder engagement.

canterbury.ac.nz/life/jobs-and-careers

Study Social Action, Community and Global Development:

 Bachelor of Social and Environmental Sustainability

Indigenous Narrative

Indigenous Narrative explores ways of representing Indigenous stories, history, and people through the cinema and video game industry. A good understanding of Indigenous narrative is important for anyone working in the digital screen industry in Aotearoa New Zealand and beyond.

What will my study involve?

- Study the only Indigenous Narrative specialisation in Aotearoa.
- This subject will complement your major, by adding a foundational indigenous understanding to anything you do.
- Examine the political, historical, social, cultural, and ideological influences that shape the way Māori and Indigenous people are often portrayed in film and media and understand your role in producing authentic stories.
- Te Whare Pūrākau Academy Scholarships are available annually for Māori, Pacific, and other Indigenous students to gain mentorship and leverage from classes and wānanga with industry experts.

Your first year will introduce you to examples of Māori culture in media, and how Indigenous and non-Indigenous creators approach culture and storytelling.

Later courses will offer more critique on global cinema and gaming, and how indigenous cultures have evolved with the digital age of storytelling.

Topics can include:

- Māori culture media
- reading Indigenous literature
- ethics in digital productions
- storyboarding and scriptwriting.

courseinfo.canterbury.ac.nz

Career opportunities

You can write your own stories or support other creative productions as a large number of global companies are seeking our technical and cultural expertise.

This study will also prepare you for roles outside of Aotearoa, particularly in countries aiming for more inclusivity and accuracy in their creative projects.

Career pathways could include:

- media directing and producing
- screenwriting for film and video games
- copy writing
- creative consultancy.

canterbury.ac.nz/life/jobs-and-careers

Study Indigenous Narrative:

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

• Certificate in Indigenous Narrative

Industrial Product Design

Studying Industrial Product Design will teach you how to design and deliver suitable products that solve problems and generate consumer interest.

Power tools, parachutes, footwear, furniture, backpacks, bikes, inhalers, and interfaces are all examples of Industrial Product Design. This subject combines creative innovation with technical and business skills.

What will my study involve?

- Gain practical understanding of the product design lifecycle — from research and idea generation through to prototyping, testing, and delivery.
- Cross-disciplinary study including engineering, physics, mathematics, design, and science.
- Access to computer designing software to test, visualise, and communicate your ideas.
- Opportunities to enter in internationally recognised design competitions.

Courses

Your Industrial Product Design studies will include a variety of courses from practical design work to learning the physics and engineering behind creating successful products.

Topics can include:

- consumer-focused product development, testing, and evaluation
- portfolio creation and visualisation
- manufacturing methods and materials science
- industry projects, designing to client briefs.

courseinfo.canterbury.ac.nz

Career opportunities

Studying Industrial Product Design will give you the skills to work across various industries due to the combination of disciplines you participate in during your studies. Career pathways could include:

- industrial product designer
- design researcher
- design engineer
- entrepreneur set up your own company, generating your own product.

canterbury.ac.nz/life/jobs-and-careers

Study Industrial Product Design:

• Bachelor of Product Design

Information Systems

"Information Systems is an exciting and continually growing industry with multiple directions for potential career paths, especially right now."

Henry

Bachelor of Commerce in Information Systems

Information systems and digital technology play a major role in organisations and in delivering products and services. With Information Systems (IS), we can change how we work, communicate, and do business.

IS is about how businesses use information technology to become smarter, better, faster, and achieve their strategic goals. By providing access to information, IS enables organisations to create value, provide solutions, and use technology to innovate and to create new opportunities.

What will my study involve?

• Develop knowledge to address practical problems of how to access information, how to design, develop, and deliver IT solutions, as well as how to manage IS projects, personnel, and resources.

- Learn through industry and group projects, lab work, and extracurricular activities.
- Flexible study options you can take courses like marketing, accounting, data science, software engineering, entrepreneurship, alongside information systems.
- Take part in business and entrepreneurial projects and events and find support at Te Pokapū Rakahinonga | UC Centre for Entrepreneurship.

In addition to foundational commerce courses such as accounting, finance, microeconomics, information systems and technology, management, and statistics, you can choose foundational courses in computer programming, computer science, or databases.

Topics can include:

- business systems analysis
- business intelligence and analytics
- web design and development
- information systems project management.

courseinfo.canterbury.ac.nz

Career opportunities

Information Systems is one of the fastest growing areas for study and employment. It is on the long-term skill shortage list for Aotearoa and there is also a global shortage.

Through your studies, in addition to technical skills, you will learn workplace skills like project management, process management, governance and strategy, communication, and problem-solving.

Career pathways could include:

- IT project manager
- user experience designer
- IS/IT consultant
- business intelligence/data analyst.

canterbury.ac.nz/life/jobs-and-careers

Study Information Systems:

• Bachelor of Commerce

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Commerce
- Diploma in Commerce

Innovation

Innovation is the key to successful business and society, where coming up with new ideas for improvement is a continuous goal.

Learn how to develop and commercialise your business ideas into reality.

What will my study involve?

- Develop your entrepreneurial skills with studies on the current global market and latest technologies changing how we do business.
- Group or individual projects and internships with local and national organisations.
- Set up your own business venture or gain experience from industry experts with Te Pokapū Rakahinonga | UC Centre for Entrepreneurship.
- Include Innovation in several degree options to customise your studies with business ideas in particular industries.

Courses

Learn business foundations of managing and financing in the first year, and then go on to specialised courses in identifying opportunities for change, learning how to experiment with ideas, and making practical and marketable results.

Topics can include:

- competitive markets
- feasibility and forecasting
- new technologies and tools for innovation
- practical project work.

courseinfo.canterbury.ac.nz

Career opportunities

With your knowledge in generating ideas, a career in business, technology, entertainment, product manufacturing, community development, and government are all possible with your Innovation degree. These fields of employment are in constant need for innovative thinkers.

Career pathways could include:

- business consultant
- risk evaluator
- project management
- product designer.

canterbury.ac.nz/life/jobs-and-careers

Study Innovation:

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Commerce
- Diploma in Commerce

International Affairs

This specialisation combines foreign language with social sciences to understand international relations and political systems.

Study in International Affairs opens up your experiences beyond Aotearoa while also examining our bicultural society.

What will my study involve?

- A combination of language, political, and cultural studies.
- A choice in courses based on your individual and industry interests – history, politics, Māori culture, media and communications, and more.
- Opportunity to participate in a range of exchanges with UC's international exchange partners.

Courses of your choice in this specialisation are designed to give you a range of experiences, to develop knowledge of local and global industries.

In your first and second year, you will be required to complete language courses, with the opportunity to advance your skills in your final year.

Topics can include:

- domestic and international history
- identity and ethnicity
- foreign policy
- political uprisings.

courseinfo.canterbury.ac.nz

Career opportunities

This degree will build career pathways in foreign affairs and international relations in government and non-government organisations. Skills such as multicultural awareness and communication will make you employable in Aotearoa and overseas.

Career pathways could include:

- media and communications
- diplomatic and international relations
- public sector
- foreign policy.

canterbury.ac.nz/life/jobs-and-careers

Study International Affairs:

• Bachelor of Arts

International Business

In this subject, you will gain skills and confidence to conduct business in a global, multicultural economy.

What will my study involve?

- Develop cross-cultural business skills with course options towards finance or marketing, and options to learn another language.
- Choose to go on an exchange with an overseas university in your second year.
- Add an International Business minor to your other subjects to prepare for a particular industry that interests you.

Courses

Starting with the basics of end-to-end business, your studies focus on international economics, foreign exchange, trade markets, and global business strategy and operations. You will also be able to complete language courses with your degree.

Topics can include:

- overseas marketing and strategy
- tourism industry
- managing an international franchise
- regional trade agreements and politics.

courseinfo.canterbury.ac.nz

Career opportunities

Your practical knowledge of international business prepares you for careers on a global scale, whether working on business relations between countries, launching a new venture or product, managing a multinational organisation, or providing advice to expanding companies.

Career pathways could include:

- international business executive
- entrepreneur
- foreign sales representative
- trade consultant.

canterbury.ac.nz/life/jobs-and-careers

Study International Business:

• Bachelor of Commerce

- As a Minor:
- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and
 Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Commerce
- Diploma in Commerce

Japanese

Japan is one of the most influential nations in the Asia-Pacific region — culturally, economically, and diplomatically. The nation plays an important role in Aotearoa New Zealand's economy and learning Japanese will be a great asset to your studies.

Studies in Japanese involve more than just reading, writing, and speaking. It will also involve learning the culture and the impact it has on Aotearoa and the world.

What will my study involve?

- Become an expert in the Japanese language, history, and culture.
- Exchange programmes with various universities throughout Japan including Bunkyo University and Kwansei Gakuin University.
- Japanese can be studied alongside a range of bachelor's degrees, or you can complete a certificate or diploma in Japanese with other studies.

Courses

First-year courses are introductory level and are designed for those that have no prior knowledge to the language. Further courses will go on to intermediate and advanced- level Japanese studies.

If you know some Japanese already, then you may enter directly into second-year courses.

Topics can include:

- identity and culture
- film and literature
- art and architecture
- history.

courseinfo.canterbury.ac.nz

Career opportunities

Knowing languages is a highly sought-after skill. It helps with cross-cultural relationships and allows you to pursue a career in different parts of the world.

Many UC graduates have been granted opportunities to continue their studies or careers in Japan.

Career pathways can include:

- interpreting and translation
- tourism
- international relations
- education.

canterbury.ac.nz/life/jobs-and-careers

Study Japanese:

• Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Certificate in Languages
- Diploma in Arts
- Diploma in Languages

Journalism

"What's cool about journalism is that it's essentially a license to ask questions, meet different people, and explore new places."

Katie Graduate Diploma in Journalism

Journalism is more than reporting on current events – it is the research and analysis of ethical issues, audience needs, technology, and more – all produced in a fast-moving digital space.

Journalism is essential to our everyday lives, and this degree will allow you to enter in this critical workforce with the skills learned here at UC.

What will my study involve?

- A strong emphasis on practical learning with content creation for various media platforms and outlets.
- Opportunity to complete internships in your final year of studies with local newsrooms, print media, and other media industries.
- Flexibility to include other subjects alongside your journalism studies depending on your personal interests.

Courses

Gain experience in all aspects of Journalism including research, writing, interviewing, and analysis while applying them to various digital outlets.

Journalism-specific courses begin in your second year after completing broad communications courses in your first year.

Topics can include:

- media and content production
- disaster and crisis reporting
- media ethics
- news broadcasting.

courseinfo.canterbury.ac.nz

Career opportunities

The Journalism major can lead to a range of different careers with opportunities abroad because of the fast-growing need for online media.

Career pathways could include:

- journalism
- public relations
- social media and digital marketing
- media production.

canterbury.ac.nz/life/jobs-and-careers

Study Journalism:

• Bachelor of Communication

Language, Brain and Behaviour

This specialisation is for those who are interested in psychology and language, and develops your understanding of how these shape our behaviour, identity, culture, and wellbeing.

What will my study involve?

- Hands-on testing in the lab to explore how the brain works, using modern computer labs designed for experiments in human performance, human-robot interactions, language cognition, social behaviour, and more.
- Take courses from a wide variety of subjects to customise your study, including psychology, social media, anthropology, and other languages.
- Benefit from UC's Te Kāhui Roro Reo | New Zealand Institute of Language, Brain and Behaviour, a multi-disciplinary centre dedicated to the study of human language.

Courses

Throughout your study you will explore neuropsychology, language learning, cultural development, and communication of language.

Topics can include:

- accents, local sayings, and other language diversity
- laboratory classes
- brain development over the lifespan
- communication devices.

courseinfo.canterbury.ac.nz

Career opportunities

This specialisation will be of value to anyone wishing to continue on to areas such as language research or teaching, youth development, communication skills training, or development of new language technologies.

Career pathways could include:

- language technology development
- policy development
- data analysis
- teaching.

canterbury.ac.nz/life/jobs-and-careers

Study Language, Brain and Behaviour:

• Bachelor of Arts

Latin

Latin is one of the oldest languages in the western world, and many modern European languages such as Italian, Spanish, Portuguese, French, and English share their origins with this ancient language.

Studying Latin gives you an in-depth look at Ancient Rome, whose politics and culture have influenced the systems we use in the modern world today.

What will my study involve?

- Learn about the history and culture of Ancient Rome through its original language, epic poetry, letters, satire, and drama.
- Access to the Teece Museum of Classical Antiquities which contains artefacts, including inscriptions, of direct relevance to the literary world of the Romans.
- Study courses at Te Matatiki Toi Ora | Arts Centre campus.

Courses

The beginner Latin courses in the first year include reading Latin and grammar studies. Advanced Latin courses in the later years examine literary works and documents from Ancient Rome in their original language.

If you know some Latin already, then you may be given direct entry into second-year Latin courses.

Topics can include:

- Latin authors, such as Vergil and Cicero
- graffiti, inscriptions, and everyday Latin
- translation exercises
- Latin and evolution through modern European languages.

courseinfo.canterbury.ac.nz

Career opportunities

As well as research and conservation work on Rome and the Ancient Mediterranean culture and artefacts, having advanced knowledge of Latin can be of use in industries such as government, law, medicine, and a variety of science fields. Career pathways could include:

- museums and galleries
- publishing or editing
- teaching
- archaeology.

canterbury.ac.nz/life/jobs-and-careers

Study Latin:

- Certificate in Languages
- Diploma in Languages

Law

"Studying Law can take you far beyond a court room or a firm."

Briar

Bachelor of Laws, Bachelor of Arts in Political Science and History, Master of Laws (International Law and Politics)

Studying Law at UC will involve looking at legal systems, policies, cases, legal material, as well as the wider social, political, and historical contexts in which our laws exist.

This degree will give you the ability to think critically, and analyse facts and issues in order to persuade by logical argument.

What will my study involve?

- Work on real issues and cases through internships and community work.
- Take part in mooting, debating, competitions, and other events.
- An important part of your studies will be exploring biculturalism and Indigenous knowledge.

Courses

First-year Law courses introduce you to the foundations of the legal system in Aotearoa, analysis methods, and legal writing and research. You will also take non-law courses that interest you in your first year.

Further study may involve more specialised study including commercial law, Māori land and resource law, criminal justice, and environmental law.

Topics can include:

- family law
- serious financial crime
- intellectual property law
- international law.
- courseinfo.canterbury.ac.nz

Career opportunities

Through your studies you will learn skills like critical and creative thinking, analysis, writing, editing, and research. These skills will get you ready to work in the legal profession as well as in careers outside of the courtroom.

Career pathways could include:

- barrister/solicitor
- local government
- media and communication
- public sector.

canterbury.ac.nz/life/jobs-and-careers

Study Law:

• Bachelor in Laws

Linguistics

"Linguistics will cause you to look at your language and appreciate it to new levels, and it will also enable you to learn how to understand and make sense of foreign languages without having ever studied them previously."

Rachel Bachelor of Arts in Anthropology, Linguistics, and Japanese

Linguistics is the analysis of languages — from structure, how and why they change, to the way we learn and our unique way of speaking.

By understanding how language is a part of everything we do, you can better understand how communication shapes our identity, relationships, and way of life.

What will my study involve?

- Opportunity to learn from research conducted here at UC.
- UC offers many language studies to complement Linguistics, such as Te Reo Māori, Chinese, Russian, and Japanese.
- Study a minor in Linguistics within a range of bachelor's degrees so you can add communication skills and knowledge to other subjects.

Courses

In the first year, you will learn the basics of English language and Aotearoa New Zealand society, before going on to more advanced analysis and research of language meaning and psychology. You will also complete at least one course from a language other than English within your study.

Topics can include:

- phonetics
- forensic linguistics
- text analytics
- language acquisition and processing.

courseinfo.canterbury.ac.nz

Career opportunities

Because linguistics is a scientific field of study and involves other areas like history and culture, you gain an in-depth understanding of language, how the brain works, and the use of language in our world. You will learn skills like analysis, research, innovative thinking, problem-solving, and cross-cultural communication.

Career pathways could include:

- translation and interpreting
- marketing
- proofreading and editing
- language teaching.

canterbury.ac.nz/life/jobs-and-careers

Study Linguistics:

- Bachelor of Arts
- Bachelor of Science
- As a Minor:
- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Certificate in Science
- Diploma in Arts
- Diploma in Science

Management

Management involves organising teams of people and boosting business performance.

Explore how businesses function, and how you can influence processes, resources, and workers to get the best results.

What will my study involve?

- Study a range of topics and theories of management, including organisational behaviour, how to lead others, manage projects, and drive innovation.
- Consulting projects and internship opportunities in the final year will place you in real-world organisations to work on challenges the organisation is facing.

Courses

Start your degree learning the basics of management and the business environment, developing leadership skills to get your team towards the best longterm performance.

After your first year, you can choose from a range of courses depending on the field you want to go towards such as business strategy, corporate ethics, international management, and implementing sustainable practices.

Topics can include:

- business communication
- organisational behaviour
- managing change and innovation
- business culture and multiculturalism.

courseinfo.canterbury.ac.nz

Career opportunities

Managers are found in every kind of industry, working and coordinating individuals and teams all the way to toplevel business positions.

Career pathways could include:

- public relations executive
- business development manager
- human resources manager
- strategic analyst.

canterbury.ac.nz/life/jobs-and-careers

Study Management:

- Bachelor of Commerce Other pathways:
- Certificate in Commerce
- Diploma in Commerce

Māori and Indigenous Health

The Māori and Indigenous Health major combines Indigenous culture and practices with health and social services.

You will learn the content and skills to support community healthcare access and health outcomes in a way that respects their values and identities.

What will my study involve?

- Explore different areas of Māori health and wellbeing: Te Ao Tangata (engaging with Māori communities), Te Ao Hauora (working with health professionals such as doctors and pharmacists), and Ngā Ratonga Hauora (working with health systems and social services).
- Apply your study skills and support Māori wellbeing directly within local services through an internship.

Courses

You will critically analyse current health services and policies with regards to how they represent Māori, and learn how best to encourage Māori to engage with these.

Topics can include:

- Aotearoa health policies
- rongoā Māori traditional healing and public health science
- tino rangatiratanga in health systems
- Māori and Pacific health statistics.

courseinfo.canterbury.ac.nz

Career opportunities

Your learning and experiences will contribute to health and social services that improve equity for all communities in Aotearoa New Zealand, particularly Māori and Pasifika. Career pathways could include:

- Health promoter or advisor in the National Public health service
- Māori and Pacific health organisations
- public health analyst
- health promotion
- community health liaison with whānau.

canterbury.ac.nz/life/jobs-and-careers

Study Māori and Indigenous Health:

Bachelor of Health Sciences

Māori and Indigenous Perspectives

The cultural environment we live in greatly impacts our identity, experiences, and wellbeing. This subject offers an understanding of Māori and Pacific perspectives, and the historical and contemporary challenges they face.

What will my study involve?

- Learn about Māori and Pacific models of mental health and wellbeing - traditional concepts such as tapu, mana, ihi, and mauri, spiritual versus physical wellbeing; and contemporary concepts such as gender identity.
- Examine the impact of your own culture, values, beliefs, and assumptions in your growing personal and professional role.
- Complete a final-year project with community and industry partners so you can gain real-world connections and contexts in your study.

Courses

You will be introduced to Māori and Pacific cultural concepts that shape their communities and influence global politics, education, health and wellbeing, and sustainability. Gain practical skills through a final-year project course. Topics can include:

- health challenges
- spiritual beliefs and concepts
- traditional practice in contemporary settings
- relations between Aotearoa and Pacific nations.

courseinfo.canterbury.ac.nz

Career opportunities

Through this subject, you can challenge and expand your worldview, making you a culturally-competent professional who can help more people and their communities.

Learning about tangata whenua and Pacific culture is highly valuable not only in Aotearoa, but also overseas, especially places with their own Indigenous peoples and history.

Career pathways could include:

- advocacy
- organisational psychology
- healthcare services
- policy and strategy.

canterbury.ac.nz/life/jobs-and-careers

Study Māori and Indigenous Perspectives

• Bachelor of Psychological Science

Māori and Indigenous Studies

"I have learnt about society, culture, professionalism, and gained insight into how these will work together to prepare me for the workforce."

Jessica

Bachelor of Arts in Human Services with a minor in Māori and Indigenous Studies, Graduate Diploma in Teaching and Learning (Primary) Māori and Indigenous Studies is a broad subject that explores the culture, knowledge, and philosophies of Māori and Indigenous peoples, and their economic, political, and social experiences.

These studies are increasingly seen as central to biculturalism in Aotearoa as well as in our global multicultural society.

What will my study involve?

- Study a range of historical and contemporary issues that Indigenous people face such as their relationship to science and politics, public services, and material culture.
- Aotahi: School of Māori and Indigenous Studies operates as a whānau to help you explore the heritage of Aotearoa.
- Take this subject as a minor in a wide range of bachelor's degrees so you can combine your other subjects with mātauranga Māori.

Courses

Courses in this subject are open to everyone, even if you have not experienced Māori culture before. Topics will explore everything from cultural practice, colonial history, racism, and inequality, through to world impact from media, sport, and music.

Topics can include:

- philosophies and spiritual beliefs
- Māori film
- representation in media
- traditional and contemporary cultural practices.

courseinfo.canterbury.ac.nz

Career opportunities

Learning perspectives and history from Indigenous peoples is an important and rewarding skill to have, and is often looked for in employees, particularly in countries like Aotearoa and USA as they have a strong Indigenous presence.

Careers are opening in iwi and other Māori organisations, public health, research, teaching, government organisations, and the wider community.

Career pathways could include:

- policy analysis and advisory
- community development
- curator and collection management
- training and professional development.
 canterbury.ac.nz/life/jobs-and-careers

Study Māori and Indigenous Studies:

- Bachelor of Arts
- As a Minor:
- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Diploma in Arts

Marketing

"Marketing is such a universal degree, and it can take you in so many directions."

Charlotte Bachelor of Commerce in Marketing and Finance

Marketing goes beyond advertising and sales pitches — it analyses customer needs to design and produce goods or services that match buyer expectations, or even convinces them to change their buying habits.

UC's Marketing degree is focused on building your practical skills and includes real-world marketing opportunities.

What will my study involve?

- Learn a wide range of skills, such as advertising products, digital marketing, understanding consumer behaviour, and customer experience.
- Opportunities to get involved in annual UC-wide competitions such as inter-university business challenges, entré for young entrepreneurs, and Te Pokapū Rakahinonga | UC Centre for Entrepreneurship that connects you with local businesses.
- Add Marketing study to many of UC's degrees to learn about customer trends and experiences specific to your business interests.

Courses

First-year courses teach you the basics of marketing theories and concepts. Further study can include courses that cover everything in creating and analysing marketing for different uses.

Topics can include:

- customer experience
- digital marketing
- tourism, hospitality, and events marketing
- consumer behaviour and marketing research.

courseinfo.canterbury.ac.nz

Career opportunities

A degree in Marketing prepares you for a career in a variety of industries or professions that value creative communicators, analytical thinkers, and individuals driven by people and clients. With businesses and technologies constantly evolving, a Marketing graduate will always be sought after.

Career pathways could include:

- content creator
- advertising consultant
- market trends analyst
- market research.

canterbury.ac.nz/life/jobs-and-careers

Study Marketing:

Bachelor of Commerce

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Commerce
- Diploma in Commerce

Mātauranga Māori

Mātauranga Māori is taught every two years with the next intake starting in 2027.

Mā te ara Mātauranga Māori kei Te Kura Whakangungu Kaiako koutou e whai mōhiotanga mō ngā mahi o te kaiako kei ngā whare kōhungahunga me ngā kura tuatahi, mai i te taumata reo 2 (51%+ te reo Māori). Ka oti tēnei tohu i a koe, kei a koe ngā pūkenga whakaako ki rō Kura Aunoa / Kura Auraki, kei reira e whakanuia ana te reo Māori me ōna tikanga, ngā mōhiotanga o ngā take kākanorua rua me ngā ahurea whakamana i te tipu mai o te tamaiti.

The Mātauranga Māori Initial Teacher Education pathway will equip you to work in whare kōhungahunga (early childhood) and/ or kura tuatahi (primary) settings working at level 2 (51–80% te reo Māori immersion) or higher. A graduate of the Mātauranga Māori programme has the ability to work in bilingual English medium educational settings, where knowledge of te reo Māori me ōna tikanga, bicultural practice, and culturally empowering pedagogies are valued as a means to support child development.

He aha ngā hua?

 He ako kei rō horopaki ako reo rua, kākanorua, he ako ā-whānau. He tohu tēnei mā te hunga e ngākau nui ana ki te whakapākari i ā rātou mōhiotanga ki te reo Māori me ōna tikanga. Hei te tau tuatoru o te tohu paetahi, he reo rumaki ngā akoranga katoa (81+ te reo Māori). Learn in a bilingual, bicultural, whānaustyle atmosphere. This qualification is open to all who have a commitment to developing competence in te reo Māori me ōna tikanga. By the third year of the degree, the delivery is level 1 (81+% te reo Māori immersion).

 He ako ā-rorohiko, ā-kanohi kitea hoki te momo ako, nā reira, ka taea te ako mai tawhiti. Heoi anō me matua tae ā-tinana ki ētahi wāhanga o ia tau, he noho marae ki te hau kāinga o Kāi Tahu ia tau.

This is a mixed method style of delivery with content being available online, therefore you can learn from anywhere. Kanohi ki te kanohi (face-to-face) delivery will also be included in the programme through scheduled block wānanga each year and two noho marae each year.

 Ko ngā wheako mahi ngaio, arā ngā akoranga 'Mana Ako', kei rō whare kōhungahunga me ngā kura tuatahi Māori he wāhanga matua kia mārama pū ki ngā āhuatanga o te horopaki ako me ngā mahi o te kaiako.

Professional Practice Exploration experiences may occur in whare kōhungahunga (early childhood centres), bilingual primary, and kura kaupapa Māori settings throughout your degree.

Ngā akoranga

The Mātauranga Māori endorsement is a part of an undergraduate teaching qualification taught in the Kāi Tahu takiwā. The programme will be initially delivered bilingually and later in a fully immersive te reo Māori environment to strengthen competence and confidence to teach in and through te reo Māori and embed tikanga and mātauranga Māori in daily practice.

Topics can include:

- te reo Māori, tikanga Māori and mātauranga Māori including te Maramataka
- Māori perspectives of wellbeing including all dimensions; tinana, wairua, hinengaro, whānau, and whakapapa
- how to notice, celebrate, and support the unique skills and strengths of our tamariki/mokopuna
- Professional Practice Exploration experiences in kura and whare köhungahunga.

courseinfo.canterbury.ac.nz

Career opportunities

Ko ngā pūkenga o te reo Māori me ōna tikanga, me ngā mātauranga Māori ētahi pūmanawa whakaharahara ki Aotearoa nei, he tino taonga mā tātou katoa. Ko ngā raukura o tēnei tohu, e kaha kōrero Māori ana, me ngā pūmanawa o te kākanorua, e kaha pīrangitia ana hei kaimahi ki Aotearoa me te ao whānui, nā ngā mōhiotanga maha, me ngā hononga ki ngā iwi taketake o te ao.

Ko ngā māramatanga o ngā tikanga rua, he tūāpapa pai mō ngā mahi kei ngā kaupapa here mātauranga, mahi kaitautoko whakaako me ētahi atu kaupapa ki te poipoi i ā tātou tamariki, mokopuna.

Kaiako with skills in te reo Māori and mātauranga Māori are highly valued in Aotearoa in both English medium and Māori medium settings.

Bicultural knowledge and competence is essential for work in educational policy, support services, and other fields that involve working with and for people.

Career pathways could include:

- kaiako (teacher)
- tumuaki (principal)
- Māori language consultant
- culturally responsive pedagogies leader/ advisor.

canterbury.ac.nz/life/jobs-and-careers

Study Mātauranga Māori:

• Ako: Bachelor of Teaching and Learning

Mathematical Sciences Education

Mathematical Sciences Education enables you to explore how mathematics, statistics, and data can inform and change how our society works.

In today's data-driven world, mathematics is increasingly important in technical analysis, policy making, education, health, media, and decision making. Mathematical Sciences Education allows you to balance developing your technical expertise in mathematics with the critical skills of communicating and problem solving.

What will my study involve?

- Develop your maths and teaching abilities with learning tools and methods such as applied mathematics, computerassisted learning, and modern maths.
- Explore how maths, statistics, and data can inform and change how our society works, such as in policy and social contexts.
- Practical experiences tutoring in UC courses, workshops, schools, and community programmes.
- Prioritised pathway to becoming a registered maths or statistics teacher through one-year graduate teaching degrees at UC.

Courses

This major will introduce you to the science and psychology of examining and explaining complicated maths to others and includes a selection of mathematics topics each year of study so you can customise your knowledge.

Introductory courses are available for those without a strong background in maths or statistics study.

Topics can include:

- communicating maths
- how people learn
- statistics and social development
- tutoring practice.

courseinfo.canterbury.ac.nz

Career opportunities

Your study can open career pathways in fields needing graduates who can apply mathematical theory to make critical changes and examine social issues in areas such as policy, development, and research.

UC also offers a number of programmes to set you towards registration as a professional teacher in Aotearoa schools.

Career pathways could include:

- mathematics or statistics teacher
- data analyst
- policy advisor
- statistics researcher.

canterbury.ac.nz/life/jobs-and-careers

Study Mathematical Sciences Education:

- Bachelor of Arts
- Bachelor of Science

Mathematics

Mathematics is at the forefront of breakthroughs in science, technology, and finance. It has been around for over 4,000 years and is still an innovative subject with new ideas, techniques, and theories constantly being created, tested, and explored.

Being a mathematician puts you one step ahead in preparing for the technological advances of the coming generation.

What will my study involve?

- Study topics such as pure and applied mathematics, modern mathematical theories, key uses, and breakthroughs in mathematical history.
- A wide range of mathematics courses to customise your study and gain skills towards particular career paths.
- Research projects within UC and in connection with industry.

Courses

First-year courses cover the basics of advanced mathematics such as calculus and linear algebra with later courses offering a wide range of topics to choose from, including mathematical philosophy, history, and culture.

We offer introductory maths courses for those who don't have a strong background in maths or statistics.

Topics can include:

- mathematical modelling
- dynamic and non-linear systems
- computational mathematics
- cryptography and coding theory.

courseinfo.canterbury.ac.nz

Career opportunities

Because maths is used almost everywhere, a Mathematics major will open up many different career options. Roles in information technologies, finance, business, scientific research, law, teaching, and other fields will make the most of your logical reasoning skills.

Career pathways could include:

- technology and product design
- research mathematician
- actuary
- fraud investigator.
- canterbury.ac.nz/life/jobs-and-careers

Study Mathematics:

- Bachelor of Arts
- Bachelor of Science

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Certificate in Science
- Diploma in Arts
- Diploma in Science

Mechanical Engineering

Mechanical engineers design and develop everything that moves or has moving parts — from airplanes to wind turbines to dishwashers.

What will my study involve?

- Practical courses designing, building, testing, and maintaining mechanical systems.
- Take part in a variety of Research and Development (R&D) projects with industry sponsors, ranging from industrial design manufacturing, biomedical applications, and Unmanned Aerial Vehicles (UAVs).
- Check out clubs like UC Motorsport and Motosoc if you are interested in mechanics.

Courses

From your second year, you will learn how to design parts or whole mechanical systems for different purposes, with later course options to study systems that interest you, for example robotics, energy systems, and controls.

Topics can include:

- computer-aided design
- movement design aerodynamics, tyre design, traction, suspension, etc
- mechanical system design
- materials science and reliability.

courseinfo.canterbury.ac.nz

Career opportunities

Mechanical engineers meet the challenges of our changing world by applying creativity, scientific knowledge, and engineering skills to find solutions to technical problems.

Your experiences will work well in a huge number of industries, from medical to building to transport to power generation.

- Career pathways could include: • quality and test engineering
- machine operations and safety
- product manufacturing and design
- engineering consultancy.

canterbury.ac.nz/life/jobs-and-careers

Study Mechanical Engineering:

• Bachelor of Engineering with Honours

Mechatronics Engineering

"Mechatronics is a subject of the future. It combines knowledge from Electrical Engineering, Mechanical Engineering and Computer Science to make smart products."

Peizhao Bachelor of Engineering with Honours in Mechatronics Engineering

Mechatronics Engineering combines sensors, software, electronics, and mechanical motors to create innovative new devices.

Almost every system you see and use daily, smartphones, cars, air conditioning units, use a mechatronics system to operate and solve tasks on their own.

What will my study involve?

- Project-based programme, with handson skills development and robotics laboratories throughout the degree.
- Final-year project work includes real-world research with UC's industry partners, including commercial and industrial design.
- Participate in mechatronics research work through summer internships.

Courses

From your second year, courses will cover the basics of creating automated mechatronics systems, with advanced courses looking into designing and patenting products and newer technologies in the field such as micro and nanoelectrical systems. Topics can include:

- robotics
- autonomous systems (eg, Unmanned Aerial Vehicles (UAV))
- machine electronics and motion controls
- product design.
- courseinfo.canterbury.ac.nz

Career opportunities

A Mechatronics Engineering degree can open up careers in a wide range of industries including robotics, aerospace, gaming, internet and computers, defence, automotive, and manufacturing.

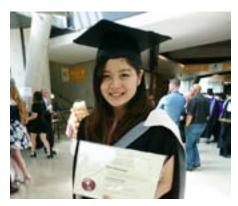

- Career pathways could include:
- software engineering
- machine manufacturing and testing
- industrial product design
- smart technologies.

canterbury.ac.nz/life/jobs-and-careers

Study Mechatronics Engineering:

• Bachelor of Engineering with Honours

Media and Communication

"Explore many different areas of media such as mass media, journalism, new media, and advertisement."

Kairi

Bachelor of Arts in Media and Communication with a minor in Cinema Studies

Communication shapes the world we live in — whether by media professionals, large organisations, or individuals. By studying Media and Communication, you will learn how to analyse and produce communications and media, and how other people understand it within their own social worlds.

What will my study involve?

- Explore how media builds community, reinforces norms or drives social change, and how consumption of media affects culture, politics, and behaviour.
- Individual and group projects on multiple platforms digital, television, podcasts, and more.
- Create relationships with professional media guest speakers from industry and benefit from presentations and seminars from guest lecturers from around the world.

Courses

In your first year, you will learn the basics of media and our society, including new forms of communication such as the digital and social media space. Further study can include practical internships in various industries.

Topics can include:

- social media
- advertising and strategic marketing
- news and political reporting
- media campaign management.

courseinfo.canterbury.ac.nz

Career opportunities

Media and Communication prepares you for a career in a communication industry or any profession that values communication with people and clients, from the news media to marketing to government.

Career pathways could include:

- communications and public relations
- social media and digital marketing
- web and app content creation
- journalism.

canterbury.ac.nz/life/jobs-and-careers

Study Media and Communication:

• Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Bachelor of Communication
- Certificate in Arts
- Diploma in Arts

Medicinal Chemistry

Medicinal Chemistry explores the design and creation of new medicinal drugs for the treatment and prevention of illnesses.

This major will take you through the entire lifecycle of creating medicines, from discovering and isolating medicinal agents within natural and synthetic sources, through to clinical trials, sustainable production, patents, and sales.

What will my study involve?

- Study how drugs affect the body, synthetic and organic chemistry, and about the global pharmaceutical industry.
- Practical lab courses synthesising and testing drugs, including an introduction to intellectual property (IP) for designing and patenting your own medicinal products.
- Opportunities to be involved in medicinal chemistry research at UC like discovery of bioactive molecules for therapies and therapeutic agents.
- UC's programme has a unique focus on the bioactivity of Aotearoa and Polynesian flora and fauna, traditional rongoā (Māori medicines), and healthcare issues specific to our bicultural community.

Courses

Good grades in chemistry are required for entry into this subject. However, we offer introductory chemistry courses for those who don't have a strong background from secondary school.

Courses introduce you to chemical structures, processes, and their effects on the body, and go on to projects designing and testing your own medicines.

Topics can include:

- cellular biochemistry
- human biology
- clinical trials
- drug discovery and development.
- courseinfo.canterbury.ac.nz

Career opportunities

There is a high demand for more medicinal chemists to create life-changing medicines. As well as practical skills in pharmaceutics and microbiology, your non-laboratory skills in project management, scientific communications, and marketing will prepare you for roles in both the science and business side of creating medicines.

Career pathways could include:

- biomedical laboratories
- pharmaceutical manufacturing
- commercial drug marketing
- drug regulatory authorities.

canterbury.ac.nz/life/jobs-and-careers

Study Medicinal Chemistry:

• Bachelor of Science

Other pathways:

- Certificate in Science
- Diploma in Science

Mental Health and Addiction*

* subject to CUAP and TEC approval

Mental health is a critical global priority, with rising rates of depression, anxiety, and substance abuse affecting diverse populations. Learn how you can help meet these urgent needs to reduce health inequity, and promote community resilience.

What will my study involve?

- Learn from academics experienced in Counselling, Child and Family Psychology, Social Work, and Nursing.
- A focus on culturally responsive mental health and addiction services.
- You will be exposed to diverse cases, and professional networking opportunities, and clinical placement..

Courses

In addition to core knowledge of health and community wellbeing, this specialisation will cover topics such as social services in Aotearoa, foundations of mental health and addictions, behaviour change, and work experience.

canterbury.ac.nz/courseinfo

Career opportunities

This subject will enhance your problemsolving abilities by exposure in real-world, often complex scenarios, and assist to build your confidence and employability by providing supervised, practical experience.

The Mental Health and Addictions major is a major step in becoming accredited with the Drug and Alcohol Practitioners' Association Aotearoa New Zealand (DAPAANZ) as an applied addictions professional.

Career pathways could include:

- peer support and where relevant, lived experience advisor
- front line health worker and other roles in specialist Mental health and Addiction services
- Mental health related policy analysis
- health promotion.

canterbury.ac.nz/life/jobs-and-careers

Study Mental Health and Addictions:

• Bachelor of Health Sciences

Moving Image

"I managed to become part of Whitebait's online community of videographers. I make fun little films of my travels."

Buddy Bachelor of Fine Arts in Film

Explore the world of moving images through its history, critical discussions, contemporary artists, and technologies while developing your own portfolio.

What will my study involve?

- Studio work and group projects to develop your skills as a filmmaker.
- Use on-campus lighting and greenscreen stages, sound studios, editing suites, and gain 24-hour access to the film studio spaces.
- Take other courses of interest alongside your studies, such as Psychology, Music, and History.

Courses

After your first year introduces you to studio practice and the broader fine arts industry, your Moving Image courses will take you through the process of developing and executing a film project — writing, filming, location scouting, directing, editing, and more.

Topics can include:

- film studio projects
- international cinema
- documentaries and ethical storytelling
- new film technologies cameras, editing software, CGI, digital music.

courseinfo.canterbury.ac.nz

Career opportunities

Your works and experience throughout your studies explore both technical and nontechnical aspects of film, television, and other creative visual industries.

- Career pathways could include:
- film or TV directing
- producing
- cinematography
- screenwriting.

canterbury.ac.nz/life/jobs-and-careers

Study Moving Image:

• Bachelor of Fine Arts

Music

The music industry has changed a lot in the last 30 years with the explosion of digital technology and changes in society and culture. This has opened up new job possibilities for music professionals, alongside teaching, conducting, leadership, and performing.

At UC, we have a number of ways you can follow your interest in Music.

What will my study involve?

- With a Bachelor of Music you can major in Composition, Performance, Music Studies, or Creative Music Technologies.
- You can study Music as a major or minor in other degrees.
- Enjoy the unique learning spaces in our Te Matatiki Toi Ora | Arts Centre campus.
- Connect with the community through internships, performances, and collaborative projects.

Courses

Most Music courses are available without any prior experience.

Courses in your first year will introduce you to the basics of music terminology, including reading, writing, and performing songs, and a first look at the global music industry.

- Topics can include:
- song writing
- musical culture and performing arts
- audio and recording technologies
- performing music through singing or instrument.

The wide range of courses you take during your degree will set you up with skills to perform, create, and critically engage with music and the music industry.

Career pathways could include:

- orchestras, choirs, and opera houses
- festival management
- journalism and radio
- digital production.

canterbury.ac.nz/life/jobs-and-careers

Study Music:

• Bachelor of Music

As a Major:

• Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Diploma in Arts

Music Studies

Music is an essential part of all cultures globally. A degree in Music Studies allows you to investigate music from social and political perspectives, examining the role and importance of music now and through history.

What will my study involve?

- You will learn about topics such as popular music, musical philosophy, music of the world, and musical heritage of the western world.
- Opportunities to take part in internships and collaborative projects throughout your studies.

Courses

First year Music Studies is designed to give you a range of courses to choose from depending on your interests – from game audio production to orchestra arrangements to Kapa Haka performances. Topics can include:

- musical technologies
- composition and songwriting
- world music
- acoustics and recording.

courseinfo.canterbury.ac.nz

Career opportunities

Music Studies can teach you technical skills in music alongside necessary skills such as communication, project management, and leadership.

Career pathways could include:

- festival planning
- arts administration
- journalism
- music teaching.

canterbury.ac.nz/life/jobs-and-careers

Study Music Studies:

• Bachelor of Music

Natural Resources Engineering

Note: Natural Resources Engineering is not open to enrolments. See UC's Civil Engineering programme with a minor in Water and Environmental Systems Engineering.

Sustainability is the focus of Natural Resources engineers — that means protecting, improving, and maintaining natural resources such as soil, water, and the atmosphere. This involves renewable energy, regenerative agriculture, and carbon positive cities.

Natural Resources engineers work alongside communities and mana whenua to create solutions for complex and large-scale crises like climate change, housing, and poverty.

What will my study involve?

- Gain experience in understanding and re-imagining sustainable engineering practices.
- Benefit from world-class, high-tech laboratories on campus, and mentorship opportunities with experts in this developing field.
- Fun and engaging programmes, involving field trips and camps.

Courses

After a general first year where you will learn the foundations of engineering study, you can then choose courses towards Natural Resources Engineering from second year.

- Topics can include:
- climate change
- sustainable urban design
- ecological engineering
- renewable energy.

courseinfo.canterbury.ac.nz

Career opportunities

Natural Resources engineers are highly sought after and there are plenty of exciting careers including research and academic opportunities in Aotearoa and globally.

Career pathways could include:

- consulting
- city and regional planning
- government policy
- research and development.

canterbury.ac.nz/life/jobs-and-careers

Study Natural Resources Engineering:

• Bachelor of Engineering with Honours

Neuroscience and Cognition

Neuroscience and Cognition is the interplay between how our brain functions and our psychological processes - understanding how we think, feel, perceive, remember, and behave.

We can study our brains to understand many interconnected things, including our experiences and personalities, neurological conditions, ageing, and recovering after brain injuries.

What will my study involve?

- Investigate the brain, its structure, and function, to see how we become the way we are and behave the way we do, and why this changes over time.
- Practical components include an introduction to visualising, analysing, and interpreting brain imaging data, neuroscience techniques, and lab work.

Courses

You will learn the science behind how we think, and the mental processes of the brain that ultimately shape our experiences and behaviours. As your studies progress, you will learn more about cognitive processes, neuroscience methods, brain disorders and neurological conditions, and brain imaging data.

Topics can include:

- physiological basis of behaviour
- understanding sensation and visual perception
- treatment for neurodegenerative disorders
- cognitive psychology.

courseinfo.canterbury.ac.nz

Career opportunities

With the brain at the centre of everything we do, your studies can lead to a wide range of career pathways to help prevent, treat, or predict future outcomes – from developing new health services, to analysing emerging technologies, to statistical trends in psychological risks. Career pathways could include:

- behavioural counselling
- healthcare
- clinical research
- neuroscience research.

canterbury.ac.nz/life/jobs-and-careers

Study Neuroscience and Cognition

• Bachelor of Psychological Science

Nutrition

Good nutrition is important to maintain everyday wellbeing and to reach peak sporting performance.

During your studies, you will learn how to educate and work with clients to meet nutritional goals and prescribe health and sport-specific programmes.

What will my study involve?

- Identify nutritional practices for athletes, recreational exercisers, and groups with specific nutritional needs.
- Learn the effects of nutritional supplements on anatomy and sporting performance.
- Become part of UC's recognised expertise in nutrients and supplements and their effects on mental health disorders and wellbeing.

Courses

These courses will introduce you to our growing knowledge around food science and mental wellbeing. You will learn how to evaluate clients' personal needs and prescribe diets, supplements, and other nutrients to help enhance fitness performance, injury recovery, and overall health.

Topics can include:

- nutrition and exercise prescription
- anatomy
- recovery monitoring
- performance nutrition.

courseinfo.canterbury.ac.nz

Career opportunities

Professional knowledge around metabolism and healthy eating, nutrient timing, and nutritional supplements will enable you to pursue a rewarding career helping others with their health and wellbeing goals, and to achieve their best athletic performance.

Career pathways could include:

- fitness coach
- nutritional advisor/nutritionist
- health educator
- corporate wellness consultant.

canterbury.ac.nz/life/jobs-and-careers

Study Nutrition:

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and
 Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Operations and Supply Chain Management

"It has taught me time management, organisation, efficiency, and accuracy are key, as well as adaptability and forward thinking."

Tanisha

Ngāti Raukawa Bachelor of Commerce in Operations and Supply Chain Management, Strategy and Entrepreneurship, and Management

Operations and Supply Chain Management involves bringing together organisational resources (people, money, materials, and buildings) for the production of goods or services. Fundamentally, supply chain management is about matching the supply of resources and goods with the demands of the marketplace.

Operations and supply chain managers make sure the processes are smooth, efficient, and sustainable, and are always thinking of ways to make improvements.

What will my study involve?

- Courses focus on issues such as operations strategy, performance management, procurement and distribution, product and process design, and inventory management.
- Investigate answers to questions such as: how do you make sure that people, money, materials, and buildings are used efficiently across the whole organisation? How can we ensure that our organisation is successful in achieving its goals?

Courses

First year will cover a range of management, economics, accounting, and information systems courses.

Topics can include:

- management decision making
- supply chain management
- strategic operations
- micro and macroeconomics.

courseinfo.canterbury.ac.nz

Career opportunities

You will learn to focus on the details of processes and use skills like crosscommunication, collaboration, time management, and planning to efficiently deliver value to customers.

With these skills, you will be able to take on a wide range of roles from logistics to risk management.

Career pathways could include:

- operations management
- production and distribution
- risk forecasting
- procurement analysis.

canterbury.ac.nz/life/jobs-and-careers

Study Operations and Supply Chain Management:

• Bachelor of Commerce

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Pacific Studies

The Pacific region makes up one third of the earth's surface, with diverse communities strong in innovation, Indigenous knowledge, resilience and identity.

You will navigate through the history of the Pacific Ocean and into contemporary issues of politics, climate change, and sustainability across the region, including the transnational nature of Pacific communities.

What will my study involve?

- Study a range of historical and contemporary issues that reflects Aotearoa New Zealand's place in the world as part of the Pacific region.
- Discover and analyse transnational power dynamics, security, and geopolitics.
- Learn about the rich diversity and contemporary issues of the Pacific.

Courses

These courses introduce you to all aspects of Pacific culture, from navigating the Pacific through to relations with neighbouring nations and foreign policies. These courses explore contemporary issues faced by Pacific peoples locally, regionally, and around the world.

Topics can include:

- history, politics and international relations
- identity, cultures and languages
- climate change, resilience and sustainability
- Pacific diaspora communities.

courseinfo.canterbury.ac.nz

Career opportunities

Aotearoa has strong connections with the Pacific islands and our political and multicultural identity is also changing as a result, so there are many different careers this study can lead you to.

Career pathways could include:

- community development
- diplomacy
- education
- archive curation and conservation.

canterbury.ac.nz/life/jobs-and-careers

Study Pacific Studies:

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Painting

Painting studies explores a range of techniques through different styles, tools, and practice, both traditional and contemporary.

You will discover different materials and learn about the role emotion and meaning plays for both the painter and the viewer.

What will my study involve?

- Create a body of work and reflect critically on the development of your own style.
- Enjoy 24-hour access to your own personal studio space from second year.
- Work in purpose-built studios, workrooms, darkrooms, and computer labs, and have access to technician workshops and the llam Campus Gallery.

Courses

The first year of the degree introduces you to studio practice and critical thinking of fine arts. Courses towards the Painting major begin in your second year and allow you to develop your painting technique with many self-directed projects.

Topics can include:

- practice and theory of painting
- art criticism
- art and revolution
- contemporary art.

courseinfo.canterbury.ac.nz

Career opportunities

You will learn skills beyond the processes of painting. Gain critical analysis, teamwork, communication, and organisational skills that will help you in your future career.

Career pathways could include:

- professional artist
- art conservation
- art consulting
- art gallery management.

canterbury.ac.nz/life/jobs-and-careers

Study Painting:

• Bachelor of Fine Arts

Performance

Music studies in Performance develops creative ideas and expression through all styles of music. With rapid growth and cultural shifts in the music industry, professional artists need the skills to be flexible and adaptive performers.

Developing your musical abilities at UC is a unique opportunity to learn from professionals and connect with other musicians and the local arts scene.

Performance Music is based in the UC Arts city campus located in Te Matatiki Toi Ora | Art Centre of Christchurch.

What will my study involve?

- Learn through individual lessons and group classes in a wide range of musical instruments and voice.
- Take advantage of opportunities to join large and small ensembles and the UC Chamber Choir, Consortia.
- You will have plenty of opportunities to perform publicly, with 100+ concerts hosted on campus each year.

Courses

Your first year will teach you essential skills such as sight-reading music and understanding rhythm and tempo, as well as working with an accompaniment and in small or large groups. You will also develop in-depth technical and performance knowledge of your instrument or voice. Topics can include:

- performance
- chamber choir
- ensemble
- art of accompaniment.

courseinfo.canterbury.ac.nz

Career opportunities

People with strong musical talents are always highly sought after by event organisers and arts businesses.

Career pathways could include:

- choirs and orchestras
- musical theatre
- music therapy
- event management.

canterbury.ac.nz/life/jobs-and-careers

Study Performance:

Bachelor of Music

Performance Data Analysis

Performance Data Analysis examines statistical data captured during sporting events to develop game plans and winning strategies.

In this subject, you will learn how to use tracking tools and capture software to observe matches and find ways to improve performance.

What will my study involve?

- Learn how to gather data to forecast results, identify patterns, and track strengths and weaknesses of the opposition.
- Use 3D performance capture technology and other sport science and computer lab equipment within UC's Performance Education and Training Centre.
- Internship experiences within professional sporting teams so you can learn first-hand about implementing advanced tactics and improving performance.
- Earn accreditation using performance analysis software.

Study the basics of sport science and monitoring athletes using different technology so you can go on to developing training methods and gameplay techniques.

Topics can include:

- data analysis software
- biomechanics and physiology
- game plans and strategy
- sport psychology.

courseinfo.canterbury.ac.nz

Career opportunities

Performance analysis is a key part of sports and fitness industries to help make profits from winning matches and competitions.

Career pathways could include:

- performance analyst
- sport coach
- exercise scientist
- sports commentator.

canterbury.ac.nz/life/jobs-and-careers

Study Performance Data Analysis:

• Bachelor of Sport

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

Certificate in Sport Coaching

Philosophy

Philosophy teaches you how to think rationally and carefully about complex questions such as: are drone strikes immoral? What about genetic engineering? Should rich countries give substantially more in overseas aid? Is time travel possible?

These skills are of real value in the workplace and help you to look at a problem from all angles and find out-ofthe-box solutions.

What will my study involve?

- You can choose to specialise in areas such as ethics, bioethics, philosophy of science and technology, cognitive science and the mind, artificial intelligence, and language.
- There are specialised courses on famous figures such as Plato, Descartes, Wittgenstein, and Turing.
- Choose to add an internship to your study, gain work experience, meet potential employers, and build your CV.

Courses

First-year courses cover a broad range of topics to get you thinking critically about the world we live in.

Topics can include:

- the meaning of life and other big questions
- ethics, values, and morality
- science and religion
- artificial intelligence and human philosophy – consciousness, identity, free will.

courseinfo.canterbury.ac.nz

Career opportunities

The intellectual skills that Philosophy teaches leads to success in many different careers. Many sectors increasingly require people who can think independently and creatively, write clearly, apply logic, solve abstract problems, and communicate precisely.

Career pathways could include:

- environmental advisory
- video game design
- ethics policy
- research management.

canterbury.ac.nz/life/jobs-and-careers

Study Philosophy:

- Bachelor of Arts
- Bachelor of Science

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Certificate in Science
- Diploma in Arts
- Diploma in Science

Philosophy, Politics and Economics

If you like to think about the problems and complexities of society, then consider this combination of subjects to develop a multidimensional way of seeing things.

You will learn about political institutions and economic systems, while exploring philosophical fundamentals of ethics and technology, and their impact on individuals and the wider public.

What will my study involve?

 Pick from a variety of courses and customise your study, with examples such as political parties and elections, environmental policy, humanitarian intervention, science and technology policy, and international security and international relations. • Complete an internship or practical project in your final year reflecting your specific interest topics.

Courses

Each year of the degree, you will be able to choose your study focus based on your interests in politics and justice, ethics and morality, and economic systems.

Topics can include:

- global economy
- humanitarian politics and justice
- international trade policies
- black markets and international policing.

courseinfo.canterbury.ac.nz

Career opportunities

This study provides you with vital skills for many national and international political institutions that make decisions about our world economy, from energy supply to imported goods to sustainability.

Career pathways could include:

- non-profit organisations and charities
- policy advisory
- parliament
- city councils.

canterbury.ac.nz/life/jobs-and-careers

Study Philosophy, Politics and Economics:

• Bachelor of Arts

Photography

Explore photography as a device for communicating information, ideas, personal insights, and the basic materials and processes of photographic practice.

What will my study involve?

- Explore photographic techniques, and create your own body of work.
- From second year, you will have access to your own personal 24-hour access studio space.
- Use darkrooms, computer labs, workshops, and the Ilam Campus Gallery.

Courses

First year courses will teach you the basics of studio practice and fine arts. In the second year, you will move onto examining different devices, materials, techniques, and historical influences.

Topics can include:

- photography practice
- photos in history and art revolution
- editing software and photography hardware
- film and theory.
- courseinfo.canterbury.ac.nz

Career opportunities

Photography studies give you unique abilities in communicating information; finding details; and working with a range of people, technologies, and projects.

Careers could include:

- photography
- art gallery management
- photojournalism
- documentary production.

canterbury.ac.nz/life/jobs-and-careers

Study Photography:

• Bachelor of Fine Arts

Physical Activity

Studying Physical Activity in Health Sciences focuses on developing the skills and knowledge needed to help people and communities make healthier choices and become more physically active.

What will my study involve?

- Choose from a variety of health and sport courses such as nutrition, injury and rehabilitation, sporting culture, and team coaching.
- Complete your studies through lectures, practical workshops, assessments in labs, and in the field.
- This subject can be studied as a minor under many different degrees and can be combined with your other study interests.
- You can follow up your studies with a one-year teaching degree to become a qualified health or physical education teacher.

Courses

Throughout your studies, you will be introduced to the biomechanics of exercises, explore the benefits of physical activity on the body, and delve into the sociology and culture of sport.

Topics can include:

- exercise physiology theory and practice
- nutrition programme development
- injury prevention, treatment, and management
- anatomy science.

courseinfo.canterbury.ac.nz

Career opportunities

Studying Physical Activity is a great choice for anyone wanting to help with common health issues and attitudes to fitness. You will gain technical knowledge of exercise and movement science, as well as the management and teaching skills to support people in their wellbeing.

- Career pathways could include:
- health promoter
- physical educator
- sports programme coordinator
- community support worker.

canterbury.ac.nz/life/jobs-and-careers

Study Physical Activity:

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Health Sciences
- Diploma in Health Sciences

Physical Activity and Wellbeing

Physical Activity and Wellbeing studies in the Bachelor of Sport teaches you how to inspire people to move more and improve their physical and mental health.

Explore ways of helping others make healthy choices and improve opportunities and access to sports and physical activities.

What will my study involve?

- Learn how to educate others on caring for their physical health and the benefits this has on the body and mind.
- Develop methods in motivating ourselves to engage in recreational exercise, outdoor adventure, training regimes, and more.
- Study the wider implications of healthy, physical lifestyles on other aspects of society, including relationships, mental health, skill-building, and cultural impact.
- Gain practical experiences working with diverse groups throughout your degree and in encouraging more inclusive and equitable practices in sporting and health industries.

Courses

Learn how exercise and movement benefits our health, and also how wellbeing affects us on a wider scale — our environment, sociology, economy, and culture.

Topics can include:

- anatomy
- Māori health perspectives
- nutrition
- sports psychology teamwork, perseverance, management.

courseinfo.canterbury.ac.nz

Career opportunities

Alongside skills in managing, coaching, and educating others on physical wellbeing, this study also gives you the tools to work towards promoting a healthier Aotearoa on a wider scale.

This kind of expertise could lead to a wide range of careers working with everyday exercises through to professional athletes, or even with sporting or health industry management and programme coordinators. Career pathways could include:

- sports coordinator
- personal trainer
- health educator
- sports psychologist.

canterbury.ac.nz/life/jobs-and-careers

Study Physical Activity and Wellbeing

- Bachelor of Health
- Bachelor of Sport

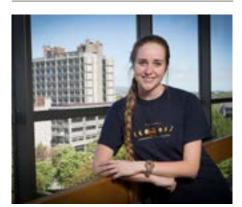

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Health
- Diploma in Health
- Certificate in Sport Coaching

Physics

"UC caters to many areas of Physics and Mathematics so if you are also curious and want to explore more of the physical world then studying those subjects is a great place to start."

Toby Bachelor of Science in Physics and Mathematics Physics explores the behaviour between matter and energy — from subatomic particles to the scale of the universe.

Technology and physics go hand-in-hand, and they improve our lives massively. From computers, architecture to agriculture, modern life is built using the understanding of physics.

Studying this field will prepare you to contribute to major advances in technology now and in the future.

What will my study involve?

- Lab experiments, fieldwork, and computing skills in our state-of-the-art facilities including a nano lab, super conduction magnet lab, cloud chamber, and cryogenics lab.
- UC has contributed much to the field with alumnus like Ernest Rutherford and Beatrice Tinsley, with current research including Medical Physics, Nanotechnology, and Cosmology.

Courses

Your first year will give a broad foundation in modern physics and expand in the following years with training in programming, lab skills, scientific writing, and mathematics.

Good grades in physics and calculus are required for entry into this subject. However, we offer introductory courses for those who don't have a strong background in physics or maths.

Topics can include:

- space and time
- materials science thermodynamics, electromagnetism, and nanotechnology
- quantum mechanics
- experimental physics and astronomy.

Understanding how almost everything works opens up job opportunities in many industries, ranging from experimental research to scientific consulting to building new technology.

Career pathways could include:

- IT and electronic industries
- aerospace
- science centres/museums
- research and development.

canterbury.ac.nz/life/jobs-and-careers

Study Physics:

• Bachelor of Science

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Science
- Diploma in Science

Political Communication

Political Communication is about how we gather, analyse, and translate data on political topics such as international relations, public health risks, economical change, and foreign crises, in order to pass key information along to the public and other stakeholders.

This major is ideal if you want to be a direct part of the political process and help advance social change.

What will my study involve?

- Lead your own industry project or internship within the community.
- Choose courses that shape your communications skills and political knowledge, for example in international politics and relations, economics, and languages.
- Gain training in ethical media practice, including engaging communities, advocacy campaigns, and data analytics.
- Learn from UC's internationally renowned experts in political science, especially in areas such as humanitarian rights and intervention, EU and European politics, Chinese politics, and crisis communications.

Courses

First year will give you a broad introduction to media and communication. From second year, your courses will focus on communicating politics and learning how media can impact public opinions.

Topics can include:

- media and politics
- disaster and crisis communication
- cross-cultural and international media
- campaign project.

courseinfo.canterbury.ac.nz

Career opportunities

Skills in communicating complex information, analysing opinions, and researching important topics will prepare you well for roles in government, non-profit, corporate, and creative communication industries.

Career pathways could include:

- political journalism
- campaign management
- data analysis
- communications.

canterbury.ac.nz/life/jobs-and-careers

Study Political Communication:

• Bachelor of Communication

Political Science and International Relations

Political Science and International Relations is the study of our communities and how we make decisions collectively as governments, why we behave as we do as citizens, and how we make choices and changes for the future.

What will my study involve?

- Analyse how social change happens and how power and resources are allocated, with issues such as development, human rights, environment, nationalism, and foreign policy.
- Study topics are grouped into four areas; international relations, comparative politics (the study of other nations), public policy (how we make choices as communities), and political thought.
- Work with lecturers that are internationally recognised for their academic research and teaching strengths.
- Study a Political Science and International Relations minor alongside several degrees.

Courses

First year courses cover a wide variety of topics across Aotearoa and international politics designed to introduce you to analysing political systems and societies. After the first year, you will choose the direction of your political science studies with courses on economic and social development, international relations, philosophy, and more.

Topics can include:

- public policy
- Aotearoa international relations
- political revolts and uprisings
- global politics and issues (aid, climate change, humanitarianism).

You will gain a variety of skills that can be applied in a wide range of careers both within politics and in more diverse areas such as law, business, education, and journalism.

Career pathways could include:

- policy analysis
- parliamentary office
- foreign affairs
- diplomacy.

canterbury.ac.nz/life/jobs-and-careers

Study Political Science and International Relations:

• Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Diploma in Arts

Population Health Data Science

Population Health Data Science explores the relationships between the physical environment and our health by using data to find patterns and potential solutions to health problems.

This includes using geomapping health data for air quality in urban areas, mapping disease outbreaks in cities, and calculating traffic accidents.

What will my study involve?

- Complete workshops using data science technologies, and a final-year project working alongside local organisations on public health issues.
- Access to state-of-the-art computer and software labs with UC's connections with Manawa Health Hub and research centres such as Te Taiwhenua o te Hauora | GeoHealth Laboratory.

Courses

You will begin your studies learning the basics of data science and geomapping software, and investigate the ways environment and population can affect health and wellbeing of communities. Topics can include:

- origin, distribution, and patterns in disease
- emergency and risk modelling
- spatial data technologies
- economic, social, and cultural processes.
- courseinfo.canterbury.ac.nz

Career opportunities

Data scientists are in demand as it is an area of work that faces significant skills shortages globally. Study in Population Health Data Science provides you with a strong foundation in health sciences with data science methodologies.

With environmental and economic changes affecting the globe, your skills in this degree will help combat our rising health challenges and environmental contamination.

Career pathways could include:

- health researcher
- intelligence advisor
- data scientist
- disaster response advisor.

canterbury.ac.nz/life/jobs-and-careers

Study Population Health Data Science:

• Bachelor of Data Science

Power Engineering

"The EPE Centre organises annual field trips to either the North or South Island to visit parts of the power industry. It provided me with valuable knowledge and insight to the industry early on in my studies."

Danny

Bachelor of Engineering with Honours in Electrical and Electronic Engineering with a minor in Power Engineering

Power Engineering explores power distribution and use. You will learn about different forms of power, specialised systems such as renewable energy, and how power is created.

What will my study involve?

- Practical courses learning about distributing power, building electrical devices, and testing system safety.
- Projects studying, creating, and testing electrical systems like electric go-karts.
- Field trips and research projects through UC's Electric Power Engineering Centre (EPECentre).

Courses

Your study covers the basics of how power is created, stored, and distributed through devices, and explores new renewable energy technologies. Your Power Engineering courses begin in the second year.

Topics can include:

- high voltage testing
- bulk electrical energy
- power and analogue electronics
- circuits and thermal management.

Power engineers will find a lot of work opportunities because of their expertise in both power and energy engineering. Their skills are used in many industries related to the electric power industry.

Career pathways could include:

- power transmission and distribution companies
- electrical manufacturing
- government entities and regulators
- electricity service providers.

canterbury.ac.nz/life/jobs-and-careers

Study Power Engineering:

• Bachelor of Engineering with Honours in Electrical and Electronic Engineering

Primary Teaching

"The degree gave me the theoretical knowledge I needed to get through my three years of study, but also the practical experience."

Thomas Bachelor of Teaching and Learning (Primary)

Teaching and learning is founded on meaningful interactions. Primary teachers work with tamariki in Years 1–8 (ages 5–13) in primary, intermediate, middle, and area schools. Primary Teaching allows you to encourage and discover children's lifelong potential and make a real difference to their lives.

What will my study involve?

- Learn how to teach the Primary curriculum, including mathematics, English, science, technology, social studies, health and PE, art, music, dance, drama, and languages.
- Develop your teacher identity and the skills to be advocates, leaders, and creators of knowledge in the Primary sector.
- Bicultural focus interweaving Māori and Western knowledge and Māori teaching practices, including a noho marae experience and Te reo Māori me onā tikanga courses that will be taught in each year.
- Mentored professional learning experience in primary schools around Aotearoa so you can work with teachers, meet principals, and teach students.

Courses

Our Primary qualifications have four basic components:

Professional Studies and Education

This is where you learn about teaching, including professional codes and standards; assessment; ethics; theories and approaches; fostering positive relationships and learning environments; and the political, social, cultural, and historical contexts of primary education.

You will focus on learners as members of whānau and communities; bicultural education and culturally responsive and sustaining practice; learner development and inclusive education.

Professional Practice

Working in a classroom helps you develop your planning, teaching, and relational skills. Professional Practice introduces you into the complexities of the teacher's role within the classroom, the school, and the wider community. The first year of Ako:BTchLn includes a block teaching placement in Semester 2. The second and third year include a block teaching placement in both semesters. You will spend approximately eight hours a day working alongside an experienced teacher.

In the Graduate Diploma in Teaching and Learning, there are there are 16 weeks of placement, made up of two 8-week blocks, one per semester. You will spend approximately eight hours a day working alongside an experienced teacher during these periods..

Curriculum Studies

These include all curriculum subjects that you will be expected to teach:

- English
- art
- music
- drama and dance
- health and physical education
- mathematics
- science
- technology
- social studies
- learning languages.

Courses will also provide opportunities to design cross-disciplinary and project-based learning experiences.

Te Mana o Te Tiriti o Waitangi

Courses will focus on obligations to Te Tiriti o Waitangi. This includes year-long courses to learn te reo Māori and tikanga Māori for teaching.

courseinfo.canterbury.ac.nz

Career opportunities

A Primary Teaching degree opens up teaching and management job opportunities in primary, intermediate, middle, and area schools.

You will also have transferable skills to roles outside of teaching that involve knowledge of education and learning as well as working with young people.

Career pathways could include:

- primary teaching
- education policy
- community and youth work
- advocacy.

canterbury.ac.nz/life/jobs-and-careers

Study Primary Teacher Education:

- Ako: Bachelor of Teaching and Learning
- Graduate Diploma in Teaching and Learning
- Postgraduate Diploma in Teaching and Learning
- Master of Teaching and Learning

Professional and Community Engagement

Professional and Community Engagement (PACE) courses are all about applying what you learn in your studies to a non-academic "real-world" setting.

PACE is an ideal complement to your degree – take it as a one-off course or as a minor in your degree programme. PACE courses provide an opportunity to give you confidence in the workplace.

What will my study involve?

- Half of PACE courses are held as workshops where you can develop professional skills and half in the workspace where you can put that knowledge to use.
- You will be matched with your internship based on your studies and your interests.
 Past internships include media and communications, event organisation, marketing, health, and policy analysis.

Courses

From second year, you can add a workplace project or an internship to your studies.

Topics can include:

- internship projects (based on your degree subject)
- project management process
- career development portfolio and CV building
- presentation skills.

courseinfo.canterbury.ac.nz

Career opportunities

PACE students have an edge over other graduates. Learning to identify the strengths you bring to the workplace and understanding how your degree has prepared you to work with local and international communities will give you the confidence you need to enter your new career.

canterbury.ac.nz/life/jobs-and-careers

Study PACE:

PACE can be taken as a one-off course in many degrees, or studied as a minor in some degrees. Learn more about PACE on our website.

Psychological Wellbeing

This subject delves into health-related behaviours, developmental disorders, and the science and practice of wellbeing and professional psychological practice.

You will take a holistic view of wellbeing based on latest research, so you can help people and communities thrive.

What will my study involve?

- Explore the behavioural science and stressors behind our mental health and wellbeing issues and how we respond to them.
- Examine and critique the latest research on emerging disorders, assessments, diagnosis, and treatments.
- Gain observation and lab experimentation skills, including a final-year project course in a real-world context.
- Learn about the intersection of culture and psychological wellbeing and examine the impact of your own culture, values, beliefs, and assumptions on professional practice.

Courses

Your courses will focus on understanding current psychological models and research on holistic wellbeing and how these are used by psychologists to help people make positive changes in their lives.

You will also learn about current research into developmental patterns, disorders, and treatments, and distinguishing evidence-based theories from popular misconceptions about mental health.

Topics can include:

- psychological models of wellbeing
- the professional role of psychologists (including ethical and legal responsibilities within development, treatment, and prevention in mental health)
- self-reflection and experiential learning of your own practice.

courseinfo.canterbury.ac.nz

Career opportunities

By learning about the science behind wellbeing, developmental disorders, and the impact of cultural and environmental factors on wellbeing, you will be able to 'see' a person beyond just their symptoms, and offer practical solutions to improve their life.

Career pathways could include:

- counselling
- statistical or clinical research
- clinical psychology
- government and healthcare agencies.

canterbury.ac.nz/life/jobs-and-careers

Study Psychological Wellbeing

Bachelor of Psychological Science

Psychology

"Psychology makes you realise how incredibly complex and intricate but also how fragile our brains are, and how much impact one change can have."

Cameron

Bachelor of Science in Psychology, Master of Science in Psychology

Psychology is the scientific study of behaviour and associated biological, cognitive, and social processes in humans and other animals.

Studying Psychology will explore how the brain works, and looks into theories to gain an understanding of behaviour in individuals and groups.

What will my study involve?

- Explore a range of psychopathologies such as anxiety, depression, and addiction with leading experts and researchers.
- Practical lab work where you will be able to perform physical assessments.
- UC has a Psychology Clinic where you can receive training, and has working relationships with Te Whatu Ora Health | New Zealand Waitaha Canterbury, and Ara Poutama Aotearoa | Department of Corrections, offering opportunities for research and clinical internships.
- Psychology can be studied in many bachelor's degrees, can be customised to your specific preferences, and complement your other studies.

Courses

Begin your studies with the basics of psychology — the science of the brain and personality. Later you will learn more in-depth topics in psychology and develop your data and analytical skills.

Topics can include:

- biological psychology
- social change and learned behaviours
- neurodiversity
- forensic and criminal psychology.

courseinfo.canterbury.ac.nz

Career opportunities

Studying Psychology at UC will open up careers in many different fields due to the unique set of skills you learn. Further postgraduate study can lead to professional registration as a child and family psychologist or clinical psychologist.

Career pathways could include:

- police, corrections, and other public sectors
- district health boards
- public relations and marketing
- social service agencies.

canterbury.ac.nz/life/jobs-and-careers

Study Psychology:

- Bachelor of Arts
- Bachelor of Health
- Bachelor of Science

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Certificate in Health Sciences
- Certificate in Science
- Diploma in Arts
- Diploma in Health Sciences
- Diploma in Science

Psychology for Common Good

Be introduced to the psychology behind environmental, social, and cultural behaviours that influence us as a collective, and learn how to change them.

Your study will explore a range of behaviours including interactions through social media platforms, stress, psychopathology, relationships through an Aotearoa lens and wider worldviews.

What will my study involve?

- Explore factors that change how people feel and interact with the world — from personal health and environment to global effects such as economics, and politics.
- Learn how we can create solutions to large-scale issues that affect our collective psychological wellbeing, such as exposure to social media and online culture, climate change, and security.
- Use psychological practice and research to find ways to support quality of life changes, such as promoting healthy habits, coping with stress, and advocating for vulnerable communities.
- Gain real-world experience through a final-year project addressing a community issue.

Courses

Your studies will focus on the intersection between behavioural science and our wider environment, developing a strong foundation on personal and socio-cultural factors and how they influence thoughts and behaviours. You will also gain professional skills through projects and practical assessments.

Topics can include:

- principles of behaviour change
- promoting healthy habits and mental health awareness
- macro-scale issues and global wellbeing like climate change, national identity, social movements
- social media influence.

courseinfo.canterbury.ac.nz

Career opportunities

Your knowledge of physical and mental health trends across large groups and communities will make you especially useful in roles that work towards creating awareness through research and programmes at personal and higher levels including global efforts for change.

Career pathways could include:

- counselling
- government consulting and research
- advocacy
- strategy and policy work.

canterbury.ac.nz/life/jobs-and-careers

Study Psychology for Common Good:

• Bachelor of Psychological Science

Public Health

"If you've got a lot of ambition then definitely give Health Sciences a go!"

Romana Bachelor of Health Sciences in Public Health and Policy

Public Health is the study of human health and wellbeing, specifically in how we promote health within populations and protect them from risks.

What will my study involve?

- Gain a strong foundation in health sciences, with detailed knowledge in public health, including impact and ethics.
- Take a look at how health programmes are delivered through an internship course in your final year.
- On successful completion of your degree, you will meet the Aotearoa New Zealand competencies for public health, and health promotion (endorsed by Rūnanga Whakapiki Ake i te Hauora o Aotearoa | Health Promotion Forum of New Zealand).

Courses

First year courses will introduce you to the global health challenges we face. You will learn about health and development, environmental change, chronic conditions, and infectious diseases.

Topics can include:

- global health
- health systems and policy
- environmental and occupational health
- health planning.

courseinfo.canterbury.ac.nz

Career opportunities

This subject prepares you with the skills needed to work in the public health sector or community development, and be part of multidisciplinary teams.

Career pathways could include:

- public health advisor
- National public health service
- Māori and Pacific health organisations
- public health analyst.
- canterbury.ac.nz/life/jobs-and-careers

Study Public Health:

- Bachelor of Health Sciences As a Minor:
- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Health Sciences
- Diploma in Health Sciences

Russian

Russian is spoken by over 150 million people, and is one of the six official languages of the United Nations. The opening of Eastern Europe and the former Soviet Union since the Cold War has seen growth opportunities in independent trade, the entertainment industry, and international business.

What will my study involve?

- Learn Russian and take courses in Russian history from the middle ages to the present day, including literature, film, and culture.
- Study the only major in Russian in Aotearoa, or combine a minor in Russian with a wide variety of bachelor's degrees.

Courses

Our language courses teach elementarylevel Russian through to advanced level. From second year, you can begin classes that explore the social, political, and cultural history of Russia, such as the Space Race and aerospace engineering.

If you know some Russian, then you may be given direct entry into second-year courses. Topics can include:

- World War history
- the Tsardom of Russia
- Stalinism
- Russia and 21st century politics.

courseinfo.canterbury.ac.nz

Career opportunities

By learning a second language, you open yourself up to a wide variety of careers within Aotearoa and abroad. Russian in particular presents a unique opportunity to be a part of one of the most populous European countries that continues to make world history.

Career pathways could include:

- translation and interpreting
- international relations
- foreign policy
- journalism.

canterbury.ac.nz/life/jobs-and-careers

Study Russian:

• Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Certificate in Languages
- Diploma in Arts
- Diploma in Languages

Screen Sound

Sound is a core element for a range of media, from film to video games and everything in between. Sound effects, voice, and digital music all work together to enhance and make your story memorable.

Studying Screen Sound will include handson experience with industry standard audio equipment to learn about recording audio, post-production processes, and techniques for sound mixing.

What will my study involve?

- Learn the processes behind recording, sourcing digital music, and editing sound for films, television, and video games.
- Work with the latest industry standard software, studio equipment, and recording hardware.
- Work on projects throughout your degree and graduate with your own portfolio of works.
- You will have access to sound recording studios, sound stages, voice-over and dubbing studios, and other facilities.

Courses

Screen Sound courses will introduce the technical skills around audio technologies for recording and mixing sound, as well as the theory behind sound for digital media, such as psychoacoustics and dramatic effect.

Topics can include:

- character themes and sound motifs
- foley work, dubbing, and other postproduction sound editing
- on-set audio recording
- effects, dialogue, and ambience.

courseinfo.canterbury.ac.nz

Career opportunities

Your studies will prepare you for operating in multiple different sound environments and media. You will also be able to keep up with the latest trends in the industry such as 3D recording, editing software, and audio hardware.

Career pathways could include:

- foley recording
- production sound mixing
- digital music creation
- sound editing.
- canterbury.ac.nz/life/jobs-and-careers

Study Screen Sound:

- Bachelor of Digital Screen with Honours As a Minor:
- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Screenwriting

A good story leaves a lasting impression, and can even transform the way we view our own lives. Having the ability to write engaging characters, riveting plotlines, and complex worlds is one of the most creative skills we can have.

Screenwriting studies will teach you to create your own screenplays, from structure and formatting to tying elements of a story together.

What will my study involve?

- Develop your own scripts and screenplays, including structure, character development, storyboarding, lore, and world-building.
- The final year of study is dedicated to creating a commercial quality creative project for the digital screen.
- You will have access to a range of filming, design, and computer lab spaces for you to collaborate with other students on creative projects.

Courses

Your courses first teach you how to construct short screenplays with story structure and development, character arcs, and themes. Throughout the rest of the degree, you will learn how to write feature-length stories, adaptations, episodic series, game cutscenes, and entire cinematic worlds. Topics can include:

- dramatic writing techniques like foreshadowing and cliffhangers
- adapting novels, biographies, and more
- subverting genre and tropes
- world-building and lore.
- courseinfo.canterbury.ac.nz

Career opportunities

Your studies will develop your writing skills so you can cross genre and media platforms, and have the adaptability to work with other industry professionals.

Career pathways could include:

- screenwriting
- advertising and copy writing
- creative producing
- creative consultancy.

canterbury.ac.nz/life/jobs-and-careers

Study Screenwriting:

- Bachelor of Digital Screen with Honours As a Minor:
- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Sculpture

With Sculpture studies, you will explore time, space, and context behind crafted objects.

Build your artistic practice through the use of different materials, processes, theories, and contemporary techniques.

What will my study involve?

- Create your own body of works and sculptural projects.
- From second year, you will have 24-hour access to your own studio space where you are able to explore your personal and academic creativity.

• Make use of purpose-built studios, workrooms, technical workshops, and the Ilam Campus Gallery.

Courses

You will start your degree learning the basics of fine arts theory and studio practice, before beginning Sculpture from second year and learning to use different materials and processes.

Topics can include:

- sculpture practice
- great sculptural works in history
- technical workshop hardware
- audience observation and influence.

courseinfo.canterbury.ac.nz

Career opportunities

Along with experience and technical skills working with different tools and materials, university studies in Sculpture gives you an opportunity to make industry connections, explore art spaces, and grow your practice in new ways.

Career pathways could include:

- sculpting
- designing
- art gallery management
- art consulting.

canterbury.ac.nz/life/jobs-and-careers

Study Sculpture:

• Bachelor of Fine Arts

Secondary Teacher Education

Secondary Teacher Education offers you an exciting and rewarding career teaching and creating a positive impact on the youth of Aotearoa, in subjects of your choosing. Secondary teachers work with young adults in Year 7-13, ages 11-18 years. To complete this subject, you will need to already have an Aotearoa New Zealand bachelor's degree. Upon graduation, you will be able to apply for teacher registration.

Alternative Entry Pathway

UC also offers an alternative entry pathway into the Graduate Diploma in Teaching

and Learning (Secondary endorsement) in Technology and Te Reo Māori. .

What will my study involve?

- Key skills in managing a classroom, presenting lessons, and supporting the different ways people learn.
- Focus your teaching on your intended secondary school subject from a wide range of options — art to chemistry to te reo Māori.
- Mentored professional learning experience in secondary schools around Aotearoa so you can work with practising teachers, meet principals, and teach directly to students.
- Bicultural focus interweaving Māori and Western knowledge and Māori teaching practices, including a noho marae experience and Te Reo Māori me onā tikanga courses.

Courses

UC's secondary teaching degrees include professional teaching practice, learning methods, NCEA assessment standards, and teacher preparation in your specialised teaching subject.

Secondary Teacher Education is made up of courses in the following areas of study:

Professional Studies and Education

This is where you learn about teaching, including professional codes and standards, assessment, ethics, theories and approaches, fostering positive relationships and learning environments, and the political, social, cultural, and historical contexts of secondary education. You will focus on learners as members of whānau and communities; bicultural education and culturally responsive and sustaining practice; learner development and inclusive education.

Professional Practice

The school-based requirement of the programme is where you'll gain skills and experience in the classroom.

In the Graduate Diploma in Teaching and Learning, there are there are 16 weeks of placement, made up of two 8-week blocks, one per semester. You will spend approximately eight hours a day working alongside an experienced teacher during these periods.

Curriculum Studies

Courses focus on the essential learning areas of the New Zealand Curriculum, including curriculum statements, subject assessment standards and practices, teaching approaches, and curriculum resources. They also focus on contemporary curriculum developments and approaches for integrated teaching and learning across subjects.

You will hone your skills for teaching, including communication and presentation skills, design for learning, managing positive learning environments, and use of technology in education and e-learning.

Te Mana o Te Tiriti o Waitangi

Courses will focus on obligations to Te Tiriti o Waitangi. This includes year-long courses to learn te reo Māori and tikanga Māori for teaching.

Secondary Teacher Education – teaching subjects

For our secondary teacher qualifications, you will need to choose a teaching subject (refer to the list below) and have an academic background in this subject to 300-level. If you have study in another teaching subject area (to 200-level), you can include this as an additional teaching subject in the qualification. If you do not have study in a second teaching subject area, we offer a range of courses that you can select from to meet qualification requirements.

We offer the following teaching subjects:

- Art
- Biology
- Chemistry
- Classical Studies
- Commerce
- English
- Geography
- Health
- History
- International Languages
- Mathematics
- Music
- Outdoor and Environmental Education
- Performing Arts
- Physical Education
- Physics
- Te Reo Māori
- Technology

For queries about study pathways and suitable teaching subjects, please contact our Faculty Student Advisors at: canterbury.ac.nz/study/academic-study /education/contact-education

Career opportunities

After completing one of our programmes, you will be eligible to apply for provisional registration as a secondary school teacher and can apply for teaching positions in Aotearoa New Zealand schools and in many countries around the world.

A teaching degree also prepares you for roles in school leadership, business management, and services that involve training and working with youth and other people.

Some career pathways could include:

- Secondary teaching
- Public sector
- Human services
- Industry training.

canterbury.ac.nz/life/jobs-and-careers

Study Secondary Teacher Education:

- Graduate Diploma in Teaching and Learning
- Postgraduate Diploma in Teaching and Learning
- Master of Teaching and Learning

Social Action, Community and Global Development

Help solve some of the major issues we are facing globally with studies on environmental, social, and political change.

Learn how to create campaigns that deal with problems caused by the ways we interact with the environment, from the hunger crisis to global poverty, renewable energy to pollution, city development to climate change.

What will my study involve?

- Develop real social movements and awareness projects through an internship.
- Study a wide range of optional courses from sociology and psychology, politics, international relations, media, geography, environmental studies, and community development.

 Customisable major so you can follow your interests on global or local social issues, communities, and environmental problems.

Courses

Choose from a variety of courses that introduce you to sustainability issues and how to create solutions to these, whether through official channels, media awareness, community engagement, or beyond.

Topics can include:

- environmental and human health
- policy
- international aid
- global sustainability campaigns.

courseinfo.canterbury.ac.nz

Career opportunities

Awareness of global issues, and skills in project management, leadership, communication, and critical analysis will equip you to make real and meaningful changes to our environmental and human systems, and empower others.

Career pathways could include:

- politics
- non-profit sector
- human services
- humanitarian aid programmes.

canterbury.ac.nz/life/jobs-and-careers

Study Social Action, Community and Global Development:

 Bachelor of Social and Environmental Sustainability

Social Activism

Social Activism uses your passions and experiences to make positive changes for others. Studying this pathway will teach you how to recognise inequality and inequity, to help those who are disadvantaged or mistreated, and to raise awareness on issues that need more support at a higher political level.

What will my study involve?

• Explore social issues like ethnicity, gender, sexuality, and class that can lead to inequities in education, political power, and opportunity.

- Become a leader in social and community settings to drive social change in local, national, or international communities.
- Customise your degree with courses in other subjects so you can prepare to tackle the social issues you care about most.
- Act now with off-campus and hands-on projects and internships about climate change, youth health and wellbeing, human trafficking, and the Rainbow community.

Courses

The courses in this pathway will introduce you to the powerful effects of community action, volunteering, policy, and media awareness towards social issues, and give you opportunities to learn about Aotearoa and global-scale movements.

Topics can include:

- Aotearoa politics
- media impact on public opinions, politics, and history
- social transformation
- global powers and processes.

courseinfo.canterbury.ac.nz

Career opportunities

Finding solutions, advocating for others, and actioning change are all unique abilities that this study will train you to have.

Career pathways could include:

- human rights advocacy
- community engagement
- political campaigner
- lobbyist.

canterbury.ac.nz/life/jobs-and-careers

Study Social Activism:

- Bachelor of Youth and Community Leadership
- Certificate of Youth and Community Leadership

Social Entrepreneurship

This pathway is the perfect option if you wish to make an impact on social needs through entrepreneurship. You will develop leadership skills paired with key insights in marketing, management, and social entrepreneurship.

What will my study involve?

- Learn leadership skills and how to create a product, business, service, or campaign idea that will make positive changes to our communities.
- Act now with off-campus and hands-on projects and internships so you can start making change while studying (e.g., addressing topics such as climate change, young people's health and wellbeing, human trafficking, and planning events for the Rainbow community).
- Connect with Te Pokapū Rakahinonga | UC Centre for Entrepreneurship to get mentoring, resources, and contacts in creating your business ideas.

Courses

The first year in this pathway introduces you to leadership and management skills, as well as looking at case studies in Ōtautahi Christchurch of how volunteering and community-led projects have made a real difference. There are many course options to focus your degree towards your ideal career in social entrepreneurship.

Topics can include:

- community activism
- markets, consumers, and sustainability practices
- business management
- global business ethics.

courseinfo.canterbury.ac.nz

Career opportunities

Alongside business knowledge, an awareness of social campaigns, sustainability goals, and ethical values of consumers and communities will make you a unique leader in the corporate industry.

Career pathways could include:

- advocacy
- campaign and event management
- entrepreneur
- business consulting.

canterbury.ac.nz/life/jobs-and-careers

Study Social Entrepreneurship:

- Bachelor of Youth and Community Leadership
- Certificate of Youth and Community Leadership

Social Work

Social workers help people to overcome personal and institutional barriers to wellbeing and achieve their full potential. They work with individuals, families, groups, and organisations in a wide range of contexts.

Studying Social Work is a great option to consider if you are interested in working in a people-focused career. Professionally trained people are needed in increasing numbers to work in the social services, nationally and internationally.

What will my study involve?

- Learn about a wide variety of topics such as mental health, child welfare, criminal justice, ageing, violence and abuse, and gender and sexuality.
- Small, interactive classes so you can work closely with staff and other students.
- Practical learning throughout the degree, with 75% of your final year in fieldwork placements within social service agencies around Aotearoa.
- The Bachelor of Social Work with Honours is recognised by Kahui Whakamana Tauwhiro | New Zealand Social Workers Registration Board (SWRB) and internationally so you can work overseas.

Courses

The first year of the Social Work degree will introduce you to Social Work services and practices in Aotearoa. The later years of the degree will go into more complex topics so you can analyse and debate on current issues within Aotearoa such as welfare systems, discrimination, domestic abuse, and mental health.

Topics can include:

- social services
- social policy
- realities that current youth face
- work placements and social work practice.

courseinfo.canterbury.ac.nz

Career opportunities

The combination of theory and practice sets you up with the values, knowledge, and skills needed to work in the social work profession. You may go on to working directly with affected people, or on to social sector policy and make changes within the overall system.

Career pathways could include:

- social work
- policy analyst
- community development
- youth work.

canterbury.ac.nz/life/jobs-and-careers

Study Social Work:

• Bachelor of Social Work with Honours

Society, Diversity and Change

Society, Diversity and Change focuses on the complex issues that form around community, identity, and social revolutions.

Studying this subject will challenge your thinking about the world and the people who live in it, and equip you to create positive changes.

What will my study involve?

- Understand how issues such as education, social status, ethnicity, and gender relate to and affect equity in society with UC's research speciality in services, activism, and youth work.
- Develop actionable skills to improve local and global movements and challenges of your choice with a final-year internship placing you in the workplace.

Courses

Through the courses in this programme, you will be able to explore diversity and equity outcomes that affect you or best suit your interests. The final year also presents an opportunity to gain real-world experience through an internship.

Topics can include:

- equality vs equity
- online spaces and homogenised culture
- youth and developing identities
- poverty and the increasing wealth gap.

Career opportunities

Your studies will help you learn how we can improve equity outcomes by generating social transformation. This can lead to a variety of career options working with and on behalf of others, from human services to advocacy to politics.

Career pathways could include:

- civil services
- youth work and development
- professional training and education
- non-profit sectors.

canterbury.ac.nz/life/jobs-and-careers

Study Society, Diversity and Change:

• Bachelor of Arts

Sociology

"Completing a social science degree has exposed me to the world and now I have a craving to explore it further."

MahMah

Bachelor of Arts in Anthropology and Sociology, Bachelor of Arts with Honours in Anthropology, PhD in Anthropology

Take a look at the modern world and how it came to be the way it is. Sociologists investigate the structure of societies, organisations, groups, and everyday lives.

This subject can cover a range of social contexts including the intimacy of families, criminal gangs, activities at a rugby game or rock festival, through to divisions of ethnicity, gender, and class.

What will my study involve?

• Take courses as diverse as crime and justice, religion, health, gender and sexualities, death, and migration.

- Flexible course options so you can study a field of Sociology that suits your specific interests.
- Courses are hands-on and you will have the opportunity to do meaningful research, to create and analyse evidence, and to draw your own conclusions.

Courses

First year Sociology courses are designed to explore people and society and introduce you to the process of analysis.

Topics can include:

- history of gangs in New Zealand
- global society
- crime and justice
- ethnicity, racism, and history.

courseinfo.canterbury.ac.nz

Career opportunities

The broad skills gained from a Sociology major such as research, writing, critical thinking, and communication are all highly valued by employers. You will be able to apply your core Sociology learnings to different aspects of life and work.

Career pathways could include:

- human resources
- marketing, media, and public relations
- policy analysis
- social research.

canterbury.ac.nz/life/jobs-and-careers

Study Sociology:

• Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
 Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Diploma in Arts

Software Engineering

"Software engineering is so open to the imagination. It's a constantly changing field."

Sarah Bachelor of Engineering with Honours in Software Engineering

Our society heavily relies on software or software-based systems, for example in transportation, telecommunications, health, and avionics.

Software systems can have a high degree of complexity, often consisting of millions of lines of code produced by large teams of software engineers or developers. We critically depend on timely and costeffective completion of software systems, and on their reliable and efficient operation.

To meet all these goals, a disciplined approach is needed to design, create, operate and deliver software systems under real-world constraints (economical, ethical, technical, legal).

What will my study involve?

- Work on challenging team-based projects, sometimes with industry.
- Benefit from our specially-designed computer laboratories and software as well as access to a specialist Te Puna Pūkaha me te Pūtaiao | Engineering and Physical Sciences library.

Courses

You will study a range of foundational courses in Computer Science and Engineering, and carry out practical work through a series of projects. Topics can include:

- foundations in computer science, including machine learning and cybersecurity
- human-computer interaction, including augmented and virtual reality
- operating systems and embedded systems
- software development and processes.

courseinfo.canterbury.ac.nz

Career opportunities

Software engineering is a widely applicable discipline — graduates are not only needed in software companies, but also in many industries whose products involve significant amounts of software, such as finance, agriculture, health, education, and more. Due to the advancing field of Software Engineering, you will be able to work anywhere in the world.

Career pathways could include:

- software engineer and developer
- software architect
- game developer
- IT consultant.

canterbury.ac.nz/life/jobs-and-careers

Study Software Engineering:

• Bachelor of Engineering with Honours

Spanish

Spanish is as universal as English with the largest concentrations of speakers in Spain, Latin America and the USA.

Learning Spanish will not only open you up to their beautiful cultures, but also to job opportunities in many parts of the world.

What will my study involve?

- Staff will work closely with you in your language and Hispanic culture classes.
- Option to do an exchange with a Spanish university where you can practise your language and culture skills by studying abroad.
- You can study Spanish within a range of different bachelor's degrees, or you can also add a certificate or diploma in Spanish language alongside your other studies.

Courses

No prior knowledge is needed to study Spanish at UC. You can start with elementary Spanish in your first year, then advance from there.

Spanish courses will give you an insight into the mix of old and new traditions that form Spanish-speaking cultures.

If you know some Spanish already, then you may be given direct entry into second-year Spanish courses.

Topics can include:

- film and music
- different cultures of the Spanishspeaking world
- conversation
- civilisation and culture.

courseinfo.canterbury.ac.nz

Career opportunities

Through your studies you will learn skills in intercultural communication, as well as growing your understanding of the way global interactions shape society.

Career pathways could include:

- interpreting and translation
- international law
- policy analysis
- journalism.

canterbury.ac.nz/life/jobs-and-careers

Study Spanish:

• Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Certificate in Languages
- Diploma in Arts
- Diploma in Languages

Spatial Data Science

Spatial Data Science is an emerging field that combines art and science to explore spatial geographical data through visual and computational technologies to understand why activities and events occur in certain environments or spaces.

You will gain knowledge in Geographic Information Science (GIS) including using digital cartography, remote sensing, geomapping, and other visual data interfaces to interpret and analyse insights from the data. This can be helpful in conducting search and rescue operations, predicting potential disaster outcomes, planning smart cities, and more.

What will my study involve?

- Gain skills in spatial thinking and reasoning, analysis using computation tools, advanced programming and coding, and in using geographic data software.
- You will have access to computer and software labs, and conduct fieldwork at UC's field stations in Cass and Kawatiri Westport, or climate stations in Kā Tiritiri-o-te-moana Southern Alps and throughout Te Waipounamu South Island.
- Benefit from our research centres that utilise spatial data sciences, with specialist centres including Toi Hangarau | Geospatial Research Institute, and Te Pokapū Pūhanga Wāhi | Spatial Engineering Research Centre.

Courses

First-year courses will introduce you to the processing, analysis, and visualisation of spatial data.

Topics can include:

- digital maps and 3D visual data
- prediction and forecasting
- remote sensing for unmanned vehicles eg, drones, self-driving cars
- social and physical effects on the earth's surface.

courseinfo.canterbury.ac.nz

Career opportunities

There is a high demand for graduates with data science skills. Spatial Data Science is utilised throughout government organisations and industry sectors including finance, retail, construction, and the primary sector. You can apply the knowledge and practical skills you gain through this major to social and health services, government, transportation, research, marketing, and many more areas.

Career pathways could include:

- space matter analyst
- smarter cities planner
- endangered species migration mapping
- search and rescue operations.

canterbury.ac.nz/life/jobs-and-careers

Study Spatial Data Science:

• Bachelor of Data Science

Speech and Language Pathology

Speech and Language Pathology studies human communication, how it develops, and the many differences and difficulties that children and adults experience.

Speech-language therapists/pathologists work with premature infants, children who have difficulty communicating and learning, and adults who have lost their ability to communicate through stroke, brain injury, degenerative disease, or other reasons.

What will my study involve?

- A hands-on qualification, where you will work with real patients of all ages, through clinical experience at speechlanguage clinics, hospitals, retirement homes, and schools around Aotearoa. There are also opportunities for overseas and clinical placements.
- UC has its own speech-language clinics, giving you experience with clients right on campus.
- The degree is Aotearoa New Zealand's most established, having trained most of the country's speech-language pathologists and being the first to be accredited by Te Kāhui Kaiwhakatikatika Reo Kōrero o Aotearoa | New Zealand Speech-language Therapists' Association.

Courses

The degree starts by giving you the basics of human anatomy for throat and hearing mechanisms, as well as how people develop their communication skills and disorders that hinder quality of life. The following years of the degree go more in-depth with these topics and more.

Topics can include:

- · speech, hearing, and swallowing
- communication and language learning
- voice disorders
- clinical placements.

courseinfo.canterbury.ac.nz

Career opportunities

The skills you gain in this degree will set you on a career helping others with their wellbeing, either directly as a clinician, or through administration and research, or even in creating new assistive communication devices.

Career pathways could include:

- speech-language therapist
- audiologist
- paediatrics
- rest home care.

canterbury.ac.nz/life/jobs-and-careers

Study Speech and Language Pathology:

- Bachelor of Speech and Language Pathology with Honours
- Diploma in Science

Sport Coaching and Physical Education

Sport Coaching and Physical Education studies gives you the opportunity to lead and inspire others in their learning development, sporting activities, and towards their greatest potential.

You will develop a strong understanding of pedagogy (the practice of teaching and training) and how people learn, and consider sport and health from sociological perspectives to see how gender, age, ethnicity, and geography can change and challenge experiences.

What will my study involve?

- Practical studies developing your coaching practice – from teaching sports to training techniques to game strategy.
- Choose your sport to focus on, including team and individual sports.
- Experiences throughout study with field trips, placements, and internships within sporting organisations and educational programmes.
- Pathway to registering as a physical education or health education teacher at primary and secondary schools through a one-year graduate teaching degree.

Courses

Your studies will focus on developing your coaching abilities to instruct others on fitness, skills, and practice.

You will also get to explore sports and sporting culture in Aotearoa, such as health education, inclusivity and accessibility, and emerging technologies in sport.

Topics can include:

- nutrition
- physiology
- health education
- biomechanics.

courseinfo.canterbury.ac.nz

Career opportunities

This degree prepares you for coaching at all levels, from young children discovering sport through to professional teams and athletes competing on the world stage.

Career pathways could include:

- sport coach
- fitness instructor
- physical education teacher
- team manager.

canterbury.ac.nz/life/jobs-and-careers

Study Sport Coaching and Physical Education:

• Bachelor of Sport

Other pathways:

• Certificate in Sport Coaching

Sport Management

Sport managers need to have a varying set of skills and be aware of best practices for the management of people, club and sporting events.

The Sport Management minor aims to upskill your other studies with specific knowledge around managing business processes in the sports industry.

What will my study involve?

- Learn end-to-end business processes in the sports industry, from financing to recruitment to creating a team brand.
- Develop strategies in management, team structure, and game theory to motivate your team towards success.
- Gain business knowledge of behind-thescenes processes, such as connecting with sponsors and coordinating games and major events.
- Work experiences and an internship in your final year leading real sports teams.

Courses

Your studies will explore the management side of sport and recreation. This involves planning, organising, leading and controlling projects, events and organisations in sport-related settings.

Topics can include:

- sport, business and governance
- management and leadership
- organisational behaviour and human resource management
- sport coaching and leadership.

courseinfo.canterbury.ac.nz

Career opportunities

This subject will expand your degree with business skills related to the sport and recreation sectors.

Career pathways could include:

- recreation manager
- fitness manager
- athletic director
- sport agent.

canterbury.ac.nz/life/jobs-and-careers

Study Sport Management:

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

Certificate in Sport Coaching

Sport Marketing and Management

Sport Marketing and Management study explores the business of sport and how it has grown into a massive profit-making industry across the world.

Gain insight into all the inner workings of the sporting industry, including recruiting athletes, merchandising, events and promotions, and more.

What will my study involve?

- Learn end-to-end business processes in the sports industry, from financing to recruitment to creating a team brand.
- Develop strategies in management, team structure, and game theory to motivate your team towards success.
- Gain business knowledge of behind-thescenes processes, such as connecting with sponsors and coordinating games and major events.
- Work experiences and an internship in your final year leading real sports teams.

Courses

Your courses begin with an overview of sports as a business model, and the basics of managing people, projects, and creating a marketable brand.

As you continue in the degree, you will have more flexibility to focus your studies on

different topics in general management and marketing, as well as specific topics related to sports leadership and business opportunities. Topics can include:

- organisational behaviour
- marketing and management
- promotions, sponsors, and fundraising
- sport, business, and governance.

courseinfo.canterbury.ac.nz

Career opportunities

This degree will expand your sporting knowledge with business skills so you can go into professional leadership positions, from leading a club all the way up to a national sport organisation.

There is an increasing need for more graduates at all levels with knowledge of marketing and management in the sports industry.

Career pathways could include:

- team manager
- brand manager
- events coordinator
- sports executive.

canterbury.ac.nz/life/jobs-and-careers

Study Sport Marketing and Management:

Other pathways:

• Certificate in Sport Coaching

Sports Studies

Sports Studies is a great opportunity to combine your passion for sports with your other studies. This flexible minor allows you to focus on any aspect of sports and physical activity, and includes practical experiences and internships.

- Study all things sports, from history, science, strength and conditioning to marketing and management, nutrition and performance data analysis.
- Choose your topics and focus on sports of your choice, including team and individual sports.
- Minor in non-sport degrees so you can focus on your sporting interests in combination with many other fields of study.

Our courses cover a range of themes in sport including health promotion, business and marketing, psychology, and te ao Māori.

Topics can include:

- sport coaching and leadership
- biomechanics and anatomy
- nutrition and exercise
- marketing and consumer behaviour.

courseinfo.canterbury.ac.nz

Career opportunities

Your study could lead to many different careers working with clients or athletes in the gym, field, classroom, competitive stage, and the great outdoors.

Career pathways could include:

- sports coordinator
- gym and fitness instructor
- youth coach
- personal trainer.

Study Sport Studies:

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Youth and Community Leadership

Statistics

Statistics makes sense of data using mathematical modelling to explain what is observed and to predict what is yet unknown.

There are many areas in which statistics helps us to understand what is going on and to predict what is likely to happen in the future, from climate change to the economy to medicine.

What will my study involve?

- Learn statistical processes and techniques, including collecting data, choosing methods, and communicating results.
- Take part in research and projects while working with visiting experts, research centres, and potential employers.
- Study Statistics in a wide range of degrees to add data knowledge to your other interests.

Your first-year courses are introductory and will teach you the basics of statistics, including maths and computer programming. You will get to choose your courses in the later years from a range of topics from algorithms to interpreting datasets to completing your own statistics work projects.

Topics can include:

- software training (eg, R, Python, and Julia)
- computer modelling
- prediction and probabilities
- sampling and survey methods.

courseinfo.canterbury.ac.nz

Career opportunities

Statistics opens up career possibilities in many industries such as finance and insurance, business, government, and research. These institutions and companies are looking for people able to collect the relevant data, model it, and communicate the results.

Career pathways could include:

- epidemiologist
- GIS expert
- data analyst
- risk surveyor.

canterbury.ac.nz/life/jobs-and-careers

Study Statistics:

- Bachelor of Arts
- Bachelor of Science

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Certificate in Science

Strategy and Entrepreneurship

Strategy and Entrepreneurship focuses on the overall development of businesses, involving the process of identifying objectives, developing plans to achieve these, and allocating resources in order to grow business.

- Learn to recognise opportunities and develop core business skills in planning, project management, and teamwork.
- Explore business at all levels, including individually-owned small businesses, social enterprise, high-tech startups, and large corporations using innovation to gain advantage.
- Gain real-world experience and make connections with businesses and the community through business case competitions.
- UC is home to Te Pokapū Rakahinonga UC Centre for Entrepreneurship — join a community of like-minded students and staff, access useful resources, learn how to set up a new business venture, gain experience, or take on an internship.

Courses will introduce you to core business skills, decision-making, and organisational processes, with opportunities to tailor your studies towards international markets, social endeavours, and becoming an entrepreneur.

Topics can include:

- adapting business to change
- managing innovation
- Aotearoa business sector on the global stage
- founding a business or product idea.

courseinfo.canterbury.ac.nz

Career opportunities

With a real-world focus on internships, competitions, entrepreneurship, and community involvement, you will have the skills needed to work in a wide range of sectors.

Strategy planning is the highest skill level of management and is usually performed by an executive team in an organisation, which demonstrates just how far you can get with this degree in the corporate world.

Career pathways could include:

- entrepreneur
- marketing specialist
- management consultant
- business analyst.

canterbury.ac.nz/life/jobs-and-careers

Study Strategy and Entrepreneurship:

• Bachelor of Commerce

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and
 Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Commerce
- Diploma in Commerce

Strength and Conditioning

Strength and Conditioning will teach you to train and help people achieve health and performance goals.

Develop strength and conditioning training programmes that boost performance and recondition athletes and teams towards their best.

What will my study involve?

- Measure athletic performance, test training methods, and plan injury recovery.
- Practice developing your skills in our new Performance Education and Training Centre, which includes a specialised strength and conditioning facility and 3D performance capture technology.
- Internships with sport organisations and athletes.
- Gain the knowledge and skills required to sit the National Strength and Conditioning Association (NSCA) accreditation exams.

Courses

The courses in this programme will train you to work with anyone developing their fitness and wellbeing, including people with specific needs or injuries, professional athletes, and everyday clients.

Topics can include:

- injury rehabilitation
- technologies for measuring performance
- nutrition
- physiology.

courseinfo.canterbury.ac.nz

Career opportunities

Helping others to achieve their peak athletic performance is a rewarding career, and is in demand within sporting, military, and protective service industries.

Career pathways could include:

- strength and conditioning coach
- personal trainer
- rehabilitation advisor
- sport scientist.

canterbury.ac.nz/life/jobs-and-careers

Study Strength and Conditioning:

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

• Certificate in Sport Coaching

Structural Engineering

Structural Engineering explores how buildings and other structures endure disasters, like earthquakes, fires, and storms.

With big issues like climate change, structural engineers need to create resilient infrastructure and specialised solutions, whilst juggling the demands of aesthetics, environment, cost, and materials.

What will my study involve?

- Practical coursework designing, building, testing, and analysing building structures, including research project work.
- Use UC's Structural Engineering Lab (SEL) the most modern educational facility in seismic testing, including seismic loadings on structures and soils in real-time.
- Learn from world renowned leaders in the design and performance assessment of steel, concrete, and timber buildings and bridges in seismic events.

Courses

This minor is available alongside the Bachelor of Engineering with Honours in Civil Engineering. You will study the properties of different building materials, and how to analyse, test, and design largescale building projects. Topics can include:

- structural materials testing
- architectural design
- earthquake engineering
- sustainable materials and lifecycle analysis. courseinfo.canterbury.ac.nz

Career opportunities

Global disasters show us that there is still much to be done to withstand these extreme forces. Your degree will prepare you for designing, building, and maintaining any kind of structure to withstand these events, from bridges to dams to skyscrapers.

Career pathways could include:

- consulting
- contracting
- local, regional, and central government
- management.

canterbury.ac.nz/life/jobs-and-careers

Study Structural Engineering:

• Bachelor of Engineering with Honours in Civil Engineering

Sustainable Business, Enterprise and Economics

With businesses expanding across the globe, we need more people with the skills to help manage economic growth with environmental issues like pollution and use of natural resources.

This major covers everything from sustainable products, production, shipping, and marketing, through to influencing changes in customer spending habits.

What will my study involve?

- Get hands-on experience creating sustainable business solutions through an internship.
- Learn business basics of management, economics, accounting, marketing, or communications with how these affect our views and treatment of the environment.
- Opportunities to create your own business with UC's mentors, business connections, and a Makerspace.

• Customisable major so you can follow your interests in particular sustainability issues and industry.

Courses

The first year allows you to choose from a range of introductory business courses so you can learn the fundamentals of running a business and study sustainability issues that interest you.

Topics can include:

- environmental economics
- business organisation
- natural resources and supply chain management
- media and marketing.

courseinfo.canterbury.ac.nz

Career opportunities

Every industry needs to find more sustainable practices, and there are few people in the current job market with knowledge of both business economics and environmental science to help achieve this. Your problem-solving skills will help lead us to better corporate responsibility and sustainable consumption of goods.

Career pathways could include:

- management
- business analysis and consulting
- marketing
- entrepreneurship.

canterbury.ac.nz/life/jobs-and-careers

Study Sustainable Business, Enterprise and Economics:

 Bachelor of Social and Environmental Sustainability

Sustainable Coasts

With more than half of the world's population living in coastal zones, many nations are dependent on the ocean to sustain life and economy. In this subject, you will learn how to manage our coastal and marine resources.

Aotearoa as an island nation has a unique history and cultural narrative with its coastal settlements and marine resources, and is a living laboratory for learning how to live sustainably. Sustainable Coasts offers study in the diverse ecosystems, functions, and dynamic changes of coastlines and ocean life.

What will my study involve?

- Explore the biological, geographical, and social effects of coasts and surrounding urban and natural environments, and find sustainable solutions for their preservation and ongoing use.
- Examine long-term effects on coastal climates, including rising sea levels, erosion, over-fishing, and debris pollution.
- Practical work including field trips to UC's field stations, and work experience in your final-year of studies where you apply your learning as part of your degree.
- The Bachelor of Environmental Science with Honours is accredited by the Environment Institute of Australia and New Zealand (EIANZ) to deliver environmental practitioners for roles in industry, government, education and research, and the community.

Courses

First year courses give you an introduction to biology, ecology, and geographic sciences. From second year, you will take courses towards your major, learning about marine biology, ecology and human history with coasts.

Topics can include:

- marine biology
- beach, sea, and shore biospheres
- urban coastal regions
- natural hazards and disasters.

courseinfo.canterbury.ac.nz

Career opportunities

Sustainable Coasts graduates are in demand due to the range of environmental issues we are facing as a result of climate change, pollution, and loss of biodiversity. Completing this degree will give you the knowledge to help solve these environmental issues.

In addition, you will have developed a range of skills including collecting and analysing data, developing mitigation plans, and evaluating and responding to environmental policies and plans. Career pathways could include:

- environmental scientist
- field technician
- resource management officer
- disaster management and response.

canterbury.ac.nz/life/jobs-and-careers

Study Sustainable Coasts:

• Bachelor of Environmental Science with Honours

Sustainable Energy Engineering

Sustainable Energy Engineering explores how we generate and store energy from sources such as natural gas, oil, and solar, and produce products such as electrical power, fuels, and batteries.

You will also learn about environmental issues and moves towards sustainable engineering and renewable energy.

What will my study involve?

- Practical lab work learning how to improve various kinds of energy.
- Identifying opportunities to reduce energy demand.
- Individual and group design and research projects.

Courses

Courses start with the basics of energy creation and thermodynamics, then investigate energy supply and demand, sustainability issues, and new energy technologies.

Topics can include:

- chemical reactions and energy generation
- fossil fuel conversion
- processing plant design
- new and emerging energy sources (like hydrogen and ultraclean fuel).

courseinfo.canterbury.ac.nz

Career opportunities

Knowledge of energy management will prepare you to meet the increasing demand in industries, ranging from wind to solar to carbon power generation. You will also be a great source of expertise in environmental effects and sustainable engineering practice. Career pathways could include:

- power suppliers
- operations and site management
- renewable energy and sustainability
- energy analyst.

canterbury.ac.nz/life/jobs-and-careers

Study Energy Processing Engineering:

• Bachelor of Engineering with Honours in Chemical and Process Engineering

Tauwhitinga Māori: Māori Communication Strategy and Practice

Māori communication is very important for businesses in Aotearoa, as they are increasingly looking for ways to include Māori culture and heritage in their media, advertising, communications, and everyday practices.

This major is ideal for anyone looking to bring about social change, and help industries engage strongly with our bicultural nation.

What will my study involve?

- Specialised knowledge as this is the only major of its kind in Aotearoa on Māori communication strategy and Kaupapa Māori (values and goals) in professional workplaces.
- Learn to create public-facing content representing Māori, from print to television to social media.
- Internship projects during your degree will place you within iwi businesses, communication agencies, and other local UC contacts.
- This major can be studied alongside other courses such as Te Reo Māori, History, and Geography.

Courses

Specific courses for this major begin in the second year of the degree, where you can advance your communication skills through Māori media channels, and explore how Māori values and traditions can adapt to media and cultural shifts. Topics can include:

- Māori transformation in modern society
- campaign messaging and advertising
- television and film industry
- Māori as changemakers and trendsetters.

courseinfo.canterbury.ac.nz

Career opportunities

Bicultural practice and expertise are in high demand in many industries. You will be particularly good at advising or creating content for iwi, government, creative, education, or business communication.

You may even find work internationally in places where experience in Indigenous communications and engagement are especially needed, for example in Australia, Canada, and the USA.

Career pathways could include:

- marketing analysis
- media content creation
- public outreach and relations
- campaign management.

canterbury.ac.nz/life/jobs-and-careers

Study Tauwhitinga Māori:

• Bachelor of Communication

Taxation and Accounting

Taxation is about more than creating and charging taxes — it distributes money to public goods and services, and can be a tool to influence behaviour.

This study involves many different subject areas, including law, economics, and even psychology to help us understand the impact of taxation on society.

- Take a range of courses from legal, accounting, and practical perspectives that prepare you for a professional career in taxation and accounting.
- Apply your learning through internships and international study options.
- By taking specific courses in this major, you can gain external qualifications and membership with CPA Australia,

Chartered Accountants Australia and New Zealand (CA ANZ), the Association of Chartered Certified Accountants (ACCA), and other professional accounting bodies internationally.

 Complete a minor in Taxation or Accounting within a range of bachelor's degrees to add understanding of tax and policy to your other studies.

Courses

You will be introduced to the whole taxation process and legal systems around tax, and go onto advanced courses examining taxation and accounting in many contexts including retail, tourism, and farming.

Topics can include:

- government and service tax
- international taxation
- tax avoidance, evasion, and investigation
- income taxation (property sales, employment, stocks, etc).

courseinfo.canterbury.ac.nz

Career opportunities

Study in taxation will set you up with the skills and knowledge needed to work as a taxation specialist or as a chartered accountant in Aotearoa or internationally.

Career pathways could include:

- finance manager
- business analyst
- tax consultant or auditor
- forensic accountant.

canterbury.ac.nz/life/jobs-and-careers

Study Taxation and Accounting:

Bachelor of Commerce

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Te Ao Hākinakina

Te Ao Hākinakina studies explores the world of Māori sports, including its history and strong influences on our extensive and unique sporting culture in Aotearoa.

What will my study involve?

- Learn about Indigenous health and wellbeing, sporting culture, and physical education, and find ways to incorporate Kaupapa Māori into your training and teaching methods.
- Explore current barriers to help improve access and outcomes in the sports industry for Māori and Indigenous athletes.
- Develop confidence engaging with bicultural communities and industry through sport and health education, including the opportunity to learn basic te reo.
- Practical experiences throughout study working with bicultural sports organisations, educational programmes, and communities.

Courses

Courses in this programme will explore cultural and inclusive practices for sport and industry, as well as practical experiences developing your communication skills (including in te reo), teaching, motivating, and engaging with players and athletes.

Topics can include:

- wero Māori health issues and opportunities
- kapa haka and traditional sports
- coaching and training
- equity, privilege, and access to professional sports.

courseinfo.canterbury.ac.nz

Career opportunities

By reflecting on and critiquing bicultural practices in the sports and health industries, you will learn to create meaningful changes and engage with organisations that support Indigenous athletes.

Career pathways could include:

- outreach coordinator
- kaiārahi
- sports educator
- health promoter.

canterbury.ac.nz/life/jobs-and-careers

Study Te Ao Hākinakina:

• Bachelor of Sport

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

• Certificate in Sport Coaching

Te Reo Māori

Learning te reo Māori enables us to explore our identity as New Zealanders and pass on our passion to others and future generations.

Te Reo Māori is a highly recommended study option for those who might work with Indigenous people or industries, or in education, public, or communications roles that require bicultural and multicultural competency.

What will my study involve?

- Develop your reo skills and learn about language revitalisation, bilingual/ immersion education, reo history, and contemporary language.
- Take part in wānanga reo (language immersion field trips) to local marae.
- Be a part of our whānau at Aotahi: School of Māori and Indigenous Studies with support and guidance in and out of classes.
- Complete a minor in Te Reo Māori within many bachelor's degrees to combine language skills with your other study interests.

Courses

No previous experience of te reo Māori is required for first year courses, with later courses advancing you through to fluency level. If you know some te reo Māori already, then you may be given direct entry into secondyear te reo Māori courses.

Topics can include:

- contemporary reo language
- oral and written traditions
- kapa haka and performance
- film, music, and media.

courseinfo.canterbury.ac.nz

Career opportunities

Careers are opening up with the increasing role of Māori as a defining element of our national culture. Te Reo Māori skills are sought after in health, media, government, tourism, social services, and many other industries.

Career pathways could include:

- community leadership
- journalism
- heritage and cultural organisations
- interpreting and translation.

canterbury.ac.nz/life/jobs-and-careers

Study Te Reo Māori:

• Bachelor of Arts

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Psychological Science
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Other pathways:

- Certificate in Arts
- Certificate in Languages
- Diploma in Arts
- Diploma in Languages

Tourism Marketing and Management

This subject has a strong focus on the management and marketing of tourism, including destination marketing, impacts of tourism on the environment and local culture, Māori and Indigenous tourism, and specialised marketing in the hospitality and events sectors.

You will also focus on sustainable and resilient tourism operations, how to responsibly develop tourism, and finding the balance between 'overtourism' and 'undertourism'.

What will my study involve?

- Option for a final-year internship. You can also go on an international exchange with one of UC's global partners.
- A focus on cultural and natural resources management and tourism issues in Aotearoa.
- Choose courses that develop your expertise in an area that interests you such as foreign policy, languages, entrepreneurship, or digital marketing.
- You will learn from lecturers with expertise in marketing and tourism research, and industry experience.

Courses

Courses will introduce you to principles of marketing, marketing research, and tourism management.

Topics can include:

- tourism, hospitality, and events marketing
- sustainable tourism and destinations
- marketing research
- hospitality marketing and management.

courseinfo.canterbury.ac.nz

Career opportunities

Your studies will set you up with applied skills like project management, behavioural change, bicultural competence, marketing research and communication, and sustainable tourism benchmarking and monitoring.

In particular, your experience in Aotearoa tourism will be highly valued in the industry, which needs managers with bicultural expertise to grow our economy and smaller tourism enterprises. Career pathways could include:

- destination management and marketing
- · events coordination and marketing
- guiding and interpretation
- tourism and hospitality operations management.

canterbury.ac.nz/life/jobs-and-careers

Study Tourism Marketing and Management:

• Bachelor of Commerce

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport
- Bachelor of Youth and Community Leadership

Water and Environmental Systems Engineering

Population increase, urbanisation, natural hazards, and climate change are leading to complex challenges in how we manage our limited water resources and environment.

Studying this subject will train you to integrate the built environment with the natural environment to help supply clean, quality water to households, agriculture, and industry, and process wastewater in a less environmentally damaging way.

- Courses with a project focus and industry collaboration, including built systems and laboratory testing.
- Linking with local communities, including mana whenua, to find solutions for water and environmental systems problems.
- Mentoring from world leading lecturers who are active in industry and as advocates.

The courses in this minor begin in your second year of study alongside the Civil Engineering programme.

Topics can include:

- drinking and wastewater treatment
- ecological engineering
- groundwater and surface water engineering
- fluid mechanics for water supply and natural water systems.

courseinfo.canterbury.ac.nz

Career opportunities

Expertise in water and environmental systems engineering will give you a range of career options including water infrastructure design and management, quality and security issues, recycling, supply operations, and environmental compliance.

Career pathways could include:

- consulting
- city and regional planning
- government policy
- research and development.

canterbury.ac.nz/life/jobs-and-careers

Study Water and Environmental Systems Engineering:

• Bachelor of Engineering with Honours in Civil Engineering

Workplace Psychology

Apply psychological practice to the workplace to understand to understand employee needs and the impact of their attitudes, and behaviours on organisational performance and behaviours on organisational performance.

You will also examine multiculturalism in the workplace and learn how to build diverse teams and working relationships.

What will my study involve?

- Explore common psychological trends and experiences at the workplace, burnout, stress, recognition, and the research behind causes, effects, and solutions.
- Learn how to work with individuals and groups in the workplace to support their growth and wellbeing.
- Learn to identify and apply methods and tools used in organisational psychology.
- Through a final-year professional practice course, labs, and self-reflection, you can work on your emerging professional skills.

Courses

You will be introduced to the theory and practice of organisational psychology, and business culture, and explore the link between employee perceptions, behaviours, and performance.

Topics can include:

- mental health at the workplace
- personality, strengths, and skills assessments
- supporting outcomes and worker satisfaction
- navigating organisational changes.

courseinfo.canterbury.ac.nz

Career opportunities

Studies on business culture and psychology will make you highly valued in every sector, as we spend large quantities of our daily lives at the workplace.

Your knowledge around cause and effect on people's wellbeing will also prepare you for roles in coaching others, managing changes and strategies, and working with a diverse culture of people.

Career pathways could include:

- industrial and organisational psychology
- management
- human resources
- professional training and development.

canterbury.ac.nz/life/jobs-and-careers

Study Workplace Psychology

• Bachelor of Psychological Science

Youth and Community Leadership

"The landscape of the world is changing so quickly and is heading in a direction where we have to be adaptable, and the BYCL prepares you to have this versatility."

Ella

Bachelor of Youth and Community Leadership

Youth and Community Leadership explores national and global challenges that impact today's youth and our communities, and looks at ways to create meaningful change through leadership.

You can study a range of issues like social justice, sustainability, policy, and equity. You can also focus on communities that you want to make a difference in.

- Work closely with UC's active student community who have led efforts in natural disaster relief, social causes, wellbeing, sustainability, and cultural diversity.
- Connect with community through noho marae, volunteering with Te Hunga Tūao | Student Volunteer Army, and work with Te Mātāpuna Mātātahi | Children's University.
- On completion of the recommended courses for youth work and development, you can apply for membership to Korowai Tupu, the Professional Association for Youth Work in Aotearoa.
- Act now with off-campus and handson projects and internships so you can start making change while studying (eg, addressing topics such as climate change, young people's health and wellbeing, human trafficking, and planning events for the Rainbow community).

First-year courses introduce you to your role in youth and community leadership. This involves building self-awareness and engaging with mātauranga Māori perspectives. You will also learn about youth work as a professional practice in Aotearoa.

Topics can include:

- group leadership
- community engagement
- cultural activism
- social justice and globalisation.

courseinfo.canterbury.ac.nz

Career opportunities

Develop skills in leadership, entrepreneurship, project management, bicultural competence, collaboration, and community engagement to get you ready for a career with youth and community. What you will learn can be applied to community leadership worldwide.

Career pathways could include:

- youth work
- policy analysis and advisory
- iwi and Māori development
- teaching and training.

canterbury.ac.nz/life/jobs-and-careers

Study Youth and Community Leadership:

• Bachelor of Youth and Community Leadership

As a Minor:

- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Digital Screen with Honours
- Bachelor of Health
- Bachelor of Product Design
- Bachelor of Science
- Bachelor of Social and Environmental Sustainability
- Bachelor of Sport

Other pathways:

• Certificate in Youth and Community Leadership

Youth Work and Development

The Youth Work and Development pathway is the perfect option for you if you want to make an impact in the lives of youth and their whānau. Working with young people is an immensely rewarding career where you mentor and lead young people to reach their full potential.

What will my study involve?

- Learn about the expectations and challenges of growing up in today's society, and develop leadership skills to help find their potential.
- Act now with off-campus and handson projects and internships so you can start making change while studying (eg, addressing topics such as climate change, young people's health and wellbeing, human trafficking, and planning events for the Rainbow community).
- Only university degree in Aotearoa that meets the requirements for professional membership with Korowai Tupu | Professional Association for Youth Work in Aotearoa.

Courses

This pathway includes select courses that prepare you to be a professional youth worker. These courses will examine the issues young people face today — from identity to sexuality to online spaces while building your leadership skills with practical projects and internships.

Topics can include:

- leadership strategies
- youth rights and discrimination
- how children and teenagers develop
- refugees, minorities, and Indigenous communities.

courseinfo.canterbury.ac.nz

Career opportunities

Supporting and inspiring youth from a place of knowledge and understanding leads to many rewarding work roles.

Training in youth work opens up career possibilities in social and human services, iwi, and educational spaces connecting directly with Aotearoa youth, or through making positive changes at a higher level to the systems that affect their rights and wellbeing.

Career pathways could include:

- youth worker
- community development worker
- programme coordinator
- welfare supporter.

canterbury.ac.nz/life/jobs-and-careers

Study Youth Work and Development:

- Bachelor of Youth and Community Leadership
- Certificate of Youth and Community Leadership

As a Minor:

• Bachelor of Psychological Science

Tautoko | Get support

From the moment you arrive on campus to your graduation, UC has support available every step of the way.

Te Pātaka | Student Services Hub is your go-to support centre, located on levels 2 and 3 in the Puaka-James Hight building (central library). You will find both academic and wellbeing services in one location and they will connect you to the relevant support teams.

You can receive help with anything you need, whether that is study and exams, health, sport, counselling, injuries, job search, and more.

Read more about all the support services:

Your students' association

Te Rōpū Ākonga o Te Whare Wānanga o Waitaha | University of Canterbury Students' Association (UCSA) is a non-profit organisation that helps all students find support and feel like they belong at UC.

We have more than 160 clubs and regularly host events on campus.

We offer advocacy services, dental and optometry services, welfare and financial services, advisory groups, class reps, and more.

ucsa.org.nz

"I immediately felt a sense of support at UC, the value of whanaungatanga. The way UC advocates for student wellbeing showed me the importance of tiakitanga. And finally, the way lecturers listened to my goals and helped me create a plan to achieve them showed me the UC value of manaakitanga."

Todor Bachelor of Commerce in Finance and Economics

Pastoral Care

The Education (Pastoral Care of Tertiary and International Learners) Code of Practice 2021 is designed to guide institutions in their practice and to protect students when they study in Aotearoa. UC is a signatory to the Code and is required to meet the standards set by the New Zealand government.

UC postgraduate qualifications

Are you curious about a specialist topic? Maybe you wish to boost your employment chances, develop your career, or change direction completely?

Whatever your goals, UC has over 120 graduate and postgraduate qualifications on offer and support services to help you achieve them.

Advantages of further study

Graduate and postgraduate study can provide you with:

- specialist skills and applied experience
- enhanced knowledge in topics you care about
- entry into specific occupations
- the opportunity to conduct original research that contributes to knowledge in that field
- smaller classes and closer links with staff
- evidence of high academic attainment and self-discipline
- a mark of independent research capability and original thought, particularly for research-based qualifications
- a marketable qualification which could make you more employable, qualified, and in many cases, more financially secure. Research shows that study at postgraduate level (master's and PhD) gives students a salary advantage.

Postgraduate honours degrees*

Bachelor of: Arts with Honours Commerce with Honours Music with Honours Science with Honours

* Other honours degrees at UC are studied as part of an undergraduate programme.
