

Dr Teodor Burghilea– Laboratoire de Thermique et Energie de Nantes, France

Semester 2 2022

I have come from Nantes, France (Centre National de la Recherche Scientifique, University of Nantes). I taught 4 weeks the course Math 202 coordinated by Professor Miguel Moyers Gonzalez.

I was expecting a very interesting teaching experience and I can now tell that my experience has surpassed my initial expectations. Along another line, I have come to do joint research with Professor Miguel Moyers Gonzalez with whom I collaborate since 2009.

I have been teaching and conducting research at UC. I enjoyed the competitive atmosphere at the UC and the beautiful and calm city in weekends
