What can I do with a degree in Operations and Supply Chain Management?

Operations and Supply Chain Management.

Career planning: what do I need to know?
Knowledge of yourself is important for career decision making. Start by looking at your personal goals, abilities, values and interests to explore study and career options that are relevant to you. Some of these may change over time, so it is important to self-reflect and evaluate your career on an ongoing basis.

What do employers look for?
Many employers look for generic skills such as communication, customer-focus, cultural awareness and teamwork. With technology and globalisation changing the nature of society, skills such as resilience, problem solving and adaptability are valuable at work as well as in life.

How can I develop these skills?
• Some skills are developed through your degree
• Extra-curricular activities can help, for example getting involved in clubs, mentoring, cultural groups, part-time work or volunteering
• Be open to professional and personal development opportunities. Whether it is undertaking an internship, overseas exchange, skills seminar, or joining an industry group — these activities will enhance your employability.

What else should I know?
The career options in this brochure are examples only and the list is not exhaustive. Some careers may require further study beyond a first degree or additional work experience. Some pathways and degrees have a recommended school background. Find more subject details at www.canterbury.ac.nz/subjects/operationsmanagement

If this brochure does not answer your questions, talking to an expert such as a career consultant can help you to identify the next steps in your career decision making journey. www.canterbury.ac.nz/careers

What is Operations and Supply Chain Management?
How do you make sure that people, money, materials and buildings are used efficiently across the whole organisation? How can you as a manager ensure that your organisation is successful in achieving its goals? These are big questions and a broad number of skills are involved in such an important business role.

Operations and Supply Chain Management (OSCM) is applicable to most organisations and is concerned with the design, planning and management of all facilities, processes and activities required to transform resources into goods and services. Operational managers control more than 70% of organisational resources used in the production of goods or in providing services. Successful operations managers also need knowledge of marketing, human resource management and finance.
What skills have UC graduates gained?
Through their Operations and Supply Chain Management degree, graduates develop a valuable set of transferable skills that includes:
• Logical and quantitative thinking
• Interpretive and analytical thinking
• Ability to solve complex business problems
• Practical application of knowledge
• Ability to measure and evaluate systems and processes
• Business judgement and initiative
• Modelling complex problems for decision making, problem solving and critical thinking
• Oral and written communication.

Where have UC graduates been employed?
Every organisation, whether a company or a not-for-profit organisation, has some operations function to it, so the skills learnt in Operations and Supply Chain Management courses are widely applicable. Graduates are often employed by:
• Manufacturing companies
• Management consultancies
• Transport companies
• Telecommunications service providers
• The energy sector
• State-owned enterprises.

Students in other disciplines often find it valuable to include some Operations and Supply Chain Management courses in their degree programme, as exposure to OSCM has become an assumed part of the training of managers as well as accountants, computer specialists and engineers.

What professional bodies can people link to?

As they progress, students and graduates often join professional bodies relevant to their area of interest. These organisations can provide regular communications and offer the chance to network.

- The Association for Operations and Supply Chain Professionals [www.nzpics.org.nz](http://www.nzpics.org.nz)
- Chartered Institute of Procurement and Supply [www.cips.org](http://www.cips.org)
- Project Management Institute New Zealand [www.pmi.org.nz](http://www.pmi.org.nz)
- The Institute of Management New Zealand [www.imnz.co.nz](http://www.imnz.co.nz)
- Employers and Manufacturers Association [www.ema.co.nz](http://www.ema.co.nz)

Social media networks such as LinkedIn, Facebook and Twitter can provide avenues to keep up-to-date with industry knowledge, networking opportunities, events and job vacancies.

Why do further study and what are my options?

Postgraduate study can facilitate career benefits such as specialist skills, entry into a specific occupation, and advanced research capability. It is important to determine which, if any, further study will help you in your future career.

OSCM graduates can progress into postgraduate programmes in Management, including honours, master’s and PhD study in that subject. UC also offers conversion programmes in Applied Data Science, Financial Engineering, Business Information Systems, Strategic Communications, Māori and Indigenous Leadership and more. Ngāti Raukawa
Bachelor of Commerce in Operations and Supply Chain Management, Strategy and Entrepreneurship, and Management
Graduate Logistics, Mainfreight Ltd

Tanisha Haumu

Why did you choose your degree?
I’ve always been interested in how things go from nothing to something, the processes surrounding this and how they can be improved. I chose my majors so I get an overall picture of the process and could learn more about strategy and innovation in a management context. I wanted to make the world a better place through efficiency and innovation.

What does your job involve?
I am responsible for monitoring all outgoing freight for a large client — I process all incoming orders and ensure they are despatched on time and in full to meet demand, with all the appropriate labels and invoices.

How did your studies prepare you for it?
My studies help me better understand the overall picture and why my job is important as part of the process. It has taught me time management, organisation, efficiency and accuracy are key, as well as adaptability and forward thinking in the supply chain context.

What was one of your favourite experiences at UC?
I was part of the SDS Case Study competitions. It was absolutely awesome and was the cherry on top of my time at UC — the knowledge I gained, the friends I made both nationally and internationally were amazing! Working with some of the biggest businesses in NZ is definitely scary, but worth it for anyone up to the challenge!

What are your career goals?
I would like to progress into an operations or branch manager role, and would be very interested in spending time in IT or Training and Development (or both). After that I’d like to be a National Manager or even CEO!
