

Are you interested in humanitarian work?

Do you want to help solve the world's biggest problems?

- Food • Water • Shelter
- Power • Sanitation
- Climate Change • Population
- Ageing • Healthcare

Change the world with a Diploma in Global Humanitarian Engineering

UC is introducing a new Diploma in Global Humanitarian Engineering, which can be taken in parallel with your BE(Hons) degree

- Open to students in any engineering discipline
- Get both a BE(Hons) and a DipGlobalHumanEng without adding time to your degree
- Include humanities courses in your study and practical or professional work experience in humanitarian engineering

As an engineering student, you can apply your problem solving skills to humanitarian aid, providing a lasting benefit to society while gaining valuable people skills that will give you a head start in your future career.
