Provides AI-Enabling multispectral disruptive technology and award-winning products, which revolutionize the aerial remote sensing and the precision agriculture market.

Farming

Project Placement Examples Overview

Example Projects

Beyond Remotely

Content Analyst, Creation and Marketing Intern

- **Market analysis and reporting** - Conduct research on the future of work, current and upcoming trends, associations and studies that are of interest. Especially in the area of video-conferencing and general management consulting that helps business to transition and manage remote work models. Different business approaches and models will be compared. Tasks include, research, reporting, analysis and visual presentations of the findings (e.g. infographics).
- **Marketing strategy and implementation** - Collect data on the current reach and performance of our company and Beyond Remotely. Find engaging ways to expand reach and customer engagement, especially via social media and video-content. This project will entail: marketing research, analysis, content creation (research, blog post, video), social media management and everything else to build and maintain the brand image. The intern will be expected to present a short weekly report summarizing content engagement and reach.
- **Content creation** - The intern will have the opportunity to help engaging and novel educational content for existing clients and future projects. The scope will include comparative research, creative thinking and writing, and - if the skill-sets allow for it - visual design. Based on initial research about other standard courses, the intern will propose an original concept and assess existing internal concepts.

Example Projects

SolidBlock Financial Analyst Intern

SOLIDBLOCK

- The intern will be given professional analytical and management support work assignments. Assisting in compiling quantitative and qualitative research for various projects and ideas our firm is working on, coordinating with other members of the finance team, such as a risk analyst when required to review financial information and forecasts, identifying financial performance trends and financial risk, and making recommendations.
- Assist with compliance requirements, process & procedure documentation support, operations. Help in completing a specific project that will involve cross-functional collaboration.
- Assist with the preparation of transaction marketing materials, including pitch books, teasers, confidential information memorandums, and management presentations, researching trends in various industry sectors, and help with other projects and responsibilities as assigned by the project manager and supervisor. The intern will work with other departments as well and assist from time to time with other administrative tasks.
- Develop and utilize spreadsheets, databases, and other applications: evaluate key company metrics and develop new measurements for success, identify areas for process improvements and consistently strive to streamline existing processes and reports.
- Assist in researching and writing and help with the preparation of board packages and management meeting presentations.

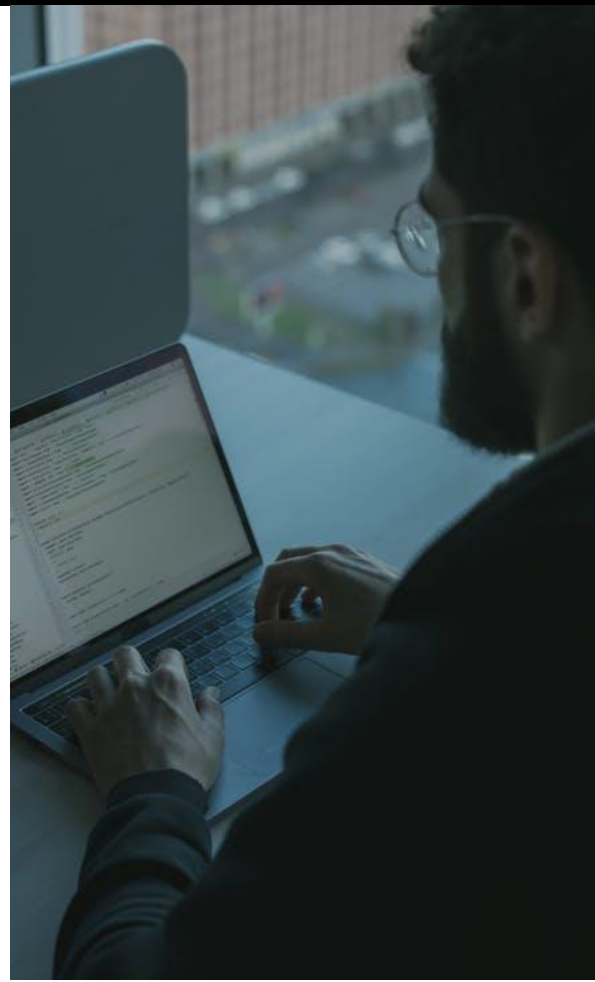

Example Projects

AIO - Verified Financial Identity Data Science and Integration Analyst

- **Documents anomaly detection (Data science)** - Given a dataset of PDF documents from a Document Creating Organization (DCO) and a Document Under Examination (DUE), the intern would need to estimate the likelihood that the DUE was created or modified by another person/entity than the DCO. This task can then be programmed and automated.
- **External data source integrations (Java developer)** - An import part of a successful onboarding and identity verification of a company (business identity) is the ability to collect as much as possible public information about the company and company's key personnel, like directors and management. To enhance these capabilities, we would like to create an API integration with data sources such as Experian, LinkedIn, Crunchbase, and others. The collected data would be integrated with AIO due-diligence portal.
- **Frontend improvements** - An import part of successful onboarding and identity verification is the ability to check the authenticity of the collected documents. Our platform has a significant customer-facing front-end side - for use by businesses and individuals. We'd like to improve many parts of the platform's frontend, such as web pages, emails, branding and CSS configuration for different customers, etc.

Example Projects

FitMyTime

Visual content creator, Article writer, Market & User Researcher intern

- **Visual content creator** - Conceptualize creative ideas from concept to design, craft unified, cohesive visual stories and messaging across all mediums, telling a complete and unforgettable brand story, design and create relevant, original, high-quality content (videos, images, infographics, illustrations, banners, photos) for all relevant social media platforms (Instagram, Facebook, Pinterest) and for our website to best engage target audiences, build awareness, convert and retain followers; Recognizes popular themes that our target audience engages with and supports the development of content strategy accordingly; leverage technology and trends in visual content creation to tell stories and connect with audiences across all platforms.
- **Perform market research** - Gather and analyze competitive intelligence, analyze competitors strategy, create and present research deliverables and reports.
- **Content writer** - Strategize and create content for publication; produce well-researched content; develop related content for multiple platforms, such as websites, email marketing, product descriptions, videos, and blogs; use search engine optimization (SEO) strategies in writing to maximize the online visibility of a website in search result, follow an editorial calendar, collaborating with other members of the content production team to ensure timely delivery of material.

Example Projects

Cloudonix Inc Frontend developer

- Developing end user portal (Dashboard) for our video tool - requires experience / college level coursework in web technologies, especially around TypeScript and Angular - experience must include real programming work.
- Enhance our end user portal (Dashboard) for our customer self service - requires experience / college level coursework in web technologies, especially around TypeScript and Angular. - experience must include real programming work.
- Updating user documentation for each Dashboard - requires fluent English (American) writing to write help and popovers.

Project Placement Examples

Career Fields Specific

What does a good project look like?

- **This is a two-way relationship** - the project can provide value to the company as well as help the interns develop their skill set so it is worth putting thought into a project plan that will develop the interns and deliver real results for the company
- **Create a structure to the project.** This can be in the form of research, analysis, implementation and presentation of deliverables. This structure it can help to create:
 - A week-by-week project overview
 - A concise bullet point overview of the project when you fill out the sign-up form
 - An example of a good Project Placement Plan can be found appended to this document.

What does a good project look like?

- The experience should be an extension of the classroom, i.e. a learning experience that provides for applying the knowledge the students have already gained in the classroom.
- It should not be simply to advance the operations of the Host Company or be the work that a regular employee would routinely perform.
- The skills or knowledge learned should encompass core skills that the interns can transfer to other settings such as presentation or communication skills.
- The supervisors should possess relevant professional expertise and preferably have experience in coaching junior members of staff.

Example Projects

Association Of Foreign Banks - United Kingdom

CRM Intern

- Manage customer newsletter creating weekly content, inputting contacts into database, and compiling required content.
- Work on the delivery of a new customer relationship management system and new website.
- The organisation has recently launched new social media accounts and the intern will be tasked with managing these accounts including developing a content and engagement strategy.

Malik and Mack - United Kingdom

Research Intern

- Mapping out industries and competitors.
- Mapping out features for potential new products.
- Creating project plans for hypothetical new products.
- Try and understand if a jobs board would be a good area of investment for Malik and Mack. Assuming it is, what features could we implement to make it a cut above the rest.

Alumni Testimonials

Business

“This experience to work for a company from another country was an excellent way to use international project management skills, such as understanding people’s behaviors and differences. Furthermore, it allowed me to be a leader of an important project and goal of the company, it also made me use the ability to negotiate milestones and deadlines to complete each task requested.”

Wellington De Sousa Morais, Business Intern,
Centennial College

CENTENNIAL
COLLEGE

“My communication skills were greatly improved, especially in writing. Also, my critical thinking and problem-solving skills improved as I worked on resolving challenges faced by my host company.”

Tsolayemi Akperi, Business Intern, Aston University

Computer Science
& IT

Skills You'll Learn and Apply During a Computer Science & IT Internship

- App Development
- Clearly articulate complex concepts
- Consumer Experience
- Data Modelling
- Hardware Development
- MySql
- Programming & Coding (Java, C++, Python, etc)
- Project Management
- Software Development
- Testing and QA
- UX/UI Design
- Working With Large Data Sets

Host Company and Project Examples

A Scandinavian company focuses on digital image editing and development

Machine Learning & Algorithm Intern

Adapting key algorithms to real word applications, such as intelligent surveillance, ADAS/AD, natural language processing, and large-scale speech recognition.

A medium enterprise focuses on using a platform to connect massage therapist with clients

Backend-Developer

Writing clean, testable code to build customer-facing web and mobile applications.

A start-up delivering an online creative suite featuring paint, tunes, video, and more

UI/UX Intern

Assisting in creating brand guidelines for company app and creating the document layouts based on them (e.g., contract layout) to make sure brand unity in the company's external and internal communication.

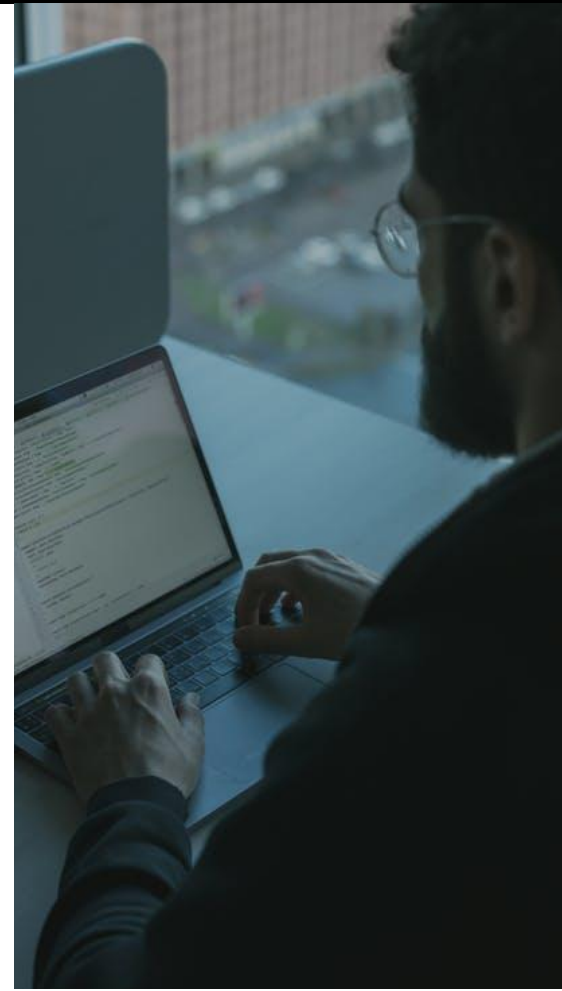

Example Projects

Testifi GmbH - Germany **Full-stack developer Intern**

- The Full-stack project involves a variety of tasks that allow the students to apply their technical skills such as software testing, software engineering etc. The project will also expose the students to different emerging and interactive technologies that will help the students grow beyond their current capabilities.
- The supervisor - Nejdet Dogru (Head of AI team) - is an experienced researcher in the field of Machine Learning and Computer Networks. Skilled in Java, Python, Keras, and AWS. Hold a Doctor of Philosophy (Ph.D.) focused in Machine Learning and Intelligent Transportation Systems.

Korechi Innovations Inc. – Canada **Front End Web Developer Intern**

- Create a basic layout for a web based app using javascript frameworks such as Angular or React.
- Working with Google maps SDK, the intern should be able to develop custom interactions with the map, such as creating markers, polylines, and polygons based on user input or on file instructions.
- The user will incorporate WebRTC into the web app to get high performing, low latency inputs and outputs from the app for sensitive activities like video streaming and teleoperation.

Alumni Testimonials

Computer Science & IT

"I enjoyed the experience and developed my effective communication skills, and my general resourcefulness skills. I was introduced to a new system and learned about it, and now I'm a certified HubSpot CMS web developer who worked on a real project! I explored a completely new & different culture and made many global friends!"

Amna Alwzrah, Engineering Intern, Prince Sattam bin Abdulaziz University

"In the wake of the COVID-19 Pandemic, the skills I got from Virtual Internships will be very helpful going forward. The CareerBridge exercises offered me strategies of how to operate in the workplace, deal with cultural differences in the workplace, and how to use online scheduling tools and video conferencing software. I am now better prepared for navigating a world that will operate under a new normal."

Sean Mbanugo, IT Intern, Queen Mary University of London

- **Electronics Engineering** - Modelling the Fieldbus circuit for the specific method of communication with the help of the team. Study the different methods of communication available (Modbus, Ethercat, ...) and report the differences, advantages and disadvantages in regard to KOMP-ACT actuation system.
- The internship will be around the software to program the protocol of communication: The intern will be going through a training phase regarding embedded programming in C/C++.

XELA ROBOTICS – Japan Electrical Engineering Intern

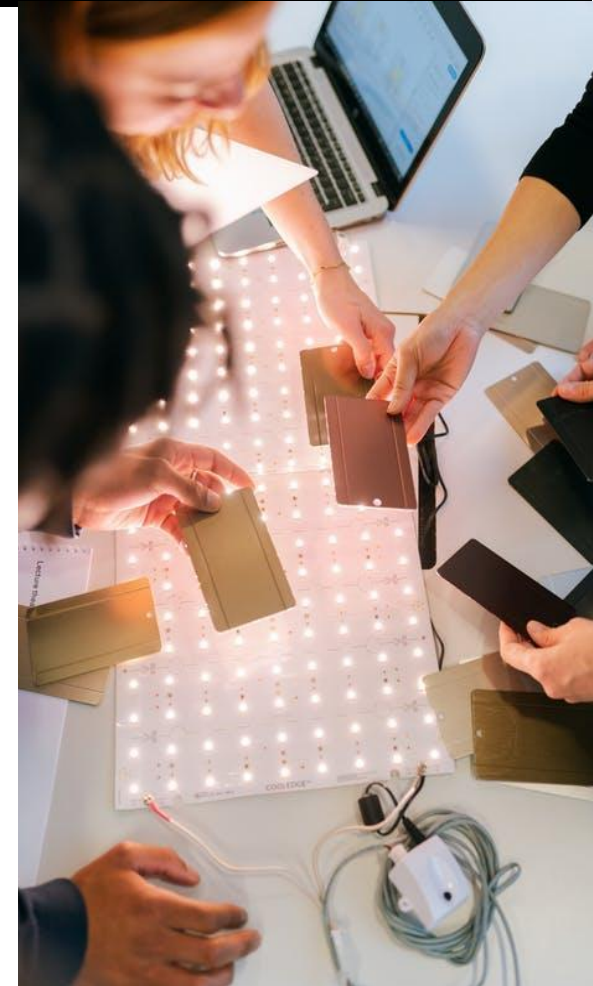

- Design new PCBs according to customer requirements. Hard and flexible PCB can be used. Various rules have to be followed to make sure that the sensor will work as intended. Design the schematics and the PCB layout.
- Changing communication protocol of microcontroller. A new microcontroller needs to be designed, which communicates with a different than the current communication protocol.
- Changing microprocessor of microcontroller. A new microcontroller needs to be designed, which uses a different one than the current microprocessor.

Example Projects

Kapi Limited – Israel Chemical Engineering Intern

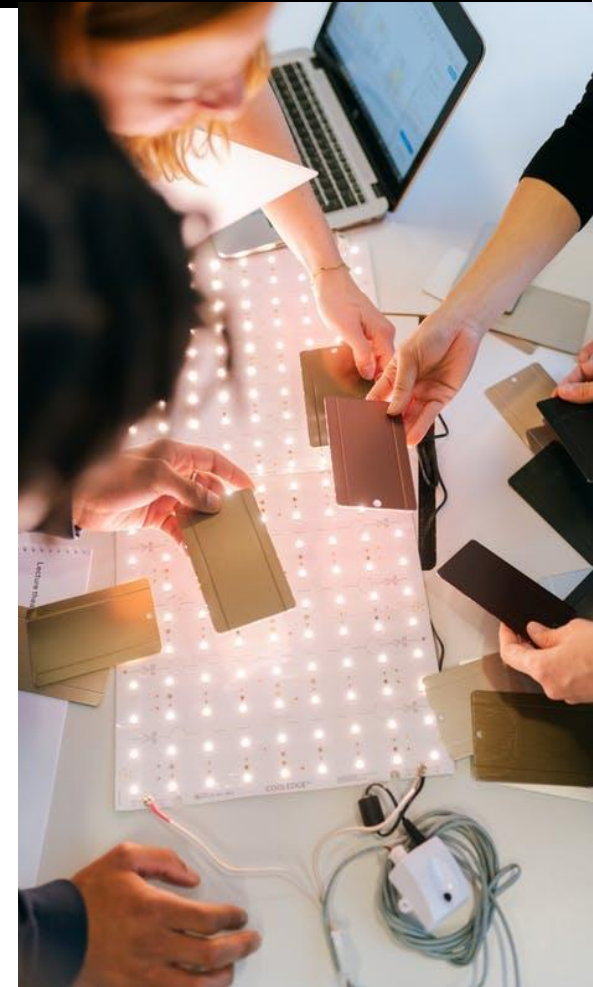

- Research possible improvements of an organic agricultural insecticide in terms of efficacy and emulsion stability - the intern will be charged with researching the active ingredient (pyrethrum) and looking at potential natural synergist(s), natural solvents and natural emulsifier options. The intern will work through possible new formulations, as well as amendments to existing formulations. Field trials will be undertaken to determine efficacy and to ensure no phytotoxicity. Laboratory tests will confirm no residues in the crop after 24 hours, and emulsion stability under extreme temperature conditions.
- Research on suitable organic adjuvants that can be used together with an organic agricultural insecticide during spraying. The adjuvant should either increase the efficacy of the insecticide (either through improving the wetting and spreading of the insecticide or through synergistic action with the active ingredient (pyrethrum), or permit lower application rates of the insecticide whilst achieving acceptable knock-down and kill rates of insects. Field trials will be undertaken with full report feedback to the intern
- To work with the supervisor (remotely) on product development for an acaricide - specifically for cattle either in a dip or spray- specifically targeting ticks. Review the A.I., and look at the co-formulants - specifically the carrier solvents and emulsion(s). Again, field trials against competition with results shared with the intern. Please note - this is not an organic formulation

Example Projects

Sascan Meditech Ltd – India Engineering Physics Intern

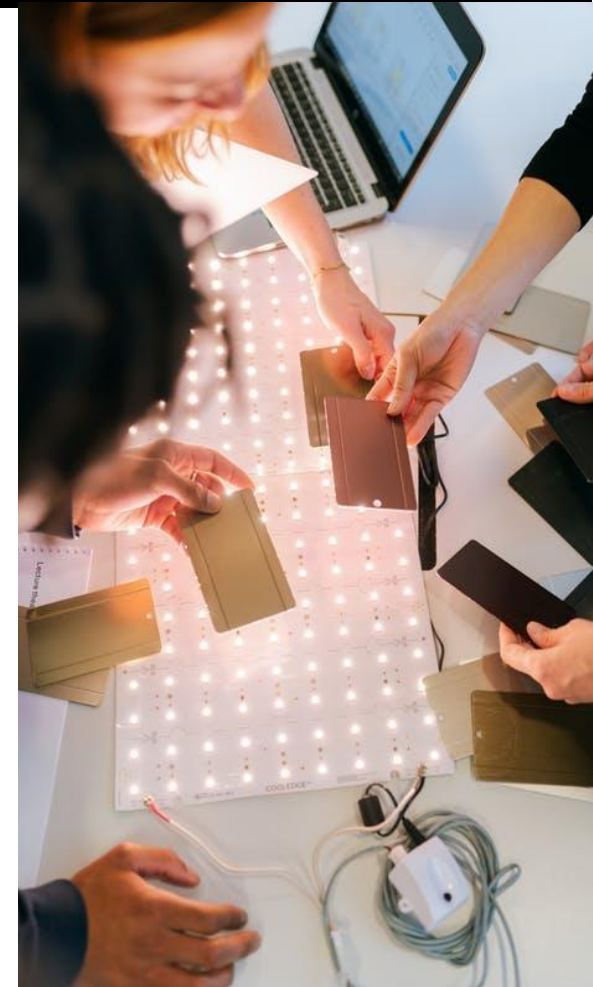

- The intern will have the possibility to work on assessment of the Photodynamic Therapy (PDT) based treatment for oral and cervical cancer management. He/she will have to assess the market potential for the technology for implementation in different countries considering the incidence levels of the disease, the stage at which the treatment would generate improved treatment outcomes, and conduct cost/benefit analysis of PDT as a therapeutic modality for cancer management as compared to existing modalities of treatment for these diseases.
- The intern may review, collate and update research papers on oral and cervical cancer detection using optical imaging techniques. The intern will have access to clinical data and will use statistical techniques to analyze and interpret the data and may gain experience to co-write research papers for publication in peer reviewed journals.
- The intern shall work in the theory of light propagation through tissues and its application for assessment of biochemical transformations during cancer development. He will work on tissue fluorescence, diffuse reflectance and multispectral imaging of tissues with a view to understand light tissue interactions in a widefield imaging scenario as compared to the classical point monitoring situation.

Example Projects

Hydrobee SPC – United States Mechanical and Electrical Engineering Intern

- We need mechanical and electrical engineering interns to make prototypes variations for our new thermoelectric generator that makes USB charging power from the heat in stoves. In 5 years every home in the world will be able to make its own USB charging power from cooking and heating. Our core design works and is proven but there are thousands of stove types and the design must be fitted to them. The intern's own home stoves can be used for this project. The components cost is about \$50 and we will supply the components pack to those who cannot afford it. See the potential stove design applications at Hydrobee.com. The generator there is the old design, the new one is much smaller and more powerful and patent-pending.
- Over 3 billion people have biomass stoves at home that can use our generator to power a blower that makes the stove burn hotter with less smoke. We can save millions of people from lung disease as well as give them power at home for the first time. Any engineering student with experience in practical small mech/electrical projects can do this.

Alumni Testimonials

Engineering

"The highlight of the internship is that I had the opportunity to make accurate drawings for manufacturing (laser cutting), design motorcycle components to improve assembling, which have greatly upgrade my professional skills."

Oluwakorede Emmanuel Sowunmi, Engineering Intern,
Carleton University

"It was a good conclusion to what I have done throughout this internship journey. It helped me to realize what things I have accomplished and developed, and what I can improve."

Rahaf Shalabi, Engineering Intern, Effat University

Entrepreneurship & Startup

Skills You'll Learn and Apply During an Entrepreneurship & Startup Internship

- Branding
- Building Mission Statements
- Business Development
- Business Proposal Support
- Client Relations and Support
- Competitor Analysis
- Data Analysis & Business Reporting
- Exposure to CRM systems
- Fundraising and Investor Relations
- Leadership/Management skills
- Market Research
- Networking
- Problem Solving
- Social Media marketing
- Strategic Planning
- Facilitation and Presentation Delivery Skills

Host Company and Project Examples

A start-up developing an app to monitor beverage stock at restaurants

Business Development Intern

Supporting the needs of Director of Business Development, and Proposal Manager with duties as assigned such a proposal and presentations.

A recruitment start-up focuses on matching individual consultants to large global projects

Content Development Intern

Creating website and marketing content for outreach and candidate sourcing.

An art sourcer and trader meeting the needs of the everyday consumers

Product Intern

Working closely with the procurement team to source and vet potential artists to showcase.

Example Projects

PingAn Technology – China

Operation Intern

- Support cohort company database build up. According to the need statement, sourcing for potential cohort companies and summarized onto the cohort database.
- Support cohort company selection. Arrange & participate in phone/video interview with potential cohort companies. To short list the top list among the potential candidates.
- Support Ping An Xcel GTM activities. Ping An Xcel is an in-house developed CRM & CMS system targeting to incubator, accelerator & project operations. Will support to fine tune the marketing materials, sales related materials, etc.

The Deck - Japan

Growth Strategy Intern

- **Market Validation Research** - In depth SWOT Analysis on current incubator/ startup business landscape in Japan and business models of other incubator programs, market validation research similar research for potential clients of our program, putting all information into a professional presentation Financial/ Accounting Spreadsheet set up/ Strategy Input - Creating tracking spreadsheets and formulas, input on strategy/ operations plan - how can we simplify this element of the business to make it easy to track/ manage.
- **Marketing Strategy/ Event Admin Support** - Identifying marketing partners, online contact, creating event documents, emailing guests, data entry to track guests and partnership progress.

Alumni Testimonials

Entrepreneurship & Startup

"My sales, marketing and research skills have definitely improved throughout this internship to the point where I know I will be using these skills for my own startup."

Shareefa Kutbi, Entrepreneurship & Startup Intern, Dar Al-Hekma University

"I gained a clear outline of my future goal and skills I want to continue building and improving."

Monerah Al-Dubayan, Entrepreneurship & Startup Intern

جامعة دار الحكمة
DAR AL-HEKMA UNIVERSITY

Finance

Skills You'll Learn and Apply During a Finance Internship

- B2C sales
- Clearly Articulate Complex Concepts
- Client Relations and Support
- Commercial Awareness
- Data Analysis & Business Reporting
- Data Entry
- Facilitation and Presentation Delivery Skills
- Financial Modelling
- Financial Reporting & Forecasting
- Invoice Processing
- Market Research / Market Analysis
- Negotiation
- Presentation Skills
- Process of Conducting Audits

Host Company and Project Examples

An investment company focuses on identifying and investing in compelling early-stage businesses with an Asia-focused

Financial Research Intern

Providing comprehensive research reports on potential investments or key international markets.

A large tax firm focuses on support for expats within the UK

Accountant Assistant

Supporting customer accounts and processing as well as data administration support for accounts receivable.

Supporting an international accounting firm with research and analysis

Finance Intern

Assisting in compiling quantitative and qualitative research for various projects and ideas our firm is working on. You will work with the managing partner and receive direct feedback.

Example Projects

Dove Air – Australia Financial Analyst Intern

- Support finance teams with creating financial forecasts, consolidate collections, and revenue streams for regional holdings. Finance Intern will be also assisting in compiling quantitative and qualitative research for various projects and ideas our firm is working on.
- Manage partners' Small Medium Enterprises e-commerce platforms, work with operations to plan out field visits to informal business locations, respond directly to Small Medium Enterprises and Informal businesses account queries.
- Engage with budget forecast project as well as portfolio management. Intern may also need to collect the data to learn how stock market works and eventually learn the difference between investing public company and private company.

Cryoniss Ltd. - United Kingdom Finance Intern

- Consolidation of historical information from Quickbooks.
- Implement a new, transparent process for capturing expenses, invoices across the organisation, visible to our external accountant.
- Support CEO to develop a new 3yr cash flow forecast model.
- Support CEO to develop monitoring and key performance indicators to evaluate predicted versus actual cash flow.

Alumni Testimonials

Finance

"My experience with the Virtual Internships program exceeded my expectations as a remote intern working with a company based in China. I joined the program to expand my horizons on global networks and build connections for future employability. Throughout the program, I felt support and praise from my supervisor and with the coaching calls and check-ins I had with the Virtual Internships team. Since completing my internship, this opportunity has given me a new perspective on how I look at my career choices for the future."

Leeroy Nyamandi, Finance Intern, Botho University

"My favorite memory from my virtual internship was being able to sit in on Zoom calls and meetings that my company was having with other venture capital firms & investment banks. Being on the inside and gaining knowledge into how these partnerships work was very unique and a special opportunity!"

Angelina Oh, Finance Intern, University of Pennsylvania

Green Tech, Sustainability,
& Environmental

Skills You'll Learn and Apply During a Green Tech, Sustainability & Environmental Internship

- Business Development
- Campaigning
- Client Relations and Support
- Lobbying
- Market research
- Marketing Strategy (to market green products)
- Product Design
- Product Marketing
- Product Testing
- Project Management
- Research and Analysis
- Research Regulations & Standards
- Technical Support

Host Company and Project Examples

A start-up offering an AI supported digital platform to track, document and reduce waste effectively

Research Intern

Compiling sustainability reports on various industries and markets to support content development and outreach.

An educational company creating learning opportunities through interactive, educational field trips focused on the environment and nature

Content Development Intern

Creating a narrative around the experience and outcomes to translate to potential customers and investors.

A leading Asian Non-profit Policy Research Institute focuses on clean energy

Policy Intern

Working research and development teams draftings policies and external outreach.

Example Projects

International Ecological Economy Promotion Association - China

Cooperation Department Intern

- Perform research, collect, synthesize, and analyze data derived from the research and report findings on the current policies and regulations and other support services in relation to related to environmental, mining, biology, ecological economy, sandstone ore, waste classification and other ecological programs outside China.
- Coordinates the liaison function; serves as the point of contact with the various consulates, embassies, international organizations and other business stakeholders on a regular basis and to provide regular clear updates to the organization.
- Intern will working on social platforms and social content publishing, covering Wechat, Weibo, Toutiao, Linkedin, Twitter and other social platforms. Initiates and design creative social media contents for follower boost.

JHSUSTAIN - South Korea

Research Assistant Intern

- Supporting a research paper on promoting the private sector engagement in climate-related development programs.
- Supporting a research paper on Water management projects in Asian countries.
- Supporting finishing up of reports through editing, proofreading, and compiling a bibliography.

Alumni Testimonials

Green Tech, Sustainability & Environment

"The highlight of my internship was finishing my third publication. My third publication was the final article in a series about regenerative studies, and finishing it made me very proud and excited as I was learning and expanding my network."

Malina Gallmeyer, Greentech Intern, Michigan Technological University

"I was able to complete a research project independently, with guidance from my supervisor. I feel very satisfied with the end result, and not only is it useful for the company, but also it is something I can show future employers as evidence of the skills I have gained."

Isabel Philpott, Green Tech, Sustainability & Environment Intern, University of Sussex

Healthcare
& Pharmaceuticals

Skills You'll Learn and Apply During a Healthcare & Pharmaceuticals Internship

- Academic Research
- Administrative Operations
- Business Development
- Content Creation
- Customer Service / Bedside Manner
- Data Analysis
- Data Entry and File management
- Editing Publications
- Exposure to Patient Management Systems
- Research & Development
- Research Regulations & Standards
- Website Management

Host Company and Project Examples

An international Life Science Company focuses on healthcare and agriculture

Medical Writing Intern

Supporting editing and review of content and technical expertise delivered by regional project teams.

A medium-sized Pharmaceutical company

Marketing Intern

Developing data analysis reports to understand the growth drivers of the category and build recommendations to develop our market share in pharmacy and parapharmacy.

A large company delivering a healthcare focused start-up incubator

Digital Health Intern

Supporting in marketing and recruitment of start-ups to the upcoming application phase and co-developing digital products and process solutions.

Example Projects

Dianox - Denmark

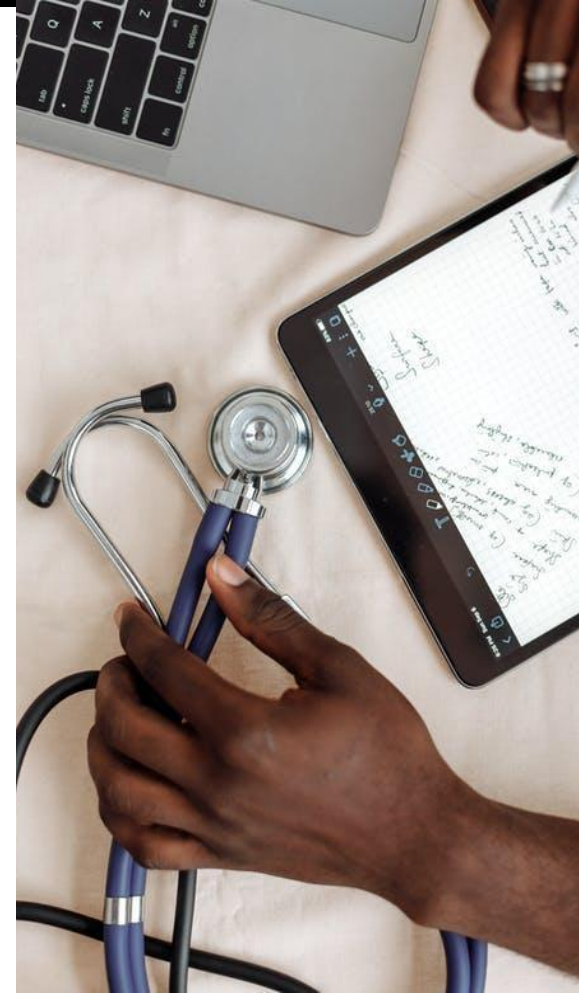

Junior Bioinformatics Researcher

- A part of the Research & Development team of a biotechnology startup for diagnostics of infectious diseases. The intern will be introduced to concepts such as virology, bacteriology, disease biomarkers, detection methods as well as how to design biophysical tools for diagnostics.
- Spearheading the research of their own chosen disease area within infectious diseases starting with Hepatitis B, Tuberculosis or similar deadly impactful diseases and will also be conducting silico research, reading scientific journal articles, organizing the data and helping us define a scope of detection by filtering out unfeasible projects.
- Logging the data in our project management tool, presenting the findings to the management team visually and over teleconference calls. The intern will be in a startup environment and face complex scientific development challenges.

DHB Global - China

KSA Insulin Manufacturing Intern

- Conduct local information gathering on domestic (KSA) market for insulin users.
- Conduct in-person interviews with local industry and regulatory partners to determine market size.
- Assist in drafting investment proposal.

Alumni Testimonials

Healthcare & Pharmaceuticals

“The highlight of my Virtual Internship was working on business strategy. With this project, I got to combine all my research I compiled throughout my internship and use my creativity to come up with an effective business strategy for the company!”

Lee Friedman, Healthcare Intern, University of Florida

“My supervisor congratulated me on completing my internship and even offered me a chance to come back and be a CPD developer in a paid position. That was really cool to be able to get a job opportunity out of the work that I did through this internship.”

Nathan Moorese, Healthcare Intern, University of Kansas

Health, Wellness,
& Sports Management

Skills You'll Learn and Apply During a Health, Wellness & Sports Management Internship

- Account Management
- Building Brand Awareness
- Business Development
- Client Relations and Support
- Event Management
- Market research
- Marketing and Promotion
- Product Design

Host Company and Project Examples

A Vietnamese Sports Clothing Store and Online Platform

Marketing Intern

Supporting the online sales department in reaching target markets and developing A/B testing for content and outreach.

UK Health and Wellness Site focuses on Strong Content and Product Promotion

Social Media Intern

Creating a content calendar to post new blogs, tweets, and images well developing some personal and external content.

An international workout equipment company focuses on live group trainings

Data Analysis Intern

Working alongside the technology department to review market trends and create internal reports on process efficiencies and scope for improvements.

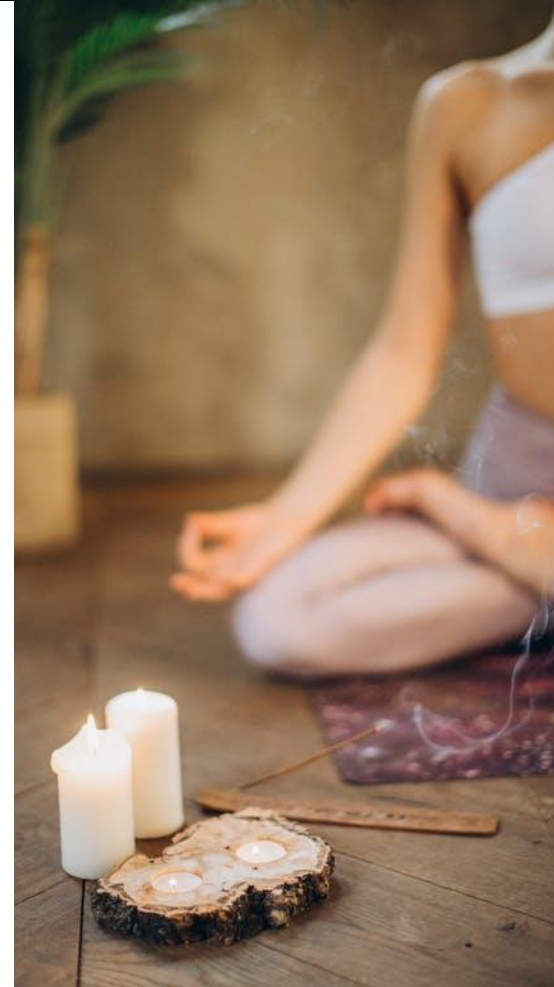

Example Projects

TNT Sports - South Africa **Sports Management Intern**

- Feasibility study on expanding the global footprint of RADD Tennis Academy.
- Locate and qualify clubs or centers in our target countries where our tennis academy can be successfully implemented using our blueprint from South Africa and the UK.
- All aspects of the project would need to be taken into consideration during the first phase of the study and initial setup.
- Implementation of the project with the help of our team on the ground in all our target countries. Staffing, contractual and structural Implementation will be required in order to sign off on project #2. Tracking reports and worksheets would need to be used for control purposes of each club or center in each country.

Budding Innovations Pte. Ltd.- Singapore **Life Science Intern**

- Turning innovative sleep product idea into functional prototype (brewing product) and test with consumers including: support material sourcing, coordinate with labs and partners to develop prototypes, support consumer testing plan, recruitment for consumer testing, analysis.
- Evaluation of incorporating natural ingredients into consumer products that have positive benefits to human health including: evaluation of efficacy, market potential, competitor landscaping.
- CRM management including data entry & maintenance, following up on new leads, running CRM reports.

Alumni Testimonials

Health, Wellness & Sports Management

"This is something that will really set me apart from other people going for the same jobs, because I've had experience working with people from America and other places. It gives you that edge over the competition."

Sam Pilkington, Health, Wellness & Sports Management
Intern, University of Birmingham

UNIVERSITY OF
BIRMINGHAM

"The overall experience of working remotely, and connecting with different people and cultures, the challenge to communicate and gain various ideas and this experience somehow enlightened me to comprehend and accept differences between our country, our work environments our goals and mostly our way of living."

Marwa Qurban, Health, Wellness & Sports Management
Intern, Umm Al-Qura University

Hospitality, Events,
& Tourism

Skills You'll Learn and Apply During a Hospitality, Events & Tourism Internship

- Account Management
- Business Development
- Client relations and support
- Communication
- Content Creation
- Databases/Reservation System
- Event Management
- Marketing & Promotion
- Problem Solving
- Proofreading contracts & policies
- Public Relations/Building your Brand
- Vendor Sourcing
- Virtual Event Delivery and Coordination

Host Company and Project Examples

An experiential tour company focuses on wellness retreats

Digital Marketing Intern

Delivering website and social media updates as well curating custom content to drive traffic and new customers.

A technology company focuses on customer service platforms for hotels

Market Research Intern

Supporting data analytics of business trends and creating reports for marketing suggestions and identification of appropriate channels for the B2B market.

A start-up travel website focused on off-season and sustainable travel

Content Development Intern

Curating and editing blogs, videos, and images for destination spotlights. Intern will show a passion for travel translating unique destinations and opportunities into strong content.

Example Projects

The France - Vietnam Chamber of Commerce, CCFV - Vietnam

Event Planning Intern

- Drafting event budgets for venues, lights, music, etc.
- Drafting event packages to offer partners such as restaurants and beverage suppliers.
- Researching cashless solutions for events.

SweetEscape - Indonesia

Operations Intern

- Liaise with vendor (photographer) partners to ensure photographers are available so that bookings can be scheduled accordingly and clients have photographers to cover their sessions.
- Recruit new photographers in new and existing cities to make sure all destinations are covered.
- Assign and set schedule for photographers according to clients' booking orders.

Alumni Testimonials

Hospitality, Events & Tourism

"I think the best part of my internship was the amazing people I was able to work with! My boss at the internship company was absolutely lovely and really did her best to make me feel welcomed and also show how grateful she was for the work I did."

Lexi Elkins, Health, Hospitality, Tourism & Events Intern,
Pennsylvania State University

PennState

Since most our work was based on marketing, I realized how it is essential in the tourism and events industry which enticed me to research the matter and re-educate myself on the subject. "

Juri Mesawa, Hospitality, Tourism & Events Intern, King
Abdulaziz University

International Dev,
NGO, & Charity

Skills You'll Learn and Apply During an International Development, NGOs & Charity Internship

- Client relations and support
- Community Outreach
- Content creation- e.g. press releases, blogs
- Country-Specific Policies and Laws
- Curriculum Development
- Data Analysis
- Event Planning
- Marketing & Public Relations
- Project Management
- Report writing for donors
- Research & Analysis
- Stakeholder Support Plans
- Volunteer Management
- Written & Oral Communication

Host Company and Project Examples

focuses on Refugee Support**

Workforce Development Intern

Assisting in the creation of tools to support resume and cover letter writing, as well as other employment curriculum and resources for refugees.

A local Chamber for Commerce

Marketing Intern

Developing website content and bi-weekly newsletters to share the current programming and success with potential local businesses.

**A UK non-profit using e-learning to
support volunteers and students**

Content Development Intern

Developing materials for engaging more volunteers in giving their time online to support the initiative. Support will be focused on recruitment, training, and retention of volunteers.

Example Projects

Wilmat Development Foundation - Uganda Junior Programs Associate

- **Project development and Management** - You will be tasked to co-design advocacy projects, Women economic empowerment projects, Social-Entrepreneurship project, Climate Smart Agriculture, Girl2Girl project, GBV Prevention among others for the rural women, adolescent girls, children and youth in Uganda by creating sustainable development ventures. These will be developed by the intern in line with their career development all in support of our programming.
- **Project Material Development** - Create a systematic, process-driven approach to project capacity training materials, Programs planning, fundraising campaigns, scheduling, implementation and evaluation/impact assessment strategies. The intern will be responsible for supporting, creating, and implementing Organizational Partnership strategies, project training materials to enhance the position and integrity of our organization in the public eye and in grassroots communities.
- **Grant Mapping, Writing and Donor Communication** - The intern will help in donor mapping, promoting the work of the organization to individual donors, partners and other grant making organizations in favor of our community-led projects. The organization shall guide and provide a platform to intern in planning communication events, host a learning event, Reach out to potential donors and assist in grant proposal writing process.

Example Projects

Swasth Foundation – India

Wellbeing Research & Content Writing Intern

- **Research** - Researching and documenting key nutritional best practices aligned to the Yoga and Ayurveda philosophy that we follow. Finding research evidence to make compelling arguments for people to consider making these shifts. Can do this for other aspects of our work also - with Yoga and Mental Health. Also, researching on key non-communicable diseases - their date rate, etc
- **Communication Material** - Converting this material into digestible, attractive "nuggets" for consumption by people - infographics, videos, etc - that we can use in our courses, workshops, etc.
- **Communications** - Disseminating the above content on social media and building a followership.

Alumni Testimonials

International Development, NGOs & Charity

"With the Virtual Internships experience, I had been able to learn more about the NGO industry and the daily functioning of an NGO. It was an eye-opening experience, and contributing my part to the organization had been incredibly fulfilling!"

Hilary Chang, International Development, NGO & Charity Intern, The University of Queensland

"The opportunity to intern with a global NGO through Virtual Internships was a once in a lifetime experience that allowed me to make lifelong connections with people across the globe from the comfort of my own home. Through this internship, I have developed my ability to be resilient, as well as my time management and leadership skills to be able to adapt to an online environment which has become all the more important in this day and age."

Anri Ichikawa, International Development, NGO & Charity Intern, Victoria University of Wellington

Legal

Skills You'll Learn and Apply During an International Development, NGOs & Charity Internship

- Account Management
- Assessing Claims
- Client Relations and Support
- Commercial Awareness
- Content Creation
- Contentious Negotiations / Application of the Law
- Country-Specific Policies and Laws
- Developing Arguments
- Due Diligence Activities
- Event Management
- Legal Document Drafting & Review
- Legal Research & Analysis
- Marketing & Promotion
- Oral and Written Communication

Host Company and Project Examples

A boutique Law Firm specializing in Investment Funds, Real Estate & Venture Capital

Corporate Law Intern

Assisting the legal team and our clients in all stages of investments, from due diligence and legal analysis to portfolio management, conduct legal research, analysis and prepare reports.

A Non-Profit supporting immigration law

Legal Intern

Researching country conditions and psycho-social services to support case work and clients. Some case management by updating case summaries, and tracking important court dates and deadlines.

A tech Startup focuses on Monitoring Regulatory Law Changes in new platform

Legal Consultant Intern

Curating and editing blogs, videos, and images for destination spotlights. Intern will show a passion for travel translating unique destinations and opportunities into strong content.

Example Projects

McNeil Collective - United Kingdom

Legal Projects Intern

- Prepare for Euro Business Information Services presentations by reviewing the research on 5 significant Court of Appeal cases and adding certain features such as extra quotes from the cases and references for guidance documentation.
- Research the fire safety bill and building safety bill and associated documentation and write blogs on safety cases, the Golden thread, sprinklers, and other features of this legislation that is going to lead the western world in construction and building safety law countering the use of unsafe cladding that has been around for about 20 years.
- Analyse compliance in regulatory or regulated industries to do with fire oil railways and present LinkedIn live sessions to large audiences on these matters as well as creating LinkedIn, Youtube and Facebook live sessions, posts and blogs.

Dentons Beijing - China

Legal Research Intern

- Legal research on the rules of World Bank about bidding process in projects.
- The process of the company who violates the rule of bidding to challenge the punishment.
- Relevant legal issues that might have in the research.

Alumni Testimonials

Legal

"I created legal policy on telemedicine, providing the company with the guidelines to properly and safely conduct remote medical consultations. In a time where this is extremely relevant, it is extremely rewarding to help be a part of the process that gets their patients a great remote medical consultation."

Zachary Abate, Legal Intern, Long Island University

"My experience working with Rouse Beijing was impactful because I was able to gain and enhance my professional skills, in particular, my written and oral communication, time-management, and critical thinking. Also, my project work has made a positive and impactful contribution to the company. For instance, Rouse Beijing incorporated some of the questions and answers that I composed into their survey."

Ashleigh Bazeley, Legal Intern, University of Birmingham

**UNIVERSITY OF
BIRMINGHAM**

Logistics & Supply Chain

Skills You'll Learn and Apply During a Logistics & Supply Chain Internship

- Account Management
- Business Development
- Business Operations
- Client relations and support
- Cost and/or Efficiency Analysis
- Databases for Sales Leads
- Industry Knowledge
- Inventory tracking
- Procurement process follow up
- Project Management
- Relationship Management
- Research & Analysis
- Streamlining Processes
- Vendor Sourcing

Host Company and Project Examples

An international Corporation focuses on the Global Branded Beverage Market

Global Logistics Intern

Connecting with various departments and leaders to assess information need and apply analytics and data to complex problems, helping to balance the need for sustainable answers and increased operational efficiency.

A local B2B Telecommunications Company

Supply Chain Intern

Creating and processing customer orders, work orders, shipping orders, and/or requisitions to determine items to be moved, gathered, or distributed and/or shipped for fulfillment of orders.

An Electric Car Manufacturer

Logistics Assistant

Providing ongoing analyses in areas such as transportation costs, parts procurement, back orders, or delivery processes.

Example Projects

Leiho - United Kingdom

Supply Chain & Growth Strategy Analyst

- To help analyse current supply chain and find areas for improvement. This role will also analyse current delivery structure and find a logistic plan for a more cost effective delivery service.
- To conduct competitor analysis and pitch a plan for business growth strategy and improvement.
- Producing research reports of social impact businesses with updated predictions of current market size and target addressable market.

Dollaride - United States

Transit Planning and Operations Intern

- Synthesize research that has been completed over the past year to clarify the goals and needs of people who Dollarhide serves - drivers, riders, business clients. This will involve consolidating findings (e.g. quantitative studies, focus group interview notes, driver interview notes, enterprise client interview notes), identifying common patterns across research, and formulating research-backed suggestions to support Dollaride's operations and planning.
- Assist with route planning and creation. This will involve using google maps, existing transit planning tools, and potentially GIS mapping services (as needed) to plot routes, plot stops and pickup points, and analyze street level activity to inform route planning. Consolidate past research on route creation and planning to craft a protocol for new route development.

Alumni Testimonials

Logistics & Supply Chain

"Analytical skills were improved through this internship. My supervisors tasked me with raw data analysis projects which made me more familiar with dealing with data analysis."

Joseph Min, Logistics & Supply Chain Intern, Lehigh University

"My coworkers, because they really pushed me out of my comfort zone and helped me develop professional skills. I could eventually better plan for my future career path decisions based on the skills and takeaways I took from the internship."

Spencer Martin, Logistics & Supply Chain Intern, Miami University

Marketing

Skills You'll Learn and Apply During a Marketing Internship

- Account Management
- Brand Awareness
- Business Proposal Support
- Buyer/User Needs
- Content Creation
- Copywriting - Website, Blog, Marketing
- SWOT Analysis

- **Social Media videos** - The intern will work with our team to create mini videos that will perform well on the variety of social media platforms that are most used. These clips could be real life video, graphic focused or other formats.

Cargo AI - Singapore

Video Creation for Social Media Campaign

- Create weekly professional videos content to be posted on linkedin and support our marketing campaign.
- Create professional videos content to be posted on our helpdesk.
- Participate in the digital marketing campaigns working with colleagues and their ongoing projects.

Alumni Testimonials

Media, Communications, & Publishing

"I recently completed my internship and the experience was one to remember. What stood out the most from my internship experience was the genuine care placed on personal development. Even with the internship being virtual, the collaboration aspect was truly felt. Throughout the internship, I always felt a part of the team and fully supported. I gained international experience and learned new skills from a great leader who encompassed courage, effective communication, and gratitude."

Monica Jablonski, Media Intern, University of Michigan

"Having studied languages, I was very interested in all things writing, copywriting, social media and marketing. I found the application process a challenge because at that stage it was still unclear what sort of internship it would be: what my role would be and what sort of company I could hope to be placed with. The internship was an excellent way for me to gain an initial insight into running social media pages in a professional way and I developed my Tik Tok and video creation skills. I can now comfortably put on my CV that I have experience working with social media."

Emily Sargeant, Media Intern, University of Birmingham

UNIVERSITY OF
BIRMINGHAM

Real Estate

In the first few weeks, you will help research on competitors' practices and start developing our product FAQs and users onboarding guides on our latest staff engagement product. You could imagine yourself as HR manager and draft the FAQs to help them navigate our engagement platform.
- You will be responsible for enriching the HR library resources online as a "self-counter" for HR practitioners to have a quick read on staff engagement and related articles.
- You will also be responsible to help perform the User acceptance test on the beta product which includes creating the testing scripts and finding bugs in the product and report to the IT team to fix them. Besides, you will also help draft the tooltips as part of the online onboarding process for HR practitioners, staff and manager.

Alumni Testimonials

Recruitment & HR

“I did the Virtual Internships Program and was placed with a consulting and coaching company in Dublin, Ireland. The projects we worked on were varied, all within the HR field. We did presentations on coaching, edited book chapters on various psychological areas, created training for future interns, conducted market research into prominent HR topics, along with many other incredible tasks. The skills and experiences I gained whilst doing the internship were so valuable to me getting experience within the field I want to ultimately end up in. The company always pushed us to go further and would have daily meetings with us. There were three of us interning and they managed to give each one of us their full attention and pass on their expertise, without any of us feeling that we were not receiving the best experience possible. The company still stays in touch now which is lovely!”

Leah Hazelton, Recruitment & HR Intern, Aston University

Urban Planning
& Architecture

Skills You'll Learn and Apply During a Urban Planning & Architecture Internship

Alumni Testimonials

Urban Planning & Architecture

"I was placed in a host company that engage in the field of architecture, which allowed me to gain experience and guidance from professionals, and learn how to utilize the knowledge I learnt in university."

Yousef Balghonaim, Urban Planning & Architecture Intern,
King Fahd University of Petroleum and Minerals

"New experience to have a virtual internship in this situation of Covid-19, I think it is an opportunity that I'm lucky to have."

Lama Alzuhairy, Urban Planning & Architecture Intern,
Alyamamah University

Host Company Testimonials

HCs Testimonials

“ Working with Virtual Internships has been an exciting experience. I got to introduce diversity into my team by having members from different cultures and backgrounds. I got the extra help that I needed to turn my projects around even faster, but most importantly, I had an opportunity to help mold our leaders of tomorrow! ”

Lorraine Agutu

Founder & Marketing Lead

“ When we first started with Virtual Internships, we were a bit skeptical of how effective the remote working arrangements across the world would be. It turned out that the virtual interns we have had this year from the US, Australia, and the UK have all been exceptional and very productive!

Our communications with the interns have been conducted via emails and weekly video conferences which have been proven to be quite effective. We are looking forward to continuing working with Virtual Internships! ”

Nelson Wong

Managing Director

HCs Testimonials

“ This is my first year working with interns from Virtual Internships. I found the experience delightful and would certainly love to continue working with Virtual Internships. I was really pleased with the standard of work completed for my company. The LEAD Curriculum highly recommends Virtual Internships! ”

Dennise Hilliman

Founder & Director

“ The Virtual Internships program has expanded our portfolio of interns who cannot be physically present in Shanghai. We were fortunate to work with four outstanding remote interns across the US this summer [and] the experience was very rewarding! ”

Zachary Goh

Head of Creative of Horizon Group

HCS Testimonials

“ Working with Virtual Internships has been such an incredible experience - so great that I have been telling other startups about them! The Virtual Internships team is very organized, on board, and frequently checks up on our experience with the interns. We cannot thank them enough and hope to continue hosting interns in the future. ”

Joey Li
CEO

“ Through Virtual Internships, we are proud to have the opportunity to reach out to nurture high-performance talent that values the importance of critical thinking, diligence, foresight, rationality, creativity, and communication. ”

Philip Seow
Managing Director

HCs Testimonials

“ Virtual Internships and computer science interns were a completely new ballgame for us. However, working with Virtual Internships really opened our eyes to new ways of working and the possibilities that exist with global talent pools! ”

Sahil Khandwala
Director of Axis Electrical Components India

“ We enjoyed the opportunity to engage and also to learn about the cultural nuances of our product in a foreign market. Developing soft skills and improving written English communication were major achievements and it was edifying to see lessons learnt, retained, and used. We enjoyed that the work was accomplished ahead of deadlines and reliably completed. Formatting and brand-aligned documents need some extra care. ”

At all times interns were polite, considerate, and hardworking. A great experience and we have built good relationships going forward. ”

Ben Shaw
CEO of HouseME

HCs Testimonials

“ It's been now 2 years with 18 remote interns from 5 different countries - the numbers speak for itself. An outstanding experience about sharing knowledge, gaining insights into local markets and helping starters with their first footsteps into the business world. Thanks "Virtual Internship" Team for making this happen. ”

Marc Pedri

CEO & Founder of EVO Creations

“ The partnership with Virtual Internships has been exceptionally beneficial for a startup like ours. The communication is professional, prompt and friendly. Our account manager, Stephanie, often goes out of her way replying to my calls and emails after her work hours. We have since undertaken 5 interns and would want to thank you and your team for bringing us so many excellent candidates. Virtual Internships understands the challenges in having remote working conditions in this Covid-19 era and are incredibly supportive.

Right now, Virtual Internships are always our first port of call when looking for an internship and future HR expansion. The quality and quantity of applicants has been first class. ”

Omni App Solutions - Singapore-based IT Company

HCs Testimonials

“ The pandemic requires us to relearn our learning. We have previously hosted over 50 interns. Our new interns, arriving through Virtual Internships have brought us new and highly valued experiences. We have retained our core principles of providing an excellent internship, for those who can benefit from working with Eduvate. Thanks to excellent guidance from Virtual Internships, we have adapted our mode of working, to retain its relevance and effectiveness in the virtual context.

The key differences centre around understanding and absorbing cultural variance and embracing the diversity. That of course means finding the best way to work without face to face meetings, but also means for example, different working weeks, or accepting that the similarities of globalisation often mask profoundly different ways of doing business.

With a succession of interns from UK, USA, Italy, UAE, Saudi Arabia, we at Eduvate have learned so much. We trust we have imparted features of good business practice and work ethics along the journey. The key to it all is that an internship is a two-way street, where the value is reckoned for both the intern and the host company. And the overarching value is respect. ”

Jonathan Brill
CEO of Eduvate

HCS Testimonials

“ The interns from Virtual Internships were a perfect fit for our international team. Despite a considerable time zone difference, daily video calls made communication and collaboration a seamless process. We were very impressed by the high level of creativity and problem-solving skills they brought to the table. It was a wonderful opportunity for everyone to grow. The interns were able to gain a deeper understanding of the ever-expanding IT field by working alongside a senior developer. In turn, our company was able to sharpen its remote leadership skills and conduct more frequent software testing . Virtual Internships is a must for those on the lookout for up and coming global talent. ”

Aaron Farney
Founder of Unwired Logic K.K

アンワイヤード・ロジック

UNWIRED
LOGIC

“ Virtual Internship opens up door of opportunities that didn't exist before. It is in demand since pandemic and allow more companies to provide vast learning and internship opportunities for students and fresh graduates.

It allows companies to move beyond local region to global exposure and flexibility through virtual supervisions and meetings. With this uprising trend, employers and interns alike gain exposure to new ideas, new culture and ethnicity of different segment market. We are privileged to have interns from the Saudi Arabia as we are demonstrating adaptability to remote work, work flexibility and different time zone management. ”

Michael Tan
Co founder & CTO of Rych Malaysia

3 RYCH

HCs Testimonials

“ We could not be happier, working with the Tech Interns provided by the Virtual Internships Team has been an incredible boost and support to our Tech Projects Team at The Supply Chain Academy–SCA Global. Our Digital Transformation journey has been a successful project thus far due to the value that we have been able to harness through the young talent and all the bright ideas they brought to the Project Team.

We are impressed by the commitment, work ethic and passion that's been demonstrated by most of the Tech Interns on board. I encourage more Young Professionals to get on board and start leveraging on virtual/remote work opportunities available globally whilst they're waiting for to land that “ideal job” they want, this helps them to acquire the requisite skills and experience they want, build their resume/CVs and network with companies and other Young Professionals throughout the global. ”

Truman N. Hadebe

Global Business Lead of The Supply Chain Academy–SCA Global

HCs Testimonials

“ Working with Virtual Internships has been an enlightening experience. We have been able to work with interns from other countries and enjoy the richness of a foreign perspective to our practice. I recommend Virtual Internships as they provide serious minded interns and they have a robust programme to ensure value is given and also enjoyed by the participants. ”

Morenike Kehinde
Partner of Maison Legal

“ Partnership with Virtual Internships program offered us this opportunity as the Host company, to meet well-educated and eager to learn, and that helped us as a startup with reaching our target market, developing a financial model and digital marketing that works for us too.

Working with the interns was a delight as they were fast learners, and paid attention to the details of the tasks asked of them which made us trust them. Developing soft skills and improving written English communication were major achievements and it was edifying to see lessons learned, retained, and used. A great experience and we have built good relationships going forward. ”

Mtesa Philip
Technical Director of Take Six Africa

HCS Testimonials

“ We have been working with virtual internship for 2 months now. It has been a smooth experience to onboard my student. The student that was matched with our company is very excited and eager to get things completed. We have tried other internships and by far this one is more superior. ”

David Rhodd

CEO of Limitless Solutions Financial Group

“

...To our marvel, we got two interns female the brightest interns we have ever had, their dedication, work commitment contribution and personality was one of the key success to this exchange. It was an awarding experience to MóvelCare as this was our first time to have virtual interns and their contributions have also been noted in our market strategy to be implemented in 2022. They worked perfectly to strategies one of the key go to market plan and touched on work that we were doing digitally. Their understanding of the Mozambican culture through research on the internet was astounding, I believe if the same caliber of interns is what is on VI, they will achieve great things in life ... Thank you Virtual Internships. ”

Tauanda Chare

Founder of MóvelCare Tele-Insurance (TABECH)

HCS Testimonials

“ Like any other young organization, Nature Rwanda has very limited financial and human resources to achieve its goal. The Virtual Internships program was able to provide an intern who has greatly contributed to the growth of the organization in a very short period. At first, we could not clearly see how we would be able to coordinate with an intern who would not be physically present in the office, and who has a different time zone from our location. However, the intern has brought new, fresh ideas to our organization and challenged how we have traditionally interacted with our supporters. She has provided valuable input on our fundraising strategy and how we can increase our online engagement and visibility to stay connected with our community.

Additionally, she assisted us in creating our first online fundraising event (campaign) for the upcoming Giving Tuesday to support the establishment of our vulture rescue and rehab center. This is something that Nature Rwanda needed but could not expect to happen in less than two or three years due to the lack of financial means to hire a qualified consultant to work on this strategy. We are happy that through the Virtual Internships program, we were able to accomplish this in two months. Through this experience, we have further learned that the efficiency at work depends on how strong and supportive the team is, and how each member is committed to his/her responsibilities—time and space don't always matter. ”

Jean Claude DUSABIMANA

Co-Founder & Executive Director of Nature Rwanda.

HCS Testimonials

“The internship process is very structured and professional. We were guided through every step of the internship. The weekly reports were very beneficial for all parties because it kept everyone up to date on the progress. Our intern was eager to learn and conquer new tasks. I would highly recommend the service. ”

Paul Antonevich

**Chief Marketing Officer of Catalyst Global Education
Marketplace**

“My journey with Virtual Internships started with high expectations, based on my first steps getting to know more about the organization, their operational model, and mainly their purpose. Every step we took from sending random questions to participating in webinars, I have always had a great experience and confidence moving forward, until the final process of sending our intern position opening. The process was great, with great professionalism, great professionals taking care of each step, and always open to support in any question we might have. The team selected an amazing intern, giving her not only the opportunity to have a direct impact on a real-life project but also to really contribute to the needs of our projects, keeping the quality of our deliverables. We have an amazing account manager that is always there to support us and guarantee a great experience during the internship. Thank you for all the support, we definitely will keep our doors open for more internships. ”

Gabriel Gargiulo

Partner Director of Begot
