

# Electrical Engineering

“I studied Electrical and Electronic Engineering at the University of Canterbury. I work at Orion, and ensure that the equipment that distributes electricity to homes and businesses is maintained. I also look for patterns in fault data, like whether a car hit a pole or an asset failed due to deterioration. I love my job because I get to work on a variety of projects in a team environment.”

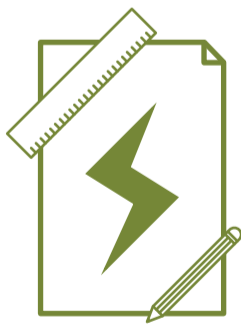

Former UC student, Jennifer Wen, completed an Electrical and Electronic Engineering degree at UC.

## Study Electrical and Electronic Engineering at the University of Canterbury Apply for our \$15,000 scholarship

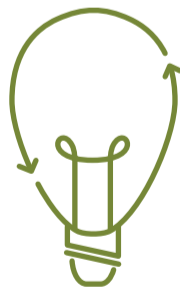

Up to eight scholarships are awarded annually. Apply now and electrify your career!  
Applicants must be studying level 3 mathematics and physics. Applications open **20th June** and close **15th August** 2016.

### Energise your career with Electrical Engineering

#### Practice Engineering

Work on a multitude of projects - from designing systems that keep the lights on, to the next generation of drones.

#### Research and Design Solutions

Research and design solutions, such as renewable energy and smart technologies.

#### Management

Manage cool projects and teams, in roles ranging from a Project Manager to the Chief Executive of an electricity company!
